Outlook of Mining Stock Market Indicates 1929 Will Be Record Year in Markets and Mines

HYDRO FOR HOWEY

MR. LLOYD J. MOORE

Mr. Lloyd J. Moore, alternate, during the first week of February. There has never been such activity representing such large amounts in terms of dollars as has been the case during the past few months. The actual number of shares traded in the market has exceeded the record set in December, 1927. The volume of trading in the mining stocks has been particularly active, and the market has shown a marked tendency to advance. The outlook for the mining stock market indicates that 1929 will be a record year in both markets and mines.

Farm Notes

THE AMENDED SEEDS ACT

The changing conditions in the growing and distribution of farm and garden seeds has made it necessary that the Federal Seeds Act be amended. This Act which has been in force since 1922, has been changed in a number of particulars and has been published in its new form with regulations for the guidance of seed growers and seed merchants, as well as farmers and gardeners.

The amended Act, which governs the trade in field and garden seeds of all plants, has been passed and is now in force. It is a very important piece of legislation, and it is hoped that it will result in a more efficient and economical seed industry.
