

The Gringo Privateer

By PETER B. KYNE

SYNOPSIS

Kenneth Burney, adventurer and one-time gentleman, comes to Bradley Barlow, king of the cattle country for a job. Burney had a fight with Martin Bruce, a rival cattle owner, who has been stealing the king's stock, and he offers the king the job of getting the cattle thieves. Burney accepts though he knows it means a fight to the death. He meets Muriel, the king's beautiful daughter.

CHAPTER VI.—(Cont'd.)

When the king and the princess found themselves alone, the girl asked: "Dad, who is he?" "He claims to be the son of old Felix Burney, a California cattle man of my acquaintance. If this be true (and I'm not going to take his word for it) he's an American with a slight strain—say one-eighth—of Castilian blood in him. Just enough to give him temperament and make him a bit more easy and prodigal. His alleged father is one of the finest gentlemen in California. The old stock, you understand. Fifty years behind time with his code. "I have always liked old Felix but never knew he had a son. I loaned him money from time to time, with his cattle as security, and while I realized that, as an operator, he wasn't a girl-riding risk, still I could always send a man to court his cattle at any time and find more than the number he represented he owned when making the loan. This boy, Ken, says he's a lawyer. Just in on him a year ago and took the road for the loan. Well, we never knew anything about it. My head hurt. Hold every detail of my business. However, if we took the cattle we gave him the best market price for them and repaid him the difference between the selling price and his debt. Of course, with his ranch unstocked, old Felix has to lease it to some other cattleman, and now Ken says he's retired, and that's all. I suppose he'll be able to buy that ranch some day at a reasonable figure, and naturally if this boy gets himself into what he's extremely apt to do."

"How dreadful! Dad! I wouldn't like to see him killed!" the girl remarked thoughtfully. "He's so young and so merry and gallant, and so filled with the joy of living. He seems to be so frivolous but somehow, I think that's just a smoke screen to hide a lot of real courage and sound common sense. He strikes me as a gentleman who has been a sort of dilettante cowboy."

"Oh, I imagine he knows cows well enough. He was brought up on the Santa Inez Rancho and they ran about three thousand head. The trouble with old Felix spoiled him for the business by raising him a gentleman and giving him too much money to spend. Why, the young jackass used to play polo. Now that old Felix can no longer support another gentleman in the family, the boy's broke and a wanderer in search of a riding job. Apparently, he realizes that cows are the only thing in life he really knows anything about and it has occurred to him to cultivate his scant knowledge and forget polo. A wise decision."

"Are you going to employ him, Ken?" "Of course I am. He needs a job. I have it to give and I might as well fake a chance on him, for his father's sake, as on anybody else. But he's the country gentleman, even in his chaps, for the good of his soul I'm going to put him over the jumps tomorrow. The El Rancho riders with whom he will have to associate will despise him for a dude—there's such a thing as blind class hatred, you know—until they realize he knows his business, too. That dude, that is, he's a man to be reckoned with. He stays on old Gerónimo ten seconds they'll know him for a rider and a game one. And that will help a great deal."

"I suppose he should be thrown out of the place," the king replied indignantly. "His father has been a cowboy and laid the foundation of the king's present vast fortune; although he had given his heir-apparent a liberal education and cultural advantages unknown to Grandfather Burney's day, he had also raised Bradley to fit him for his heritage and equip him with ability to add to it. And how well the old man had won the Western cattle world now!"

The present king had started his practical education in the bunkhouse. "Cattle back!" the king replied indignantly. "His father has been a cowboy and laid the foundation of the king's present vast fortune; although he had given his heir-apparent a liberal education and cultural advantages unknown to Grandfather Burney's day, he had also raised Bradley to fit him for his heritage and equip him with ability to add to it. Diet Revolution New Experiment

Hamilton, N.Y.—Here is unusual scientific news for those who enjoy eating.

Scientists at Colgate University this fall are going to digress from the usual routine of finding out what is good for a person to eat, and see whether there may be direct benefit from eating according to what a person likes.

Colgate will analyze the benefits of flavor, savoriness and eye-filling appearance. This work will be done in the department of psychology under the direction of Dr. Ronald A. Laird. The plans are announced in the Colgate Lab Log, which says: "There has been a tendency in diet work for the past decade to treat man as a purely chemical machine working on calories, vitamins, minerals, carbohydrates, etc. Taste, odor and appearance of food have been largely neglected, and it is these which will occupy our most attention."

"Authorities recognize that the process of digestion is directly influenced by the chemical constituents of the food eaten, and that the eater's temperament may be affected by food or digestion."

"Two of the world's most famous pessimists, Carlyle and Schopenhauer, suffered all their lives from bad digestions. We may find evidence that a psychologically sound diet—a cream put on the psychological moment, for instance, might have contributed to turning those black-spectacled authors into members of the optimistic club."

"Coming down to more practical matters we discover that properly selected flavors and odors, together with attractive appearance, offer a harassed wife the surest means of turning a moody husband into a sparkling conversationalist."

MAKING THE WORLD'S SICKLES. The sickle, one of the oldest reaping instruments in the world is still in use in many countries. With sickles Japan and Burma reap their rice; sickles cut the pampas of South America and various crops in Poland, New Zealand, and the Fiji Islands, Peru, and a hundred and one other lands.

Most of these sickles come from one little factory in the town of Conisborough, Yorkshire. Conisborough, by the way, was the central scene of Sir Walter Scott's "Ivanhoe," and in the little town that he wrote many of the pages of that great novel.

The factory employs only thirty-five hands. Yet it turns out nearly 12,000 sickles every week. Steel from Sheffield, only a dozen miles distant, comes in "strings"—ribbons a quarter of an inch in width. These are sliced by a shearing machine into the proper lengths, whilst other machines shape them, bend them and perform the preliminary processes. Then, blacksmiths grind them to their final edge.

The workers in this little town are directly affected by happenings in half the world. A good crop in China means prosperity for them, whilst a revolution in South America may spell short time.—*T.H.B.*

DEEP SEA SAFETY Just as the gas mask forms part of every soldier's equipment, so a wonderful new escape dress is to be provided for all sailors employed in submarines. The device, which is the invention of Mr. R. H. Davis, has been tested in Loch Long at depths up to 130 feet.

The dress contains a breathing bag which is supplied by a small cylinder of oxygen fixed below it. Poisonous carbonic acid gas of the exhaled breath is absorbed by a cartridge of soda lime.

Should a submarine sink, every man aboard her will don his escape dress, which will keep him safe in spite of the poisonous gases given off when salt water comes into contact with the accumulators. The hull of the submarine will then be flooded in order to equalize the water pressure within and without. If this were not done the hatch of the conning tower could not be opened owing to the terrific weight of the water above it. Once the hull has been flooded the hatch is easily opened and the crew can pass through it.—*T.H.B.*

A Meeting I feel that we have met before, and yet your name is unfamiliar—can it be that 'twas in some far-distant time with me?

I know your face, as well I knew it then. I know—though now you're grave—once in a while within your cheek a dimple dances when you smile.

This memory of you is wondrous strong; Each trick of speech, each tuft of hair I know; Surely we often talked together long ago?

Even the color of the gown you wore is still the same—a misty shade of blue—Ah, yes, I feel that we have met before? Do you?

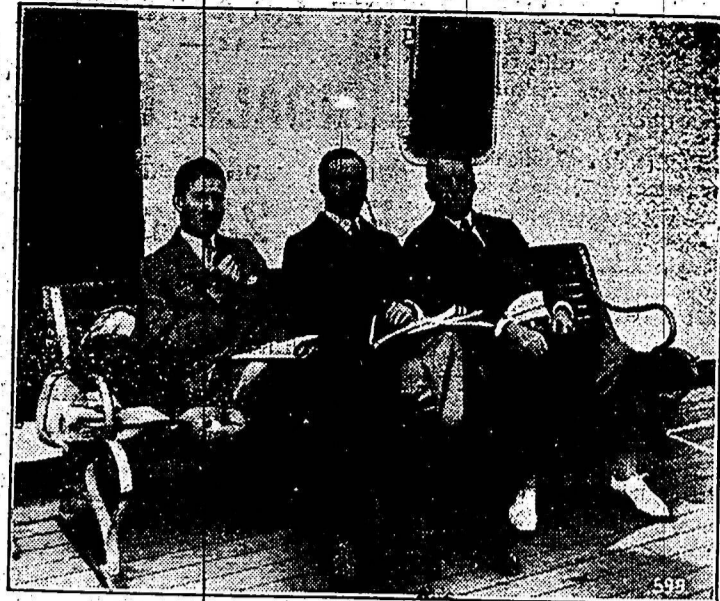

—L.M.O., in "Answers."

Possibilities Never judge your future possibilities by your past failures.

Old Gentleman (at swimming pool): "I say, attendant, what is about the longest a person has stayed under water?" Attendant: "Oh, about five minutes, sir." Old Gentleman: "Well, there's a man over there who's easily broken the record. I've been timing him, and he's been down seven minutes now."—*Fearsons.*

A shilling of the year 1219 contains sufficient silver to make about two 1930 coins.

Distinguished Visitors

His Excellency Lt. Col. T. R. St. Johnston, C.M.G., Governor of the Leeward Islands, is sitting in the center of this group taken aboard the Duchess of York. Right is Lord Moylinham, president of the Royal College of Surgeons, and left is Captain J. P. N. Whitley, A.D.C., to His Excellency, Lt. Col. St. Johnston is on a semi-official visit to Ottawa and other cities in an endeavor to promote better Empire Trade Preference policy between Canada and the British West Indies, and also to organize regular air lines between the Dominion and the Islands.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A jaunty red and white linen print that you'll find so useful for all-day occasions for mid-summer, can be copied for a very small amount.

The becoming scarf collar of white linen accented with plain red gives it a sportive air.

Style No. 2961 affects Princess shaping through the moulded bodice and cleverly low placed fullness of the circular skirt.

It can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. The medium size takes with 3/4 yards of 39-inch material with 1/2 yard of 35-inch contrasting for collar with 1/2 yard of 35-inch bias binding for skirt hem, cuffs and collar trim.

Peach shantung with collar of self-fabric is chic.

Shell pink flax wasabeil crepe, yellow and white dotted pique, orchid and white printed batiste and Nile green shirting in candy stripe are attractive suggestions.

HOW TO ORDER PATTERNS Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (not preferred); wrap it carefully for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Fancy That! A tourist had been shown round a Far Western township by two brothers who had built the entire place during the past ten years or so.

He was shown the town hall, the free library, and numerous other buildings. Seated with his hosts at luncheon subsequently, he remarked, "By the way, I didn't notice the church. Where's that?"

The brothers looked at each other for a moment, then one remarked: "There you are, Abe! I've told you all along I was sure we'd forgotten something!"—*T.H.B.*

GREAT AIMS All things invite action. What we give, we must give directly; and what we do, we must do at once. We have great aims—aims that are worth living and dying for—that the wilderness may rejoice and blossom as the rose, that slaves may drop their shackles, that nations may change their gods, that Christ may finish His triumphs over all the powers (human and satanic) which through the night of ages have insulted the majesty of God and prolonged the misery of man. These are our aims—aims vast as the joy of Jesus; and our prospects, to borrow the well worn words of Dr. Judson, are "bright as the promises of God."—*Rev. Dr. Stanford.*

Teamwork Fights Mystery Disease

London, Laboratory Plans New Crusade Against Asthma

One of the most baffling of all the diseases to which mankind is heir is asthma, whose sufferers number at least a quarter of a million. Like rheumatism, measles, and many other ailments, it was regarded but a few years ago as one of the trifling ills that fall naturally to a man's lot; now it is realized that it is the cause of widespread suffering, distress, and unemployment. (writes a Specialist.)

It is one of the strangest of all diseases, for those who are liable to it may be perfectly well in one locality and have to fight for every breath in another. A change from house to house or even from room to room may make all the difference.

The medicine of former years knew little about the causes of asthma. It recognized them when they were present, and sought for means of alleviating or curing them. Modern medical science realizes that the only sound method is to strike at the very root of the disease, by discovering how it is brought about, and then taking steps to eradicate the cause.

No one yet knows to what asthma is really due. But thanks to a wonderful movement, started less than three years ago, by two asthma sufferers, the Earl of Limerick and Captain F. L. N. Boothby, wonderful work is being done by the Asthma Research Council, whose headquarters are at King's College, London.

Centres for research into the cause of asthma and for its treatment have been established in several places in this country. The method employed is to enlist the help of teams of doctors, each a specialist in his own department. Thus, at Guy's Hospital, the asthma team consists of a biochemist, an X-ray expert, an ear, nose, and throat specialist, a pathologist, a clinical physiologist, a psychologist, a physician, and two assistants. The head of the team receives reports from all, and in this way much more is learned than could be done by the work of one man alone.

Complex Poison The first thing to ascertain was the nature of the disease itself, and this was found to be an over-sensitive condition of the membranes of organs associated with breathing. It was found that in their abnormally sensitive condition they were liable to irritation, and that this irritation produced shortness of breath.

In the treatment of hundreds of asthma cases a great deal of suffering was due to the use of feather pillows, feather beds, and elderdowns. From these a minute dust rises, inflames the membranes, and brings on attacks of asthma.

But asthma can, and does, occur when ordinary beds, pillows, and coverings are used. What was the irritant? Careful examination showed that the bodies of large numbers of asthmatics contained a peculiar poison which might be present in abnormally large quantities when an attack was occurring. This poison, which is of a very complex nature, was isolated, and it was discovered that a small amount applied to the skin will raise weals.

The Asthma Research Council is now studying the nature of this poison and endeavoring to find means of counteracting its effects and of preventing its formation in the body. It is known that it is produced sometimes by bad digestion, and in such cases treatment designed to facilitate digestive processes brings about improvement.—*T.H.B.*

It gives more pleasure than you thought tea could give

"SALADA" TEA

'Fresh from the garden'

Economy Corner

Cherry Mousse
One pint thick cream; 1 cup cherry juice; 2 drops almond extract and powdered sugar. Mix the ingredients, sweetening to taste; chill and whisk until stiff, then pack in ice and salt for three hours or more.

Scones
Two cups flour, 4 teaspoons baking powder, 1 teaspoon salt, 2 tablespoons sugar, 4 tablespoons butter, 1 egg yolk, 1 cup milk, 1 egg, white.

Mix and sift dry ingredients. Cut in the butter with a knife. Add egg yolk, then milk gradually. Toss off floured board; pat out to 1/4 inch thickness. Brush top with egg white beaten with 1 tablespoon water. Lay on a greased pan, and bake in a 450 degree oven 10 to 15 minutes.

Walnut Date Meringue
Two eggs, well beaten; 1 teaspoon baking powder, 2 tablespoons flour, 1 cup chopped dates, 1 cup chopped walnuts, 1 heaping tablespoon sugar and a pinch of salt. Bake for 30 minutes in a shallow oven. Serve with rich cream.

Bangor Brownies
One cup sugar, creamed with 1/2 cup butter; add 2 eggs, well beaten, and stir until free from lumps. Add 2 squares melted chocolate, 1/2 cup chopped walnuts and 1/2 cup pastry flour. Spread thin. Bake 15 minutes and cut in strips.

De Luxe Chocolate Cake
One and one-half cups sugar creamed in 1/2 cup butter, yolks of 2 eggs, beaten fine, 1/2 cup sour milk, 1/2 cup hot water, 1/2 cup cocoa and 1 teaspoon soda together. Add whites of 2 eggs, beaten stiff. Vanilla. If you sift the flour two or three times it makes a cake very fine.

Cream Filling For Washington Pie
One cup milk, 1 tablespoon cornstarch, 1/2 cup sugar, 1 egg, salt, vanilla. Heat milk. Put dry ingredients into a bowl. Break egg into it. Pour mixture into milk and cook until thick.

Banana Griddle Cakes
Mix and sift 2 cups flour, 2 teaspoons baking powder, 1 tablespoon sugar, 1 egg, 1/2 cup milk, 2 eggs, 2 tablespoons butter. Dredge 1 cup chopped bananas in flour and add to griddle cakes. Serve with syrup, honey, fresh crushed strawberries or jelly.

Coffee Whipped Cream Roll
Six tablespoons powdered sugar, 6 eggs, 3 tablespoons pastry flour, 1 teaspoon baking powder, 1/2 pint cream, 3 tablespoons strong coffee. Whip cream, beat the eggs and sugar together, add coffee and flour mixed with baking powder. Whip flour mixed eggs very stiff and fold through mixture. Line a shallow pan with grease and floured paper, spread mixture on this and bake from 7 to 10 minutes in an oven about 350 degrees F. When baked place between damp cloths. Let cool. Whip the cream stiff, flavor with vanilla and 1 tablespoon powdered sugar. Spread on the cake. Roll it. Spread the top with coffee butter frosting.

Fruitage—Serves Four
8 tablespoons crushed pineapple, 2 tablespoons lemon juice, 1 cup orange juice, 2 cups boiling water, 4 tablespoons sugar. Drain pineapple, if canned, but do not extract all juice. Add lemon and orange juice, boiling water and half the sugar. Allow to stand until cool. Add remaining sugar, strain and serve very cold.

Spaghetti Luncheon Dish
A spaghetti loaf that is delicious for a luncheon dish: One and one-half cups boiled and rinsed spaghetti, 2 cups soft bread crumbs, 2 cups milk, 2 cups grated cheese, 1/2 cup melted butter, 4 beaten eggs, 1 pint tomato, cut fine, salt. Bake in a moderate oven about 45 minutes.

ASPIRIN
TRADE MARK REG.

PAIN
No matter how severe, you can always get immediate relief.

Aspirin always stops pain quickly. It does it without any effects. Harmless to the heart, harmless to anybody but it always brings relief. Why suffer?
