

Are your hands shaky?

The nerves are fed by the blood. Poor blood means starved nerve tissue, insomnia, irritability and depression.

Dr. Williams' Pink Pills will enrich your blood stream and rebuild your over-worked nerves. Miss Josephine M. Martin, of Kitchener, Ontario, testifies to this:

"I suffered from a nervous breakdown," she writes. "I had terrible sick headaches, dizziness, felt very weak and could not sleep; had no appetite. I felt as if something terrible were going to happen. After taking other treatment without success, on my sister's advice, I tried Dr. Williams' Pink Pills, and now all these symptoms are gone, and I am strong and happy again."

Buy Dr. Williams' Pink Pills now at your druggist's or any dealer in medicine or by mail, 50 cents per bottle, from Dr. Williams' Medicine Co., Brockville, Ontario.

Better Than Gold

Old Bones May be Worth a Fortune—and a Smoking Fire—a Pointer to Wealth.

An American artist named Moti travelled to the "Islands" in a sailing vessel a year ago to paint pictures of seals in their native haunts and one day noticed a certain feature of said being close along the shore.

As he approached and found beneath a mass of bones. They were old bones—millions of them, which had been piled up by the sea in the course of centuries.

This brings to mind the case of the wandering prospector who, years ago, while crossing a desert in Wyoming, came across the body of a horse which, though it must have died long ago, was still fresh and sweet.

The body was covered with a layer of fine dust which the prospector recognized as horse. He saw the value of the discovery and sold it to a large packing firm in Chicago, who kept the secret for a long time.

Today the uses of borax are innumerable, and range from the preservation of food down to dressings for tired feet and lotions for inflamed eyes.

Riches in the Desert.

Everyone has heard of Caracra caracra. In 1925 a party of English tourists exploring the mountains of Caracra found a dirty block of marble which had evidently fallen from a cliff overhead.

"I know what it is," she cried. "What on earth are you talking about?" demanded the other woman. "Asphalt," was the answer, and she was right. That find proved much more valuable than a gold mine, for a thick deposit of asphalt covered many acres and made the fortunes of many others besides its discoverers.

Humans For Sale

When Are the Civilized Governments Going to Stop Slavery?

By Helena Normanton, B.A.

"Remember them that are in bonds!" The message thrilled through British hearts in days gone by, and this country took the lead in a crusade for the freeing of the slaves. But this dark blot on civilization still persists—and even in a Christian country. It is up to us to do our part to remove it and for ever.

Philosophers tell us that Man is marked off from the animals by the gift of laughter and the use of tools. It might be added that animals do not sell each other into captivity. Men do.

Interesting as it might be to retrace the past and to find out how human slavery originated, it is much more important to face the present and to grasp the fact that between four and six millions of our fellow human creatures are even today living enslaved in this beautiful world.

Where are they? a perplexed reader may inquire. Did not Great Britain abolish slavery once and for all in 1833?

The answer is that the vast majority of slaves today are in Abyssinia, China, and the Arabian area. Great Britain did, a century ago, make valiant efforts to stamp out the plague of slavery. In 1772, by Lord Mansfield's celebrated judgment, it became illegal to hold a slave in England. In language which has been quoted a thousand times: If slave sets foot on English soil he becomes a free man.

"The Underground Railway." In 1807 Great Britain abolished the trade in slaves between any of her Dominions (including England) and Africa. In 1833 she completed her task by emancipating all those who were held in slavery in any of her Dominions. But Great Britain could not—and cannot now—control the whole of the rest of the world.

Readers of "Uncle Tom's Cabin" will recall Eliza's celebrated journey over the ice. Like every other fugitive American slave before the Civil War of 1865, her idea was to get north into Canada, wherein, as Canada was a British colony, she would automatically become a free woman.

Those who assisted fugitive slaves thus to freedom by sheltering them and passing them on at night to the next safe-halt were said to run "The Underground Railway." But all slaves today cannot solve their problem by the simple method of getting on to the soil of the British Empire, although no doubt some hundreds do each year.

Stolen From Free Homes.

Old Timer Retires

Back in 1882 when the Canadian Pacific Railway was pushing through the bush in Northern Ontario on its way to a lot of good work and it was joined the road three years previously.

The answer is that the vast majority of slaves today are in Abyssinia, China, and the Arabian area. Great Britain did, a century ago, make valiant efforts to stamp out the plague of slavery.

Catching Crooks By Police Radio

Method Employed in Detroit is Proving Very Satisfactory and May be Widely Adopted

Two shadows are moving furiously to the bank of the Detroit River. Near by is another shadow, "a buxom beauty, evidently a parked car." From the porch of a house a man who has come out to smoke a bedtime cigarette is watching suspiciously. Suddenly he sees that the two moving shadows seem to be carrying something as they move closer to the shore.

There is a sudden movement, a sharp cry, a splash. Harry Goldberg tells us in a copyrighted article in the Philadelphia Public Ledger. A victim of underworld revenge has been bound and thrown into the river to drown. Now the two shadows move back toward the larger shadow which is an automobile.

Radio to the rescue of the drowning man? The waterer on the porch hears his inclination not to mix in underworld affairs. He hurries to the telephone, calls the Detroit Police Department and sets in motion the amazingly speedy machinery of justice, we learn from Mr. Goldberg's account of the use of this catching crooks by the authorities of Detroit and other cities.

Reading on: "Last night throughout the city, every one of the radio police cars is picking the alarm from its own radio set." One of the cars, parked near the scene of the attempted crime, races toward the spot as it continues to receive the remainder of the message.

Reading on: "Severely wounded at the scene of the crime, and before the ambulance arrived, a man who had been shot in the back of the head by a man who is being taken to the hospital and very much alive." This is just one of the many examples cited from the amazing new chapter being written in the annals of police work by the radio police.

Reading on: "The police of Detroit are the most efficient police in the world." The Standard Police of Detroit have been praised for their efficiency in many ways. They are the most efficient police in the world.

THE RESPONSIBILITY OF A FOND MOTHER

Her child is a never-ending source of joy and a never-failing responsibility to the fond mother.

Her child is a never-ending source of joy and a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her; she does not know just what to do, yet feels them not serious enough to call a doctor.

Use Old Method To Heat Cathedral

System Used in Roman Baths Duplicated in Great Liverpool Edifice

A system of heating similar to that used in the Roman baths in their summer months has been adopted for use in the Liverpool Cathedral, which will be one of the largest and most magnificent in the world.
