Eighty Attend Shower For Miss Jacqueline Beatty

A very pleasing social event took place when about seventy-five of eighty friends and neighbors of Miss Jacqueline Beatty, only daughter of Mr. and Mrs. W. J. Beatty, gathered at her home on Wednesday evening at last week.

The L.O.L. of Orange Valley have for many years found good friends in Mr. and Mrs. Beatty and they embraced this opportunity of showing their appreciation of the willing helpfulness of Jacqueline on many social and other occasions, by presenting her with a beautiful marble table clock.

The occasion was presided over by Mr. George Littlejohn and the presentation made by Mr. Wm. McFadden. Following this a delightful dinner was served. Two large baskets, prettily decorated with white tissue paper and heavily laden with gifts was carried in by Mrs. John Eagles and Mrs. George Littlejohns. Miss Beatty read the accompanying verses, and was assisted in unwrapping the presents and placing the gifts on display by Misses Lillian Hill, Mildred Thibodeau, Myrtle Freeman and Miss Ottewill. There were many beautiful articles, among them being silverware, cut glass, aluminum ware and cheques.

Miss Beatty expressed her thanks to all in a very nicely worded reply. After which all joined in singing "For She's a Jolly Good Fellow." The evening was pleasantly spent in social conversation, games and music by an orchestra composed of Messrs. Clarence Alex with violin, Willis Cockburn with guitar and George Littlejohns on mouth organ, accompanied on piano by Mrs. W. Alcox.

Before dispersing a delicious lunch was served.

Her husband, who predeceased her four years ago October, was a son of Mr. John Gibson, of the village of Markdale, and was a nephew of the late Mr. John Gibson, of Markdale, who her parents, Mr. and Mrs. W. J. Beatty, reside.

The sympathy of many goes out to the orphaned family of five sons and a daughter, the oldest being about 14 years old. The late Mrs. Gibson was a kind and loving wife and mother and when living here was a member of Cooke's Church.

Henry Piper Died Suddenly on Saturday

The citizens of this community were greatly shocked when the news became known that Mr. Henry Piper had passed away about 3 p.m. on Saturday, November 24th, at his home here, after only about two days' illness, death being due to Yraemia. Dr. Carefoot of Markdale was called on Friday morning, and, not improving any early Saturday morning, Dr. B. Jamieson of Durham was called, but to no avail and he passed away on Saturday afternoon.

The deceased was born about 74 years ago and lived practically all his life in this community. About eleven years ago he moved from his farm to the cosy home, which he built in this village. He was a kind, large hearted neighbor and a friend to all, and was held in the highest esteem by a wide circle of friends and acquaintances who regret to learn of his passing. FINDING THE BREAK in the line is not the difficult part. It is to find it at the right place. The trouble-shooter must be able to find the break in the line, not only in the line, but in the cable. Today there are delicate instruments which can locate the spot within a few rods in an office many times away.

It is a common mistake to think that there is a break in the line between Toronto and Markdale. In fact, the break is in the cable. If you can imagine yourself fingering those wires at two o'clock of a stormy morning you will realize how good the trouble-shooter has to be at his job.

THE TROUBLE-SHOOTER has to do the actual job and it means more than using tools or fancy electrical weather. It calls for very high technical skill.

Big cables are simply lead containers holding hundreds of tightly packed wires, each fine as a hair. When the cable is burnt out for a stretch, or is opened, there is a fine looking mess. It looks like the stuffing of a hair mattress.

Each of these hundreds of fine wires has to be connected again to its mate in the other half of the cable. If you can imagine yourself fingering those wires at two o'clock of a stormy morning you will realize how good the trouble-shooter has to be at his job.

STORMS COST MONEY as well as discomfort. The telephone system has over 675,000 miles of wire strung on poles stretching across 23,000 miles of country and every storm hits some part of the system. A big storm can do a great deal of damage.

Steel has cost the telephone company as much as a million dollars in one year. Sometimes one storm means spending more than \$100,000 without delay.

There is no time to call the directors together. The job has to be done and the money must be spent.

The money is ready because the telephone company has followed a policy of making definite provision for such emergencies.

And the job is done because the telephone business has men and women, like the trouble-shooter, alive to the meaning of service and eager to keep the telephone in the front rank of Canadian progress.
