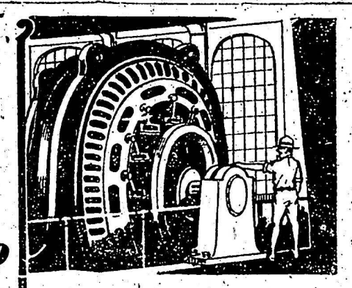
Canadian Senate May Be Reformed

...Minister King Believes He Is Supported In Working Out His Theories

$30 A DAY
Dear Mr. Cooke:
I was making $25 a week when I enrolled. Now, with my own Electrical Shop I make as high as $30 a day. A. J. Daigneault, 225 Worcester, Southbridge, Mass.

$1.50 AN HOUR
Dear Mr. Cooke:
I had to work like a slave for 45c an hour before I enrolled. Now Cooke-trained, $1.50 an hour. Wm. Owen, 4220 Meade Ave., Chicago, Ill.

You Fellows Who Want BIG PAY
Get into ELECTRICITY



WHY earn $15 or $20 or $30 a week, when in the same six days as an Electrical Expert, you can make $70 to $200—and do it easier—not work half so hard. Why, then, remain in a small-pay, no-future job that offers no chance for big promotion—no chance for big income? Fit yourself for a real job. GET INTO ELECTRICITY. That's where the big money is being made, and always will be made.

ELECTRICITY—THE BIG PAY FIELD
Today even the ordinary Electrician—the "screw driver" kind—is making money—big money. But it's the trained man—the Electrical Expert—who makes the really big money—$12 to $30 a day—$70 to $200 a week. Be a Big-Pay man, yourself. Get in line, now, for one of these "Big-Pay" Jobs.

I'LL TRAIN YOU AT HOME
I'll train you at home—in your spare time. You work just as you are working now—at your same job. My now famous "Work-Sheet and Job-Ticket" method guarantees you simplified, practical training along work-shop lines. In a few short months you can step out of your old job into a new job—into real electrical work where you can be a Big-Pay man in this Big-Pay field.

YOU EARN AS YOU LEARN
To learn Electricity my way you don't have to be a College man, or even a High School graduate. You can read, figure and write. That's enough. With me you get experience as you go along and make good money while learning. I'll show you how, and I'll give you, without extra cost, tools and apparatus to work with—6 Big outfits in all.

MONEY BACK IF NOT SATISFIED
That's what I agree to do. And back of me in this agreement stands the Chicago Engineering Works, a $1,000,000 Illinois Corporation. There's nothing like "Cooke" Training anywhere. It's the Training that big Electrical men are praising. It's the Training that employers recommend. It's the Training that one of our greatest Engineering societies has indorsed 100 per cent. It's the Training for you.

IF YOU'RE EARNING LESS THAN $70 A WEEK—INVESTIGATE
Don't wait a minute. Find out today why "The Cooke Trained Man is the Big-Pay Man" everywhere. Find out how "Cooke" Training will help you boost your pay! Mail coupon right now for my Big FREE Book of Facts, Six Big Working Outfits I give you without extra charge. See the Lessons in pictures. Read the Big-Pay letters of other Cooke Trained Men. Get this Free Book. Send for it today. Then, right NOW, sign and mail coupon RIGHT NOW!

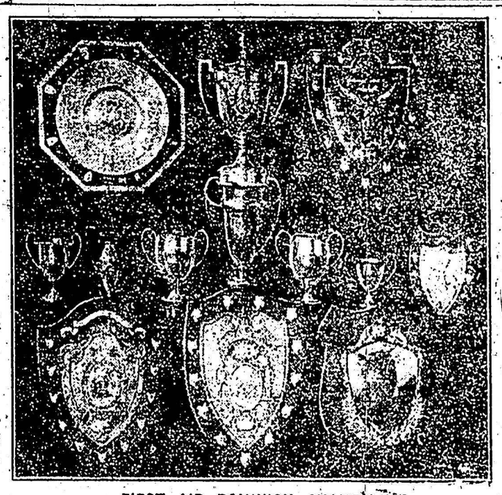
"The Cooke Trained Man is the Big Pay Man"



FIRST AID DOMINION CHAMPIONS.

This imposing array of trophies represents a clean sweep of St. John Ambulance First Air championships made this year by Canadian Pacific teams throughout the Dominion. The Dominion awards, also those in connection with competitions held within the C.P.R. system, were presented to the various teams recently in the board room of the company at headquarters in Montreal, in the presence of E. W. Beatty, chairman and president of the Canadian Pacific and a large gathering of officials, and officers of the St. John Ambulance Association.

The Humble Harmonica

In numerous schools all over Canada recently, the mouth organ (or harmonica, as it is often called) has been adopted as an integral part of the course in music. In vacation time the harmonica has been found in the playgrounds and recreation centres, providing not alone recreation and pleasure, but profitable pastime. On the street corners this same harmonica has supplanted the pair of dice, the dime novel and other mediums so long and loudly condemned by persons concerned with the reform and rejuvenation of the youth. In asylums and institutions for the maimed, the blind and the deaf, the harmonica has cast its rays of sunshine and given these unfortunately stricken little ones a new lease of life, all through the medium of self-expression of music. In Boy Scout work the harmonica has carved for itself a place as part of the standard equipment. We could carry on with countless more references to the part the harmonica is playing in the life of Young Canada to-day, but space will not permit.

Without solicitation, many national leaders have spontaneously spoken in highest and unreserved praise of the harmonica and what it is doing, not alone for the cause of music, but for the general welfare of the people at large. Hundreds of authorities and celebrities have been quick to voice their unstinted and hearty endorsement of this instrument, the pages of history of the harmonica movement are crowded with these tributes.

Many famous conductors, impresarios, bandmasters, prima donnas of the operatic and concert stage who have thrilled millions with their musical art, legislators whose logical and eloquent oratory have swung thousands of voters, leaders in industry, commerce and finance are to be found enthusiastically paying tribute to this little but remarkable musical instrument. Educators have been quick to sense the potential possibilities of the harmonica and have been responsible for bringing it into every system of education, believing there is no more advantageous music, and no musical development can have a permanent foundation unless it includes an accurate knowledge for the art and freely imparted desire for expression. Nor alone does it provide music; it gives the child an appealing incentive for music expression. It develops the child's ear for music and puts them on the path to a serious interest in the art, at the same time providing genuine pastime.

The harmonica opens the door of the child's heart and brain to music and paves the way for development of interest in the major members of the musical instrument family. Aside from all the remarkable attributes of this instrument, there is one outstanding fact; the harmonica is an important factor in the modern day when so much thought and attention is being given to the cause of developing interest in music.

Lure of National Parks

The unexplored regions of Canada's national parks are now more and more proving a loadstone to out-of-doors adventurers, explorers, and nature lovers. Every season brings news of some newly-explored area, attendant on the journeyings of individuals or parties seeking access to the hidden wonders of remote districts.

Feldspar Mined Since 1890

Feldspar has been mined in Canada since 1890, the greater part of the output being exported to the United States where it is used chiefly in the potteries of New Jersey and Ohio, and in the enamelling trades.

Minard's Liniment for Neuralgia.

Another strange one: The lad who romped through piles of dry leaves delighting in the resultant fusting and crackling sound has developed into the man who can't bear the sight of a solitary leaf on his lawn.

Xmas Mail

Post Early If You Expect Prompt Delivery. Everyone Leaves it to the Last

PACK CAREFULLY

The postal authorities are just as anxious to get your Christmas letters to their destination on time as you are to have them go. When everyone, here in Canada, in England, in the U.S. leaves their Christmas mailing to the last, the local mail is handled first, and so the mail from abroad is held up for later delivery. Last year letters mailed to the U.S. from Toronto for Christmas did not reach their destination until near the end of December. They were held at Buffalo until the jam cleared away. To get you to "do it now" the postal authorities issue this timely warning:

LAST MAIL TO GREAT BRITAIN BEFORE CHRISTMAS

The Post Office Department wishes to call attention to the fact that the last steamer which will deliver parcels in Great Britain before Christmas will sail from St. John on the sixth of December. Your last chance, you will see, is not very far away and you are urged to get your parcels ready and mail them in plenty of time to catch this boat. If you send them by an earlier steamer so much the better. Even supposing your friends do open them too soon, there is a special delight in opening those first Christmas parcels, particularly if one has to break through some Christmas stickers to get them open.

One more word—be sure and pack your parcels carefully so that they will stand the strain of Christmas mail conditions and arrive in good order. In addition to careful packing, several layers of strong paper are recommended for the outside wrapper. The address should in all cases be written plainly on the wrapper itself and not only on a label pasted on.

W. E. LEMON,
Postmaster.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers throughout the country not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion, break up colds and simple fevers, expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

LONDON STREET DEATHS

Total in English City Was 744 in Nine Months This Year

London.—Accidents in London streets during July, August and September cost an average of three lives a day, according to statistics issued recently. During those months there were 28,806 accidents, involving injury to persons and damage to property, in which 269 persons were killed outright or fatally injured.

During the first nine months of this year, 744 persons were killed in London street accidents.

Motor vehicles killed 347 persons in the streets of New York City during the first nine months of this year, according to statistics made public by the medical examiner's office.

Place-Names of P.E.I.

The first British survey of Prince Edward Island was made in 1765 by Captain Samuel Holland, an army officer who had fought at the seiges of Louisburg and Quebec. He named a large number of features after fellow officers, including Murray river after the Scottish General James Murray, governor of uebec, 1764-66.

Minard's Liniment for Grippe.

GAINED IN HEALTH AND IN WEIGHT

Now Gives All the Credit to Dr. Williams' Pink Pills.

When a young girl becomes pale, complains of exhaustion at the least exertion, has dizzy spells, headaches or stomach trouble, she should know that these are some of the many symptoms of anaemia, which means that her blood is thin and weak. In such condition there is the most urgent need for a tonic that will promptly restore the missing qualities to the blood and thus bring back health and strength. For this purpose there is no tonic can equal Dr. Williams' Pink Pills. Thousands of weak and ailing girls have found new health and happiness through this medicine. Miss Gladys V. Bond, Kentville, N.S., tried this treatment successfully, and says:

"I cannot praise Dr. Williams' Pink Pills too highly for the good they have done me. I was in a condition of very poor health, suffered from severe headaches and nervousness. My appetite was poor, and very little exertion would leave me tired out. On the advice of a friend I decided to try Dr. Williams' Pink Pills. In a few weeks I began to feel better, my appetite improved, and the headaches were less frequent. I continued the use of the pills until I had taken six boxes, by which time I felt as well as ever, and I gained in weight from 98 pounds to 114 pounds. For this reason I advise all weak girls to try this medicine."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Hospital for Sick Children

67 College St., Toronto 2, Ont.

December, 1927.

Dear Mr. Editor:—

Most of your readers are well aware of the wonderful service which the Hospital for Sick Children in Toronto is enabled to perform through the generosity of its friends. During the Christmas season the Hospital Aid Lady makes its annual solicitation for funds necessary to carry on the work throughout the new year. Now is the time to give tangible expression to the feeling of good will which "The Sick Kids' Hospital"—as it is familiarly called—has won for itself in every part of this province.

The immensity of the Hospital's task continually enlarges. In its little white cots there are always nearer three hundred than two hundred youngsters being tenderly nursed back to health and strength for every patient a dollar a day must be secured through voluntary contributions which last year totalled $166,000 for each year of the hospital's ministry.

Its service, however, is not confined to its own four walls. Note these arresting facts. The infant mortality rate in Ontario is 78.5, while in Quebec it is 142. In our towns and cities the loss of infant life is less than half what it is in the sister province. Now, for Ontario's priceless advantage, one outstanding reason is the maintenance by public benevolence of a world-famous provincial institution dedicated to the care of the on-coming generation. An entire department of the Hospital for Sick Children is devoted to the care of babies under one year of age. Here every aid which medical science can devise is extended to help the tiny patients through the first hard round in their struggle for existence.

Familiarity with the methods here employed is an invaluable asset to doctors and nurses enlisting for service in the homes of the province. Thus is the childhood of even the most remote community within the compass of the wide-spread ministration of the Hospital for Sick Children benefitted. It is indeed a work for humanity which deserves cordial remembrance at Christmas time.

Faithfully yours,
IRVING E. ROBERTSON,
Chairman Appeal Committee.

MINARD'S "KING OF PAIN" LINIMENT

Commercial Importance of Jack Pine

Although at one time looked upon as more or less of a "weed tree," the jack pine (Pinus Banksiana) today is of considerable commercial importance. The average annual production of jack pine (by any number is probably not less than 2,000,000 feet board measure, the greater part of this being utilized as railway ties. Some 30,000 cords are also cut for pulpwood and some 12,000,000 laths and 1,900,000,000 shingles are made each year.

Follow Fashions

Slim Waist, Boyish Figure, The 1928 Fashion in Hogs

With the change in American feminine fashion indicated in the following article, we in Canada must look to our laurels if the new style U.S. hog is to win Wiltshire export market.

Chicago.—Enter the era of the pork thirty-six in hogs. Milady pig of today is a hipless petite, wearing a slim boyish figure.

"The day of scientific nourishment warns us against overeating and universal reducing has made appetites scarce, so the wallowing gourmets also must go.

"So it develops the sows, sheats, and boars of the nation are being barbecued from the enormous flabby creatures in style in grandma's day to meet trim figures which now are popular when the Hitlerpigs go squealing to market.

Unimpeachable social, scientific and commercial authority that knows its hogs and stockyards explained this fact here recently, and the reasons. It is in accord with the development of the "kitchenette steer" a small compact animal to fit the modern indoor life which in the last two national live stock shows here has wrested the title of grand champion beef animal of America from the great old spreading creatures which always used to capture the highest award in the days when a roast was a roast and mother's family of ten ate off it for a week.

"There's the chief reason for the new type of pork," said Henry Carlson, in charge of all pork operations for Armour & Co. in its Chicago stockyards plant that is the meat capital for the world. He indicated a room full of spindle-legged, uncorseted and small-waisted girls who watch their calories.

"You can't feed these girls hog or lard unless you do a wonderful job of disguising it. They'll eat lean pig, but not fat. They are afraid for their figures."

"Also the changing style in hogs is partly due to the increase in the number employed in sedentary work," said Oscar Mayer, president of the company bearing his name.

"In the days when Americans plowed a couple of acres or felled a dozen trees daily with an axe, they ate lard and it did them good. But now when they ride swivel chairs and automobiles and get a brisk afternoon exercise balancing a heavy column of figures they cut the fat from their ham and pork chops and demand their bacon lean. It is obvious a new type of hog must be developed."

Taxis in Panama Have Flat Rate

In Balboa and Panama City, on the Isthmus of Panama, one may ride in a taxi for five minutes or an hour, and pay the same fare—25 cents a person. To one accustomed to New York cabs with their clicking, leaping meters, this comes as something of a shock. Despite the cheapness of their tariffs, however, these taxis of Panama are very comfortable.

The drivers, as a rule, Spanish, Panamanian or negroes, are always very courteous. Some of them have a scant knowledge of English, but all seem to be able to say "25 cents" or "two bits." They must of necessity be excellent drivers, for both Panama City and Balboa have narrow streets which ramble in all directions.

Will Study 110-Pound Chip Dropped by Iowa Meteor

Iowa City, Iowa.—A 110-pound chip from a meteor, sent hurtling earthward when the falling mass exploded in the air near Iowa City, has been taken to the laboratory of the University of Iowa for scientists to study.

They believe it is the largest meteorite, preserved intact, for which the date of fall is known.

The meteor probably exploded at a height of fifteen miles, says Professor Charles C. Wylie of the University of Iowa.

Four fragments were found, the largest chunk was buried three feet in hard clay and two men labored two hours to remove it.

The little girl had been visiting. When it was time for her to be going home, her hostess said: "Good-bye, Marjorie; you must come again soon. We should like to see more of you." "But there isn't any more of me," replied Marjorie.

Princess Mary Sets Approval On the Old-Fashioned Quilt

London.—Princess Mary has put her stamp of aproval on old-fashioned quilts and quilting bees promise to be a popular social function in England this Winter.

Mrs. Jane Heard and Mrs. Mary Pearson, wives of miners from County Durham, delighted Princess Mary with the marvelous old-fashioned quilts they were making at the exhibition of home crafts at the exhibition of the National Federation of Women's Institutes in the Imperial Institute, South Kensington.

The Princess especially admired some of the fruit patterns, and asked where they came from. The miners' wives explained that they were their own designs and had been handed down from generation to generation in County Durham.

A coalfield in York County has also "the rabbit industry" is growing by "leaps and bounds."

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven children and for the last seven years I have not enjoyed good health. I have taken Lydia E. Pinkham's Vegetable Compound for backache and nervousness and I feel now as if I am a new woman. I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 16 years old, has also taken it and will be happy to recommend it to all young girls."—Mrs. WILLIAM PARENT, Box 414, Buckingham, Que.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use.
