EXTRA FOOTHOLD means CHEAPER PLOWING

WATCH a tug-of-war team on the end of a rope. Note how easily and steadily the boys pull when they have a firm foothold—how they slip and slither if they have no holes to brace their feet.

The same principle applies to a tractor. The more traction it has, the easier and steadier it pulls—less slipping—less waste of power. That can mean only one thing—more actual work from every gallon of fuel—cheaper plowing, cheaper cultivating, etc.

Look at the long, wide tracks of the "Caterpillar"—compare "Caterpillar" traction with that of any other tractor—then you will see why "Caterpillar" owners save so much on their fuel bills.
