on Enormous Blimp
about Half Completed
in England

OBLEMS CROP UP
Generated From Five
dependent, and De-
tachable Units

The Shape of a great
when as vast as any yet
open the size of pyramids,
high plate, making the finish-
ishes to a grotesquely giant
size, all ribs and made
the lightest of metal is the im-
one obtained from an inspec-
R. Col., the largest airship
in Great Britain, which
is in construction.

It has been
designed for a
climate here is salubrious, isn't it?
Native—that's a new bit o' swear-
ing, Master. It's been called every-
thing else.

You may reasonably expect a strong
friendship between two girls to last
as long as two weeks provided the
same man doesn't take to going with
both of them.

When a woman says she hasn't any-
thing to wear, that is, of course, an
exaggeration, but not much of one.

Uncle—Well, my boy, you look per-
sive. What's on your mind?

Bobby—I was just wondering if a
was landed on a nettle, would the
was stinging the nettle or the nettle
sting the wasp?

Opportunity sometimes has to kick
a man before it can wake him up.

WHERE'S THE OTHER MAN?
Two Aborigines were brought before the Police Court for being drunk
and disorderly. During the hearing of
the case the Native asked the Prose-
cutor: "But where's the other man?"
"What other man, sir?"
"The man who paid for the drinks!"

If you think men or horses still
observe how few now sit on the front
veranda without their shoes.

The low price of hogs never affects
the high price of hog meat.

It's easy to find your way into
trouble—the hard part is finding the
way out.

I would like you to paint my wife's
portrait."

"In oil?"
"Yes, but it might be more like her,
perhaps, if you added a drop of vine-
gar."

Just Married: "This steak tastes
queer."
She: "I can't understand it, dear,
but turned a little, but I rubbed vase-
line on it right away."

BETTER LATE THAN NEVER
Abed: The wind is rising; we must
hug the shore.

Mabel: Maybe you will have nerve
enough for that.

Some worried young man writes the
heart editor imploring her to send
him a formula for proposing marriage,
but we imagine a young man of that
kind might just as well save his
breath.

THE SECOND SALE
To sell a man once—is a small affair.
Not a matter for very much crowing.
And will not, in the course of a full
business year.

On your books make a very good
showing.

But to sell him again is a far different
thing—

Which he comes back for more, it's
a token
That a service is good, and you've
made him your friend;
Sell him twice, he is yours—years
unbroken!

Eloping Bride—"Here's a telegram
from paper!"
Bridalroom: (eagerly)—"What does
he say?"
Bride—"Do not come home and all
will be forgiven."

If you will, you can make light of
your darkest trouble.

A reputation of over thirty
years is at stake every time a
package of Red Rose Orange
Pekoe Tea is sold. So highly
is this reputation prized that
the makers have authorized
your grocer to replace any
package free of charge that
does not satisfy you in every
particular.

I love the thrill and the contest
and the adventure of life.—Ottie H.
Kahn.

Canada and the Empire
Toronto Saturday Night. (In an
editorial, the Post of Calais, Queens-
land, rebukes Canada for being selfishly
indifferent to the importance of the
Suez Canal to the Empire and especially
to Australia.) Canada has of late
frozen herself in wrong in more quarters
than one and seems to have quite
ineffectually managed to become the
representative of Egypt.
On his visit to this country last year, Hon. Stanley Bruce,
privately made it clear to many public
men how deeply his Commonwealth
was concerned in the maintenance of
a firm Egyptian policy which would
ensure security to the Suez trade
route. The misapprehension with regard
to Canadian sentiment on this question
is probably due to the ceaseless and inconsequential chatter about
our "status" which does not in any
degree represent intelligent opinion
in this country. These vapors seem
likely to get us in bad odor with our
best friends in the world at large
and the sooner they cease the better.

WAS VERY DELICATE This Rot About the Modern Boy!

New Health Came Through
Using Dr. Williams' Pink
Pills

Mr. Capo Miller, Lourdes, N.Y.,
says that twice in her lifetime she
has reason to be thankful for what
Dr. Williams' Pink Pills did for her.
She says: "I was a very delicate
girl going to womanhood, when I
first found benefit from Dr. Williams'
Pink Pills." I was a sufferer with
cramps and pains every month and
was hardly able to move around at
all. One day when I was very sick a
friend came in to see me, and she
said to my mother, 'Why not try Dr.
Williams' Pink Pills? I know they
will do her a world of good.' The
result was my mother got six boxes
of them and I soon found benefit
from them. By the time I had taken
them all I felt an altogether different
girl and no longer suffered from
cramps and pains.

Then a few years ago I was at-
tacked with influenza and was sick
for six weeks. Again I started taking
Dr. Williams' Pink Pills, and again
they brought me good health. I am
the mother of a family and do all my
own work, so you see I have to keep
in good health, and depend upon these
pills to keep me so. Now I always
recommend Dr. Williams' Pink Pills
to any of my friends who may be sick.

If you are suffering from any condition
due to poor, watery blood, or weak
nerves, begin taking Dr. Williams'
Pink Pills now and note how
your strength and health will improve.
You can get these with through any
dealer in medicine. Or at 50 cents a
box from The Dr. Williams' Medicine
Co., Brooklyn, N.Y.

"Natural reaction," says this friend,
"you cannot expect anything else."

Now I am not going to pretend—I
never was much of a pretender—but
that there is not some justification
for this and similar sayings. The long-
haired, narrow-chested, humbly-pamby
society does really exist, and a nasty
creepily-crawly sort of young animal it
is. But this young animal exists only
as a very small minority. You will
find a few of him in London, and a
few more possibly at the universities.
But such young animals do not repre-
sent—the Lord for it—our mod-
ern boyhood, which is maintained

Such creatures are only the scum
which has floated to the surface dur-
ing a rather queer spell in our na-
tional history. They get a good deal
of publicity—ah, freaks!—get a good
deal of publicity. They are only
freaks, however—only, as it were, the
mutts on Great Britain's marching
boots.

And you must not be misled by this

minutiae if you would judge the future
men of our race.

I know many such future men of
our race. Nor am I in the least posses-
sive when I compare these with the
boys of my own boyhood some five
and twenty years ago.

There are two young
infantry, for instance, subalterns of
twenty-one respectively, with whom I
went out dancing the other night. As
to a pair of hats as you could meet.
And a night or two later I fell in
with a boy of twenty-two, who is con-
ducting a great business single-handed
and very nearly tripped me over a

question of national finance.

The memorandum prints out that
today there are round about 100,000
motor vehicles in South African
roads, and that these require about
40,000,000 gallons of petrol to say nothing
of lubricating oils. These figures
are continually increasing and the
problem of a cheap local supply
which will make the country indepen-
dent of foreign importations is an im-
portant one.

In his memorandum Dr. Meyer
discusses three sources of motor fuel—
oil shales, industrial alcohol and
coal. The oil shale deposits in South
Africa are relatively small and can
not by themselves offer a solution to
the problem, though they are important
as a contributory factor.

The only raw material so far direct-
ly available, and which has been
technically used on a commercial
scale for the production of oil
products as well as industrial gas
and coke of varying qualities. The
present annual production of coal is
14,000,000 tons, and almost all of this
is burned and the valuable by-pro-
ducts lost and wasted.

technically used on a commercial
scale for the production of oil
products as well as industrial gas
and coke of varying qualities. The
present annual production of coal is
14,000,000 tons, and almost all of this
is burned and the valuable by-pro-
ducts lost and wasted.

The report discusses in detail the
modern processes of treating coal,
particularly those from which motor
oils are obtained, and the opinion is
expressed that most of these could be
adapted to meet South African
requirements. The value of the various
other by-products is also stressed and
some possible markets are outlined.

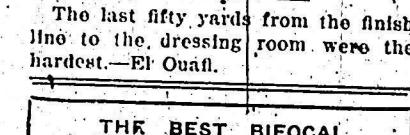

The establishment of an iron and
steel industry at Pretoria should en-
able a start to be made in this direc-
tion. One of the important recom-
mendations made is the establish-
ment by the Government of a fuel re-
search institute.

Are You Ready

When your
Children Cry
for It

Baby has little speech at times. All
your care cannot prevent them. But
you can be prepared. Then you can
do what any experienced nurse would
do—what most physicians would tell
you to do—give a few drops of plain
Castoria. No sooner done to the baby
is soothed; relief is just a matter of
moments. Yet you have spared
child without use of a single doubtful
drug. Castoria is vegetable. So it's
safe to use as often as an infant has
any little pain you cannot put away.
And it's always ready for the cruelest
pangs of colic, or constipation, or diarrhea;
effective, too, for older children.
Twenty-five million bottles were
bought last year.

Can anybody remember when the
times were not hard and money not
scarce?—Ralph Waldo Emerson.

Minard's Liniment—Universal remedy

For the eyes, nose, ears, throat, skin
and mucous membranes.

It is a great divine that gives
