Cute in a Baby—
Awful at Three
—and it's Dangerous
by Ruth Brittain

Thumb sucking does look sweet in baby, but it is disgusting in the three-year-old and sometimes it hangs on for years—say fifteen! The habit may cause an ill-formed mouth or induce malocclusion, and it always interferes with digestion. Pinning the sleeve over the hand, stretching mittens, or putting on cardboard cuffs which prevent bending the arms are some of the ways to stop this habit.

The thumb-sucking habit—irregular in bowel movements—is responsible for weak bowels, and constipation in babies. Give the thumb a rest, an opportunity to act at regular periods each day. If they don't act at first, little Fletcher's Castor will soon bring them. Every mother should keep a bottle of this handy to use in case of colic, diarrhea, gas, loose stools, constipation, etc., loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bones.

Castor oil is purely vegetable, and delicious—the recipe is on the wrap and box. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for "Castor Oil" Fletcher's signature on the wrapper so you'll get the genuine.

Chinese Armies Open Offensive

Yenchowu Invested by the Nationalist Troops, Says Gen. Chiang Kai-shek

Nanking, China.—The leading offensive of the Nationalist armies, with Peking, ancient capital of the Manchus as its goal, has got under way with a rush.

From the theatre of war stretching 500 miles southern tip of the Province of Shensi to the coast, where almost three-quarters of a million men are in arms, comes the first word of fighting an official communiqué from Nanchowu, Nationalist headquarters, reporting the capture of two important key cities in southern Shantung. The communiqué sent from the headquarters of Chiang Kai-shek, National Commander-in-Chief says that Yenchowu on the Tientsin-Pukow railway line and Ichowu, on the Li Ho, in southeastern Shantung, have been invested by the Nationalist armies. Yenchowu is approximately 70 miles north of the battle line which, at the beginning of the spring offensive, on April 7, while Ichowu is about 35 miles north of that line.

Shanghai.—With the advent of the long-talked-of Nationalists' offensive against the north, in which probably 750,000 men will be engaged, has opened on a 400-mile front a rapid advancing.

Minard's Liniment for Insect bites.

Mother (seeing her daughter off to service for the first time). "Now, mind you, do as little as you can, eat as much as you can, and if you don't like it come home."

The Harley-Davidson Single Cylinder motorcycle is the greatest little machine that has been made. See it to see its compact and most economical. Stands without rival. 100 Miles to Galion, of Cleville, Ohio. Payment \$105. Balance \$25 per month for ten months. Price \$305. Walter Andrews, Limited, 346 Yonge St., Toronto, Ont.

FRENCH RECOGNIZE DISCOVERY.

"And the scholar concludes in the letter he wrote to me:

"Plato's Atlantis was not a mere fancy tale, his report did not hint at Southern Spain, but the 'Sea of the Atlanteans' is the 'Rhe' Atala,' the Tri-Sea of Diodorus, and the nowadays almost dried up 'Shot-Djerev.'"

"Now there was still one question: Would the French, in whose colony this place lies, recognize the discovery?"

"There were days full of worry for the explorer till the director of the archaeology department of Tunis arrived.

Borchardt explained to him his view of the matter, showed him everything, and—the great moment came.

Professor Pointet recognized Borchardt's discovery unequivocally, and reported to the authorities in Berlin that the excavations could start next fall!

"There is no doubt Borchardt found the place where once a huge city stood, and we shall hope so, the fifteenth of February, 1928, will be to posterior the day when Borchardt stood for the first time on Plato's circular barge, it will be a day of glory in the history of archaeology; and perhaps it will become possible to bring Atlantis back to daylight, just as the German scholar Schliemann brought Troy back to our eyes some decades ago."

German Reports Finding Atlantis, Legendary Land

Plato's Description Declared
Borne Out by Remnants
of African Settlement

Region Covered by Relics
French Recognize Discovery
by Dr. Borchardt

Berlin.—Paul Borchardt, a German scholar, believes that he has found the Lost Atlantis, of which Plato writes and which is thought to have disappeared about 1300 B.C.

For hundreds of years scholars have argued as to whether this country really existed or whether it was merely a myth started in ancient times. Plato got his account of the destruction of Atlantis from Solon, who was told of it by the priests of Neith, the guardians of the veiled image of Saad in Egypt.

DISCOVERIES DESCRIBED.

Dr. Arthur Berger, in the "Tagblatt," gives the following account of Dr. Borchardt's discoveries:

"Schools have tried in vain to determine the place where [Atlantis] sank into the sea. Tremendous amounts of earth were dug up, and the sea was sounded in vain, till finally the German savant, Paul Borchardt, put forth the hypothesis some years ago that Atlantis ought to be looked for somewhere near Golen, the north of Africa. Again the quiet scholar's theory has eliminated any possibility of land being found on a direct route from Alaska to Spitzbergen.

Captain Wilkins' therefore planned to swing to the right on his crossing of the Arctic Ocean and thus reach the area in which 'Croker Land' was thought to exist. This was the land that Peary thought he saw from the north end of Grant Land. It was the region which MacMillan sought to penetrate some years later. It is the area into which Noble has announced that he intends to take his dirigible. It is popularly known as the 'blind spot' in the Arctic. The scientist would call it the unexplored border of the Continental Shelf northwest of Grant Land."

"Here in the relatively shallow border of the Arctic Ocean, the chance of finding land has been thought to be greater than in other parts of the Arctic where deep soundings have been reported. Wilkins' flight has at last cleared up this area as well as several other areas north of Greenland, except for the shallow border of the Arctic off the long coast of Siberia, or a small extent may be expected to be found in the Arctic Basin by further exploration. Captain Wilkins' expectation thus had entirely scientific objects. At no time did he plan to fly over the Pole, unless he drifted in that direction as a result of quartering winds."

"It's a coincidence or a change of the old name which nowadays doesn't fit any more? There is no water any more in these ditches. For thousands of years the earth has invaded this region, where formerly the sea alleys or ditches were known to him; the hill in the center, which he called Kali Galil, which means water-heber [lagoon]. Plato writes 'water-water'."

"Shanghai.—With the advent of the long-talked-of Nationalists' offensive against the north, in which probably 750,000 men will be engaged, has opened on a 400-mile front a rapid advancing.
