You need fewer gallons of SWP to paint your house

Fine old SWP House Paint has such wonderful "body" that each gallon thoroughly covers more square feet of wall.

That is one reason why SWP House Paint costs no more than cheaper paint on your house. The saving on gallonage does it—regardless of the price per gallon.

In addition you get the superior quality of SWP—the more beautiful, weatherproof colors—the long service that saves 50% to 60% in repainting cost. All because fine old SWP is made of the finest materials, by the largest paint and varnish makers in the world.

Come in and let's do a little simple arithmetic before you squander money on cheaper paint.

Specify SWP and engage a good painter.
