Sunday School Lesson

April 1. Lesson I.—Jesus the Suffering Messiah. Mark 8: 27-37. Golden Text—Whoever will come after me, let him deny himself, and take up his cross, and follow me.—Mark 8: 34.

SUBJECT: THE TURNING POINT IN THE MINISTRY OF JESUS CHRIST. I. WHAT IS REQUIRED OF THE MESSIAH'S FOLLOWERS, 27-37.

INTRODUCTION.—We come here to the central event in our Lord's ministry. It is a turning point in his life. He had hitherto been a public teacher, but now he is about to die for the redemption of the world. The disciples are to be prepared to follow him in his death.

V. 27. The city of Caesarea near which Jesus asked his memorable question, "Whom do you say that I am?" The answer, "Peter, Thou art the Christ," was hailed by Jesus as a notable sign from God. It showed that the disciples had begun to understand the mystery of his death.

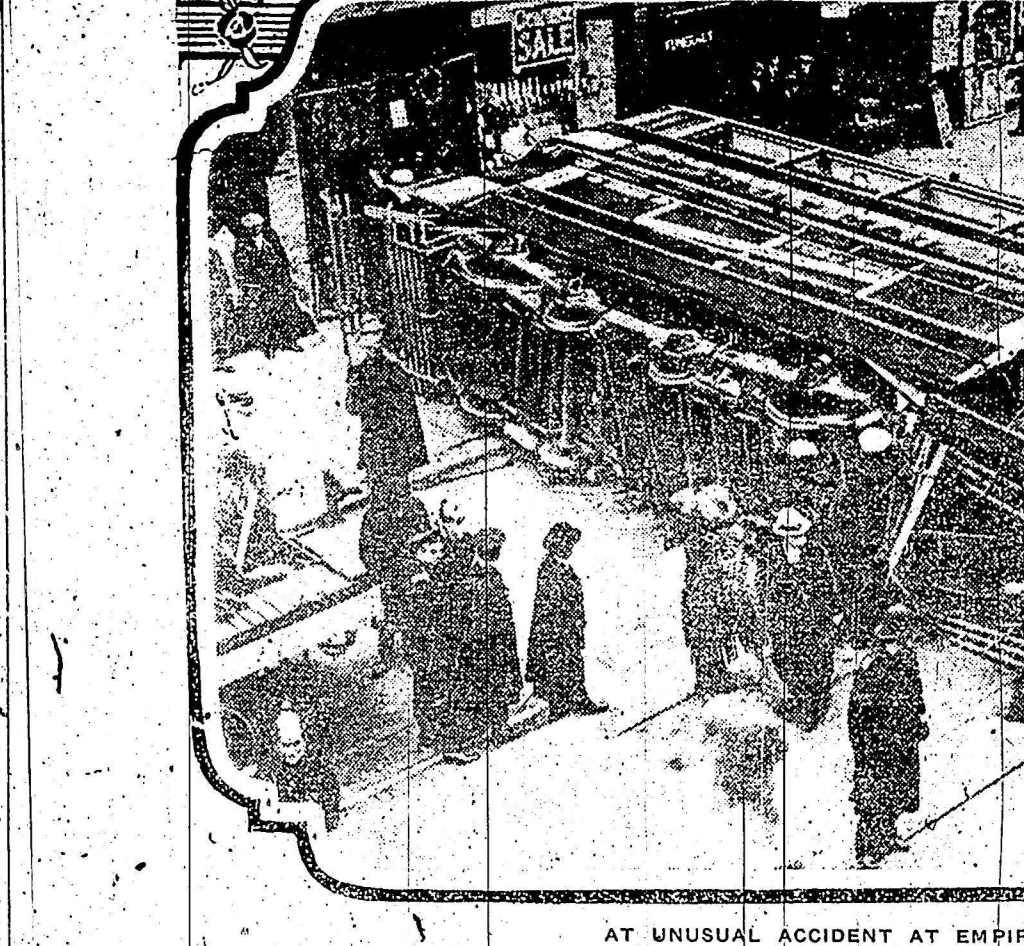

V. 28. Jesus' first question related to the public baptism received by his ministry. The answers quoted show that the Galileans were sufficiently conscious of a mystery in Jesus' personality to wonder at the ordinary and the normal. But they had not interpreted this to mean that he was the promised Son of David.

V. 29. Jesus now turns to the inner circle of the Twelve. "Whom do you say that I am?" Peter's answer shows how much more deeply than the ordinary public the disciples had felt the religious greatness of Jesus. They had come to believe that he was the one person in whom the Father had placed the Father's love.

V. 30. Peter's answer was therefore absolutely epoch-making. Jesus' words were even more significant to him from God. Yet his immediate answer is to "rebuke" or "censure" the disciples. "Why? Because you are the world's leaders, without qualification, without a deeper understanding of its meaning than was currently possessed, would be to start all kinds of false and irreligious expectations among the people. They would expect a Messiah who would seize the crown and head a national movement, Jesus had far other thoughts of what it meant to be a Messiah. Peter: "Thou has no mind for the things of God, but only for the things of men."

Doctor: "You are run down—no violent exercise—what are you?" Patient: "I am an anarchist." Doctor: "Then don't throw any bombs for a week or two."

London Has a Smash

AT UNUSUAL ACCIDENT AT EMPIRE'S CAPITAL. Train took a tumble and 20 people were injured in London when a train from Tooting to the Embankment left the rails at Belham High Road and turned over.

Collection Transferred. During the present year the Committee of the Royal Artillery Institution, who have charge of the Rotunda, were approached with a view to transferring their specimens of the Rotunda, which is not easy of access to the Tower, where they would be seen by large numbers of the general public. This transfer was agreed to, as the Royal Artillery Institution have rightly considered that in this respect they are trustees for the public, and that the education of the public in the best and most convenient manner is of the first importance.

Only Recent Additions to English Store Gained by Transfer From Museum. While the other national collections are year by year enriched by the acquisition of works of art and historical specimens of great value, the armories of the Tower of London, for various reasons, have remained stagnant for a considerable period.

Of later years the fantastic pieces given by American collectors for armors and weapons have proved competition in this respect quite impossible, and the magnificent armors of the Earls of Cumberland and Pembroke, made in English workshops by the great master Jacob Halder, of Greenwich, have been allowed to languish in the Tower. It is now proposed to transfer to the King's Museum at Windsor in 1914.

Other Rare Examples. The actual provenance of the Rotunda armor is of the sixteenth century. It is a complete suit of armor, and is of the type known as "the armor of the Earl of Cumberland." It is a masterpiece of the art of armor-making, and is of the highest quality.

HOW TO ORDER PATTERNS. Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred) wrap it carefully for each number and address your order to Pattern Dept., Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

The Prince of Wales Enjoys a Bout

PRINCE CHARMING AT THE RING SIDE. The Prince of Wales is an ardent "fight fan." He is shown here watching the match between Len Johnson and Jack Hood for the British championship. In the circle at the right, Hood is seen forcing the fighting.

Britain Honors Italian Doctor

do Castellani Wins Knighthood for Researches in Tropical Diseases—Now Associated with Turin—Served in British Colonies

Distinguished service rendered to the British Government in the field of tropical diseases has brought the honor of knighthood to Dr. Aldo Castellani. Though an Italian by birth, Dr. Castellani has devoted the greater portion of his life to work in and for Great Britain.

Almost since the beginning of his career Dr. Castellani has specialized in tropical diseases. His researches in this field and his knowledge of the habits and life of the various insects attracted attention a few years ago, and he was persuaded to establish a school of tropical medicine under the auspices of the University at New Castellani, Italy. He spent only six months of the year on this side of the Atlantic, starting in London for the remaining months. For the last two years Dr. Castellani has been in training in the school and adding the French language to his already extensive command of Italian.

Dr. Castellani was born in Florence in 1874. He has maintained a double nationality to the land of his birth, and his mother was English. He received his medical degree in Florence and went to the University of Padua for post-graduate work. In the laboratory of the old Padua Institute he followed his interest in the study of the life of the various insects which develop in the tropics. His love of England, which he had formed part of his education, and the opportunity that its schools had to offer, drew him to London, where he was attached to the Royal Army Medical Institute. He spent two years in the School of Tropical Medicine. It was while in the service of the British Government in India, where he was stationed in the provinces of the Punjab, that he first became acquainted with the life of the various insects which develop in the tropics.

More Speed Yet. Commander Byrd Predicts 500 Miles An Hour For Planes. Commander Byrd, who has just returned from his expedition to the North Pole, predicts that within a few years planes will be able to travel at speeds of 500 miles an hour.

Writing a review of the book "The Mirrors of the Year," published by the President, A. C. S. Byrd predicts for the year 1922 a "miraculous" development of the airplane. "That we shall have a machine which will be able to travel at a speed of 500 miles an hour is not a matter of mere possibility, but a matter of fact. It is a matter of time."

After all the airplane has an inherent advantage over all other means of transportation. It is fast, it is reliable, and it is dependable. It is a machine that is capable of doing more than any other machine. It is a machine that is capable of doing more than any other machine.

Commander Byrd says that by June, 1922, we shall have 8,212 miles of air lines, some of which will be operated by the Department of Commerce, and others by private enterprise. At least four times daily by day mail, passenger and express planes. Airports, emergency landing fields, intermediate bases, and other facilities will be established. It is a matter of time before we shall have a world-wide air service. It is a matter of time before we shall have a world-wide air service.
