A Girl's Bedroom

Every girl should have a room of her own, almost as soon as she has passed beyond babyhood days. No matter how congenial and well-loved one's family may be, a place all one's own is necessary to health and growth of soul.

Lillian Montagne, in the current is sue of "Your Home Magazine," gives some useful advice on the problem of decorating a girl's room.

"In planning a girl's room," she writes, "avoid the excitement of vivid red and the depressing effect of a preponderance of purple, dull gray, brown or black. There is a quality in young girlhood which responds to the delicate pastel coloring of spring. The faraway, misty blue of the sky, the ender green of the opening leaves, he pale yellow of the early crocus, the faintly roseate tint of the arbutus. the pinkish lavender of the lilac-any of these shades, used either singly or in combination to decorate the room of y jounne fille will awaken in her a quick response to the grace and beauty which they express. Painted walls are particularly desirable for bedrooms, because not only are they more sanitary but they may be easily and artistically tinted to harmonize

with any color scheme you may select. When the walls are finished, paint or enamel the trim the same John Ainsley, a man of education only go to the chair once. You give and breeding, becomes a master crook me your, word within ten_seconds, or preying upon other thieses. In a l'll kill you."
