Six Snappy Steps

To Health and Pep

By Perbert E. Naylor, Author of

"Modern Physical Education."

It is not easy to describe what

health is, but there is no mistaking its

absence when pain reminds us that

We do not give a thought to the pro-

cess which takes place when we en-

joy a good meal-it is absorbed into

the system without our knowledge;

but when that meal sets up indigestion

we know there is such an organ as the

stomach, and that it is not working

properly. In other words, a healthy

condition is one in which every part

works so smoothly that we are un-

Many factors contribute to health-

proper food, good sleep, fresh air, and

exercise. Exercise is probably the

most important, as it dets up a de-

mand for all the others. The busi-

ness life may be such that there is lit-

tle opportunity fr. games, or long

walks, and how to recure the neces-

sary exercise to hoop fit is a real

problem to many engaged in sedentary

It is easier to kep up the general

efficiency of the body than to rebuild

it after it has broken down or deteri-

orated. A few simple exercises per-

formed daily at a convenient hour (not

too soon after a meal) will maintain

the condition of the muscles and

joints, tone up the nerves, and keep

Try These With Blackberries

Blackberries, together with raspberries, blueberries and goose berries, are remarkable for the amount of free acid they contain. This causes their juices to be of immense value in refreshing the system and keeping the blood cobl and free from toxins. Drinks, cordials, and preserves are therefore valu-Blackberry Cordial is easy to pre-

pare. Pick the fruit on a dry day and wash it, after removing all stalks. Then put it in a large stone jar, placing the jar in turn in a saucepan of boiling water. Leave until the fruit inside the jar is easily mashed. Then strain the contents through a sleve. To every pint of juice add one pound of loaf sugar, six cloves, the juice of two lemons and one orange. Let the whole simmer for half an hour, when strain and bottle for winter use. The cordial can be taken hot or cold, water peing added as required. A Blackberry Fool is a delightful

sweet. Place half a pound of picked and cleaned blackberries in a saucepan with a tablespoonful of water and enough sugar, to sweeten, letting them cook until they are tender enough to pass through a sieve. They make a cream by beating up three eggs with a little sugar and adding half a pint of milk, letting the whole gradually thicken by standing in a basin in a saucepan of boiling water. When thick, beat in the blackberry pulp. Pour into glasses and allow to set when it can be decorated with whipped cream and blanched almonds. Blackberry Mincemeat offers a novel

filling for tarts. Put two pounds of blackberries into sauce pan with the juice of two lemons and half a teacupful of water. Simmer until tender, then in an effort to discover a peace-time pass through a sieve. Peel, core, and ounces of stoned raisins, two ounces tanas, candied peel, and blanched almonds; add one pound of Demerara sugar and half a teaspoonful of ground idd the blackberry pulp, half a pound Putsin a jar and tie down. This is mincemeat.

> HE FAMILY AFFAIRS OF FROGS AND TOADS

Most frogs and toads lay large egg nasses, but only a very small percentage of the emerging tadpoles survive the attacks of fish, predaceous nsects, or the attentions of their own lay only a small number of eggs, nich, in such cases, are protected by the parents.

The females of the Pipa toad and of a Brazilian tree frog carry them about in cells upon the back; the fathr Midwife toad twines the egg masses about his legs, whilst the male of Darwin's frog of the Argentine swalows the eggs and bears the infant froglets in a special extension of the

ocal sac. The two extremes may be seen in lmost every branch of the animal ingdom, says Mr. E. G. Boulenger director of the Zoological Society's Aquarium. Aming the invertebrates some snails produce but a dozen young, which may be retained in the safety of the parental shell until they are of an appreciable size, whilst others oysters and limpets, for instance-discharge their millions, of young into the sea, there to win through if they can.

People who are too busy to take a vacation should learn from the lowly ant. Cansider the ant. There is nothing busier than an ant, and yet it always finds time to go to pienics.-Judge.

GOT IN A TAXI ON HIS KNEES

Was Crippled With Rheumatism—But Now Fit

THANKS TO KRUSCHEN

Once he was the object of his neighbours' sympathy—a rheumatic cripple.
To-day he is the object of their astonishment—a stenuously active man. It was Kruschen that accomolished the startling change. Here are the vital facts of his story :-"Roughly about 16 years ago I was

crippled with rheumatism, and for about four years it was impossible for about four yetis it was impossible for me to get about. When I wanted to get in a taxi, I had to get in on my knees. I tried everything—a potato in my pocket, sulphur in my socks, rheumatic ring, soaked my feet in proof whisky; also rubbed my joints with it; tried all sorts of liniments and pills—it did no good. Then I started on Kruschen Salts, and never missed a morning, taking my dose 20 minutes before breakfast. My age now is 56, and if you were to see me you would take me for not over 40. I can handle anything that comes into our shop; lift over my head seitees,

our shop; lift over my head settees, sideboards, wardrobes, etc.; in fact, people who know me say it is marvellous. To-day I am in perfect health. This is the honest truth."—T. R.

Here is a plain statement of the first bettle. The facts.—Two of the six sette of which the first bettle.
