EDITORIAL

Pavements and Sewers

Markdale will soon be due for consideration by the County Council and the Department of Highways with regard to pavements, and we believe it is wise to have the matter well discussed before the proposition is due for immediate attention. We are fortunate in having an unlimited supply of gravel of the best quality right at our door and we can therefore afford to wait for our street paving program longer than some of the municipalities which are not so favorably located. Paving, however, is sure to be one of the burning questions in the village before we are many years older, and it is better that we be prepared to meet it with our eyes open than that we give the proposition, which is a big one, any consideration at a future date. Our own opinion is that a sewage system is the first and most important question to be considered. To install an adequate system will cost a lot of money but if handled in such a way that the work could be spread over several years with only local labor employed the big bulk of the money would be paid to residents in the village and would thereby not be taken away. As a matter of fact we believe a sewage system could be installed without costing the people of the village much money. It would be pretty much a matter of taking the money out of one pocket and putting it into another. The money, or the big portion at least, would be spent in the village.
