

The TATTOOED TIGER ARM

Isabel Ostrander

"Good! Take a train around seven tonight and I'll phone when your cue comes." Miles attended to the cheque and they rose.

"I was almost dinner time when he rang. Bookie had instead of returning at once to the Drake's he had a call at a neat, old-fashioned cottage near the village.

Carter and Pierre were hurrying about the kitchen busied with the serving of dinner and as he passed the door he saw the room. Scottie beckoned imperiously, but Miles waved an emphatic dissent and hurried up the back stairs.

At the first landing, he came upon Hilts.

"Roger's condition hasn't changed, has it?"

"No, sir. I don't know," will be any harm if I do leave him? She answered, "I'll be right back before the family leaves the table."

She scuttled off downstairs and Miles softly entered the sick room and took the chair beside the bed. He heard a door open and a woman's voice.

"Drake! You can't leave him here! The eye which had turned eagerly toward him at his first word closed wearily, gratefully, and then opened.

"I meant what I said yesterday, Miles. I'm not being huffy and mean but I must be silent, the one whose name I tried to tell your brother yesterday. I know, I guessed—but I must have your assurance that I am right. The man you fear, the man who can bring you and worse upon you all—this fellow must be closely over the shoulder from behind a name."

"This was a pregnant pause while Drake's eyes seemed to dilate. He looked at Miles, incredulously, the hand on his forehead.

CHAPTER XVIII.

"What do you mean for you?" Miles exclaimed when Miles came down. "Pick Kemp has found who he is, but he's not ready to tell. When Rip told us of meeting him in the garden? Last night he came again and Dick frightened him away, but not before he'd discovered the spot they were after. When they got to it tonight, but he was to get rid of the lad—"

"That's only the last link in the chain, anyway, but it will be best for him and his little side to be far from this house later tonight."

"When young Dick meets you tell him to mark his grip and wait with the same of in the back road till I get to his hide."

Miles was passing through the hall when Andrew Drake emerged from the library humming with exasperation.

"Confound that pottingger! What!" he explained to Miss Drake. "This coming down on the ten o'clock train tonight and insists that I meet him at the station. Wants a private car."

"What!" Miss Drake warned and rushed up the stairs. Andrew gratefully following.

Miles turned Patricia appeared in the door of the music room.

"I heard she whispered, "Oh, Scottie, why is Mr. Wells coming now? Where have you been all day? When is all this dreadful suspense going to end?"

"Tonight for you, my dear young boy," the detective replied. "I want you to keep away again now tonight. Mr. Kemp will be waiting for you on the train. I'll be in my car in an hour and you must take your traveling case and slip out and join him. He will keep in touch with me and when he comes back in a few days it will be to find that all the trouble has passed."

She held her hands out to him.

"Oh, I had always had faith in you, but when I was King a night ago, you have found the terrible old man who tried to have me abducted and the man with the tattooed arm."

"He will never cross your path again," Miles replied earnestly. "One thing more: nobody was your own safety now in question, but that of your people also."

It was midnight when Miles and Scottie, equipped with shovels, set to work with a will and soon had a hole wide open in the floor of the summer house.

"I've struck something, lad," Scottie announced in an unconsciously lowered voice.

Miles slipped down into the excavation, took a look and felt about with his hands.

"Mashiners!" Scottie exclaimed. "But at you're taken as though it's been crushed with a sledge-hammer!"

"Our friends hoped it would be in better condition, I think," Miles replied. "Can you guess what it is?"

"It's a wee printing press, though I own I've had that in mind since you took the counterfeiting bill from me," Scottie shook his head. "If I had a chance to try to assemble it, now?"

"You're close enough to the truth, old man," Miles wedged down the hole once more and began heaping the boards back upon it. Put the boards back on the hole as well as you can and follow me."

Scottie obeyed and the two walked to the road where a machine had halted. With its three grimly business-like occupants the briefest of greetings were exchanged.

"You understand, boys, that you're on a confidential case, and as such I'm just by accident," Miles spoke with authority but there was a note of unaccountable elation in his tones.

"Sure, we understand all right, Sergeant," the burlier of the trio replied with immense respect. "We're all set and waiting for orders."

The man who had posted Andrew Drake and who had all at once regained control of himself. He stood waiting quietly with a half smile upon his lips.

(To be continued.)

Phoenician Relics

Explorer to go 900 Miles in Jungles in Quest of A Lost City to Test Theory that the Ancient Traders Reached America

An expedition into the jungles of Brazil is about to start up the Rio Arapua in quest of relics of a lost city which Brazilian tribes reported to have been built by Phoenician colonists in the century. It is the theory of the expedition, led by the explorer, who recently sailed from New York on the expedition before it sets out on the 900-mile river from the jungles of Central Brazil, said he was convinced that Phoenician influences would be found in the vestiges of ancient settlement in the Brazilian forest. He will be in the jungle eight months, and his party will consist of eight men, including a radio operator. One of the party will be Mrs. Calvo.

The Phoenician theory is based on the marvellous achievements of that ancient nation of navigators credited by Columbus himself, the theory has been advanced by the explorer, who recently sailed from New York on the expedition before it sets out on the 900-mile river from the jungles of Central Brazil, said he was convinced that Phoenician influences would be found in the vestiges of ancient settlement in the Brazilian forest. He will be in the jungle eight months, and his party will consist of eight men, including a radio operator. One of the party will be Mrs. Calvo.

Like-wise, one of the books of the Bible records how Solomon and Hiram, the latter King of Tyre, sent out a fleet of Phoenician galleys, and how after a three-year voyage they returned with gold, silver, precious stones, and other riches. The Bible also records how Solomon and Hiram, the latter King of Tyre, sent out a fleet of Phoenician galleys, and how after a three-year voyage they returned with gold, silver, precious stones, and other riches. The Bible also records how Solomon and Hiram, the latter King of Tyre, sent out a fleet of Phoenician galleys, and how after a three-year voyage they returned with gold, silver, precious stones, and other riches.

Intra-Empire Trade

Toronto Globe (Lib): Mr. Hoop has promised the farmer, voters are to be protected against competition from farm produce imports from Canada. Canada farmers with memories of the consequences of the Fordney emergency tariff will not be under any illusion as to the harmful effect on their Canadian prosperity. The sensitive farmer will object to the return of the tariff to the level of the Fordney tariff, which would mean a return to the movement to an expanded intra-Empire trade, a substitute for foreign markets and safeguard against the vagaries of alien politicians and peoples.

Unknown Soldier

He must be weary of marching, Treading a rhythm above the street. He must be weary of laurel and And uniformed reverence, and he who pray.

All of his swag and all of his laurel, And in his crying for silence, rest.

But I think the lids of his eyes are fold When little gray mothers' blimd, and old.

Come softly at dusk. "My boy, rest." Such a grand, grand grave for you, O—

Valerie Graves in the New York Times.

Another Liner to Visit Lonely Tristan da Cunha

Loneliness has always been the lot of people in isolated communities, but it is doubtful whether any place in the Western Hemisphere compares with the little island of Tristan da Cunha—the "farthest outlying complete isolation" and detachment from the rest of the world. This island, the largest of a small group lying almost in the middle of the South Atlantic Ocean, on practically a straight line from Buenos Aires, is off the regular route of ocean-going vessels, and is rarely visited except by an occasional cruising liner. Last year the Empress of France on her South American-Africa Cruise touched at Tristan and landed supplies and

chance have reached the Western World and left indications as one of the elements in the peopling of prehistoric America is a presumption that has been advanced many times. In 1783 Ezra Stiles, an early President of Yale delivered a lecture before Governor Trumbull and the General Assembly of Connecticut in which he held this view. The Hebrew scholar of Yale University is attributed to him.

First-crop Japan teas are at that come out of the land of blue Japan green tea is comprised leaves.

"SALADA" JAPAN TEA

Fresh from the Green Tea

As recently as last year A. Hyatt Verrill, who for years has been engaged in research for the Museum of the American Indian, stated in his book "The American Indian" that "on the tropical eastern seaboard, in the Antilles and northeastern South America, we find Indians wholly distinct from either the United States tribes or the Central American and Western South American tribes. Many of these are strikingly Semitic in appearance and still adhere to Semitic customs." He points out that there is no one distinct Indian type over North and South America, some resembling Japanese, some Tartars, some Mongolians, others, he says, might well be Hebrews.

The varied nature of the legends other than gold in the Biblical inventory of the Ophir cargo warrants the supposition that the ancient treasure-trove may have been gathered in more than one region. The ivory and apes are virtually certain to have come from Africa, but who shall say whence came the gold?

In 1874 an inscribed stone was unearthed in the fields of Sator Costa of Parahyba, Brazil, the characters of which were deciphered by several experts to have been Phoenician. There have been so many surprising finds (such as the recently said to have been an article in the caves of France, that doubt was cast on the find.

Low Waves Link Canadian North With Ottawa

Transient Government Dispatches from Hearst City to Hudson Straits

DISTANCE IS 1,100 MILES

Schedule Throughout Day; Handle Private Traffic

Montreal.—The whole of Canada is kept in daily touch with the farthest of her northern inhabitants through the radio apparatus assembled on the top floor of an inconspicuous building in the heart of Ottawa, which the planning of street cars and the department of Marine and Fisheries have their radio installation, which is in daily contact with Cape Hope's Advance, Unkava Bay, Hudson Straits.

Signal come in with enough volume from this far north point to be put on the loud speaker and heard through most of the three-story building. A short-wave receiver, especially adapted by "Canadian" Government radio men to the particular needs of this reception, brings in the signals from the 500-watt station overlooking the Hudson Straits. A similar 500-watt transmitter stands in front of the Ottawa operator to transmit the orders and questions from the western government departments to the far north. It is a matter of 1,100 miles in a straight line from Cape Hope's Advance to Ottawa. The stations are on the air every day from 10 a. m. to 5 p. m., during which time which government communication is kept up by work on the Hudson Bay development is handled. The government can keep minute tabs on all movements up there and can give orders for the biggest and smallest undertakings, yet it is unable to actually send ships or planes up there without the help of considerable time.

The station at Cape Hope's Advance is in touch with numerous other stations, both governmental and private, in that district. It handles correspondence with Ottawa for all of them. One mining enterprise on Baker Lake (Chesworthfield) 750 miles west of the station, keeps in constant touch with it, conveying its messages through this government station to Ottawa and thence to its headquarters in Toronto. Another mining exploration company has its own station at the entrance to Chesterfield Inlet on the western shore of the Hudson Bay and keeps in direct contact with Ottawa. Wave heights in the neighborhood of twenty-three meters are used by these northern stations to keep in touch with the Dominion's capital.

"England has spread through the world: parliaments, railways and factories, co-operative societies and safe bicycles, afternoon tea, the practice of middle sports, and wife's work, Boy Scouts and Girl Guides, the jury system, the Salvation Army, high class tailoring and Gilbert and Sullivan operas."—H. A. L. Fisher.

"It is true that personalities and partnerships are out of place in the pulpit, but that is not because it is the pulpit—but because they are out of place anywhere among Gentile folk."—The Rev. Charles Francis Potter.

Silence is the most fragile thing. In all the world, I take it, For if you merely speak its name You're sure to break it.

"When young Dick meets you tell him to mark his grip and wait with the same of in the back road till I get to his hide."

Miles was passing through the hall when Andrew Drake emerged from the library humming with exasperation.

"Confound that pottingger! What!" he explained to Miss Drake. "This coming down on the ten o'clock train tonight and insists that I meet him at the station. Wants a private car."

"What!" Miss Drake warned and rushed up the stairs. Andrew gratefully following.

Miles turned Patricia appeared in the door of the music room.

"I heard she whispered, "Oh, Scottie, why is Mr. Wells coming now? Where have you been all day? When is all this dreadful suspense going to end?"

"Tonight for you, my dear young boy," the detective replied. "I want you to keep away again now tonight. Mr. Kemp will be waiting for you on the train. I'll be in my car in an hour and you must take your traveling case and slip out and join him. He will keep in touch with me and when he comes back in a few days it will be to find that all the trouble has passed."

She held her hands out to him.

"Oh, I had always had faith in you, but when I was King a night ago, you have found the terrible old man who tried to have me abducted and the man with the tattooed arm."

"He will never cross your path again," Miles replied earnestly. "One thing more: nobody was your own safety now in question, but that of your people also."

It was midnight when Miles and Scottie, equipped with shovels, set to work with a will and soon had a hole wide open in the floor of the summer house.

"I've struck something, lad," Scottie announced in an unconsciously lowered voice.

Miles slipped down into the excavation, took a look and felt about with his hands.

"Mashiners!" Scottie exclaimed. "But at you're taken as though it's been crushed with a sledge-hammer!"

"Our friends hoped it would be in better condition, I think," Miles replied. "Can you guess what it is?"

"It's a wee printing press, though I own I've had that in mind since you took the counterfeiting bill from me," Scottie shook his head. "If I had a chance to try to assemble it, now?"

"You're close enough to the truth, old man," Miles wedged down the hole once more and began heaping the boards back upon it. Put the boards back on the hole as well as you can and follow me."

Scottie obeyed and the two walked to the road where a machine had halted. With its three grimly business-like occupants the briefest of greetings were exchanged.

"You understand, boys, that you're on a confidential case, and as such I'm just by accident," Miles spoke with authority but there was a note of unaccountable elation in his tones.

"Sure, we understand all right, Sergeant," the burlier of the trio replied with immense respect. "We're all set and waiting for orders."

Phoenician Relics

Explorer to go 900 Miles in Jungles in Quest of A Lost City to Test Theory that the Ancient Traders Reached America

An expedition into the jungles of Brazil is about to start up the Rio Arapua in quest of relics of a lost city which Brazilian tribes reported to have been built by Phoenician colonists in the century. It is the theory of the expedition, led by the explorer, who recently sailed from New York on the expedition before it sets out on the 900-mile river from the jungles of Central Brazil, said he was convinced that Phoenician influences would be found in the vestiges of ancient settlement in the Brazilian forest. He will be in the jungle eight months, and his party will consist of eight men, including a radio operator. One of the party will be Mrs. Calvo.

NATIVES TRISTAN DA CUNHA

Loneliness has always been the lot of people in isolated communities, but it is doubtful whether any place in the Western Hemisphere compares with the little island of Tristan da Cunha—the "farthest outlying complete isolation" and detachment from the rest of the world. This island, the largest of a small group lying almost in the middle of the South Atlantic Ocean, on practically a straight line from Buenos Aires, is off the regular route of ocean-going vessels, and is rarely visited except by an occasional cruising liner. Last year the Empress of France on her South American-Africa Cruise touched at Tristan and landed supplies and

As recently as last year A. Hyatt Verrill, who for years has been engaged in research for the Museum of the American Indian, stated in his book "The American Indian" that "on the tropical eastern seaboard, in the Antilles and northeastern South America, we find Indians wholly distinct from either the United States tribes or the Central American and Western South American tribes. Many of these are strikingly Semitic in appearance and still adhere to Semitic customs." He points out that there is no one distinct Indian type over North and South America, some resembling Japanese, some Tartars, some Mongolians, others, he says, might well be Hebrews.
