You'll be sorry  
if you listen  
to the Joker

Quite true his story sounds pleasing. "He'll save you money", "His paint costs less" — and so forth. Sounds like a pretty story but it's all Applesauce. It's too good to be true. Now, here is where the Joker comes in. He will save you money, but only at the start. His paint does cost less by the gallon, but oh! how expensive on the job. It cracks and it peels, it doesn't last and the colors fade. The Joker spoke the truth when he said "cheap" paint. "Cheap" and nasty. "Cheap" to buy but very costly to use.

On the other hand you'll get a handsome, lasting job if you use S-W-P. Though it costs a little more by the gallon it goes much further. It doesn't take as much money to cover your house with S-W-P because it takes less gallons. Now you have the truth! And S-W-P will last. It won't fade and it won't peel. Satisfaction. Money in your pocket in the long run.

For best results use
