PREMIERS GREET NEW YEAR

Canada's Leading Citizens Voice Significant Opinions On The Turning of the Calendar

VISCOUNT CECIL TOO

Premier King

Ottawa.—Premier King issued the following New Year message:

"The dawn of 1928 has a special significance for Canada. It marks the close of one period in our history and the beginning of another. Let us bid adieu to the 60 years of armed peace. In this time we have built upon the foundations laid by the Federation and have extended the boundaries of the Dominion far into the seas. Forty years hence many living will join in the commemoration of the 100th anniversary of Confederation. The happiness of that day will depend in large measure upon our labors in the new year and in succeeding years.

"As a result of the deliberations of the past year, we understand more clearly than before the greatness of the task of building a Canadian nation. We know that the dream of Fathers of Confederation was realized without courage and perseverance. We know, too, that national unity in a country of different races and creeds is not achieved without charity and forbearance. The true wealth of Canada consists less in the abundance of our material possessions than in those moral qualities and habits of thought which have come down to us as an inheritance of all League of Nations societies. Their aims must be nobly maintained, as is that of the British League for Nations Union.

BUILDING UP PUBLIC OPINION.—"It is a great compliment to a few that you are an active member of the League of Nations Society in Canada which is seeking to build up a public opinion that may only believe in the League ideals but is actually willing to live up to them. In one of the cases of those who created the League I provided being their gifts, they built better than they knew." (Sqd.) W. L. MATTHEW, K. N.

Premier Ferguson

Toronto.—G. Howard Ferguson, Premier of Ontario, issued the following greeting:

"As head of the Government of Ontario, I congratulate the people of Ontario on the splendid year just ending, which has been evidenced during the past year. From every side there is the indication that the year 1928 will be one of unusual increase and prosperity for the province and for the Dominion. The financial situation is the best in the history of the natural resources and the remarkable expansion of the great industries of Northern Ontario, in a view to the settlement of non-legal disputes," continuing, naturally, the decision of federal questions.

"That is a wonderful lead to have given the province and it is very heartening to those who like to believe that the empire stands permanently subject to certain reservations, and also to study the means whereby the Government might be compelled with the consent of the people there a rapid development and greater leadership of new wealth which will add to the general prosperity of the whole empire and of the whole Dominion.

"The people of all Canada and especially those of our own province, will look forward with confidence to a larger year in 1928. I desire with everybody great happiness and a full measure of contentment, especially during the year that is now opening."

Premier Taschereau

Montreal.—P. L. Taschereau issued the following New Year message:

"The year just passed showed a year of prosperity for the Province of Quebec. The Federal Budget, however, reveals that the Federal population has grown and the number of students at all our schools now exceed, and the funds provided for education by the Government have increased, especially during the year that is now opening."

"The Minister of Highways has 1,200 miles of new roads repaired and maintained under his jurisdiction.

"The agricultural department, especially fruit, has had a budget in 1927 amounted to \$6,000,000. The value of interest is noted at more than \$15,000,000. The gross revenue derived from customs can be estimated at \$2,000,000."

"The Minister of Highways has presented a budget of the Ontario and Quebec Highways for 1928 amounted to \$6,000,000."

"The year has yet been noted for our fishing industry, although it is expected to be even more important than in recent years."

"Revenue from land and mineral taxes amounted to \$6,000,000."

"We expect important progress in the development of electric power in the mining industry."

"Our industrial development continues to increase, and we expect to provide for the capital necessary to meet the needs of the country."

"Our mining regions have received a great deal of attention and the last two months the government has been making a survey of the whole situation because we want to provide for the capital necessary to meet the needs of the country."

"During 1927, our population has increased above normal, traditions which source for it the admiration of economists everywhere."

"It is with all confidence that we salute the New Year and its influence upon us to work for progress."

Nova Scotia's Message

Halifax, N.S.—Lieutenant-Governor J. C. Terry gave out a New Year's message in which he listed a number of reasons why he believed the people of Nova Scotia should look forward to a prosperous New Year. Among them were the following:

"The favorable report of the Duncan Commission.

"The sympathetic attitude of other parts of Canada towards the Maritimes."

"The practical application of the recommendations of the Duncan Commission by the Federal Government."

"The quickened interest of the two great railway systems in Nova Scotia affairs."

"The move to stimulate tourist trade and to accommodate visitors and the spirit of courage and buoyancy which permeates to a very considerable extent the business interests of the country."

PARIS INSPIRED

1702

Sunday School Lesson

January 15. Jesus and Sinners, Mark 2: 1-17. Golden Text—I came not to call the righteous, but sinners to repentance.—Mark 2: 17.

SUBJECT.—THE SON OF GOD AT WORK, FORGIVING AND REDEEMING.

INTRODUCTION.—The amazing "authority" of Jesus now comes out in certain statements regarding forgiveness and the necessity of saving sinners. The religious teachers of the time admit that there was forgiveness with God, but that there were many conditions to this forgiveness, that in practice there was no comfort message to offer to the repentant. They insisted on all kinds of legal forms before a sinner could hope in God's mercy. Jesus turned the tables upside down, taught that whatever the sorrow for sin, God's forgiveness was assured. Moreover, while the religious teachers of the day waited for sinners to come to God of themselves, Jesus went out in search of them. He mingled with them and strove to bring them, in their stirrings of a better life, to compare himself to a physician whose work lay among the sick, not among the strong.

L. THE FORGIVENESS OF SINS, 3-12.

J. CO. V. 3. Jesus is preaching in a house in Capernaum when the incident now described takes place. The room, which is the first, is crowded, and the entrance and stairway are so blocked that no one can pass either in or out. At this moment four men appear carrying on a stretcher a paralytic man. For the moment, they are indolent as there is no access to Jesus by the ordinary way.

V. 4. Determined not to lose this opportunity, they resort to the extraordinary expedient of getting up on the roof, probably from the rear, and lowering the paralytic through an aperture made in the tiles. The plan is successful, but the man is carried out in spite of his unskillfulness and silver metal shoulder straps extend around the deep open neckline at the back. The skirt is made in three tiers with the selvage used for the edge of each tier, and loose hanging circular panels with pointed edges furnish the new sidefulness to flatter to dance times. No. 1702 is in size 16 years, 36, 38, 40 and 42 inches bust. Size 36 requires 63 yards 36-inch, or 5½ yards 40-inch material, and 5½ yards 40-inch lace banding. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of your pattern as you want. Enclose 20c in stamp or coin (coin preferred); wrap it carefully for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adams.

May Seize Mines For Tax Arrears

Ontario Government Issues Warning to Affected Owners

Toronto.—In an effort to secure the payment of tax arrears amounting to more than \$200,000, the Ontario Government may declare forfeited and repossessed in the Crown the mining rights in 60,000 acres of lands in Northern and north-western Ontario. Northern and north-western Ontario, Northern Ontario, the Federal Government has already published in the Ontario Gazette, and the owners affected are advised to take advantage of the six months period allowed them to pay up the amounts owing.

It is seven days since the Province through the Department of Mines, last resorted to a policy of general forfeiture to collect tax arrears. The tax for which a number of claim defaults is the one of six cents each acre imposed upon all lands which are held as an undivided state.

Legislation Discussed

The general legislative program for electrical power was discussed at the Cabinet Council meeting and ministers relating to "mines and minerals" in various departments were invited to participate.

Survey Being Made

"The expenditures on roads have not met by the city guess from the traffic," said Mr. Prentiss. The department has been making a survey of the whole situation because we want to provide for the capital necessary to meet the needs of the community.

"Our mining regions have received a great deal of attention and the last two months the government has been making a survey of the whole situation because we want to provide for the capital necessary to meet the needs of the community."

"During 1927, our population has increased above normal, traditions which source for it the admiration of economists everywhere."

"It is with all confidence that we salute the New Year and its influence upon us to work for progress."

"The favorable report of the Duncan Commission.

"The sympathetic attitude of other parts of Canada towards the Maritimes."

"The practical application of the recommendations of the Duncan Commission by the Federal Government."

"The quickened interest of the two great railway systems in Nova Scotia affairs."

"The move to stimulate tourist trade and to accommodate visitors and the spirit of courage and buoyancy which permeates to a very considerable extent the business interests of the country."

JUST FIDDLING WITH IT

"I've broken my violin again."

"How?"

"Just fiddling with it."

The next world war, say the economists, will be with insects, and it will certainly look queer to the howlers flying eight-inch moths.
