Wide Variety of Goods Is Sold Through 40,000 Automatic Devices in Operation

Owing to the strict legislation gov craing shop hours in Denmark the automatic vendor has become a popular selling medium and a special industry producing slot machines has been developed, says a recent report of the Dept. of Commerce of the United States. Sales at first were confined to cirars and cicarettes. Now fined to cigars and cigarettes. Now however, a wide variety of goods is handled by the 40,000 machines which are estimated to be in use.

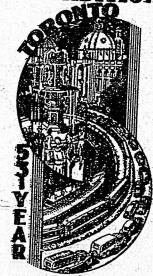

Many of the models offered of late by the local industry are much more aplicated and better fitted than the original cigarette machine, which be-cause of the uniform price of cigarettes and their standard packing is one of the simplest types of automatic machines, says the report.

mate machines, says the report.

Among the new models is a machine adapted for the sale of an extraordinary number of different articles. The later models are 30 Arrespectively.

No figures are available covering ranged that the customer can assure himself of the quality of his purchase, each compartment being fitted with mirrors and illuminated by an electric light; some of the machines have a separate slot for each compartment. The top and base of the machines likewise illuminated. This serves the double purpose of drawing atten

Strength of Man Measured in Tests

Public Health Service Finds Heavily Built Are Usually Stronger Than Slender of Same Weight

The tests were made to ascertain he pulling, pushing, handgripping, lifting and lung power of men be-tween the ages of 20 and 34, between the weight of 120 and 169 pounds, and between the heights of 63 and 70 Inches.

The greatest pulling power was de monstrated by men in the heaviest weight class, between 160 and 169 pounds. Men in the two heaviest classes, 150 to 159 and 160 to 169 pounds, tied as the most powerful In each of these weight pushers. groups the taller men proved to be the best pushers, with a force of 121

bounds, the record figure. In the handgripping contest the tallest and heaviest men gave the most powerful hand grips, with a force of 108.48 pounds. But the shortest men in the heaviest group were the most powerful lifters, lifting on an average 519.2 pounds.

The men having the greatest lung power were found among the shortest n the 150-159 pound class. Their lung force was measured at 154 milli meters

So far as general strength went, it was found that the taller men were for their weight the less strength they for their weight the less creength they had on the average, and the shorter they were for their weight the stronger they were. This rule applied through practically all weight groups. through practically all weight groups. As a rule heavy men were found to be stronger than men of a lighter weight. Men in the 63-64 inch class were found to be the strongest in the 120-129 pound class, as they were in the next weight class, 130-139 pounds, and also in the 140-149 pound class. However, the tallest men in the 150-159 class proved to be an exception to the general rule, for they were found to be the strongest. But the general to be the strongest. But the general rule held again in the heaviest class, 160-169 pounds, where the shortest

men were the strongest.

BORDEN'S CHOCOLATE MALTED MILK LIERE is a delightful change for noon day uncheost, picnics, and outings, that your children will love. Borden's Chocolate Maited Milk is rich and creamy, with a real MALT flavour that puts a finishing touch to any meet.

They can't get away, once they touch Aeroron. There's something in it that has an irresistible attraction for these household pests. A wider and longer ribbon provides a greater area, and the glue does not dry-good for 3 weeks service. At drug, grocery & hardware stores.

Different Languages

of Sexes in Tribes How strong is a man? The answer has just been made by the United States Public Health Service through a series of tests given to 500 men. Generally, heavily built men were found to be stronger than slender men of the same weight.

The difference in the language used by men and women of the same tribe, discussed by Sir James George Fracter, English anthropologist, in his recent book, "Garnered Scaves," calls to mind the varied words employed by the Incas of Feru to describe the same object or operation. Spinning for object or operation. Spinning, for

object or operation. Spinning, for instance, by a woman was called "buhea," but when a man engaged in this task it was called "buheo."

Before the Inca youths of royal blood were invested with arms, they was tasted as to their shilling to meet were tested as to their ability to meet the exigencies of warfare, such as the making of shields, weapons or even sandals, of any material available. Thus they practiced the manufacture of woolen sandal cords by twisting wool with a small stick. This method of twisting was called "milluy," and as the work was for men, women did not use the word.

HE COULDN'T READ FOR INDIGESTION

"For some years previous to 1922 I was subject to indigestion, with headaches and thousands of stars sparkling in my eyes, which prevented me from reading. I decided to try Kruschen Salts. That was August, 1922, and I have taken a little in my first morning cup of ten ever since. I now eat anything, and am entirely free from indigestion or 'stars.'"—F. C.

Now let it be said quite definitely, that what Kruschen did for him, it will do for everybody else who suffers from indigestion as he did. The fact is that "the little daily dose" first stimulates the flow of gastric juices to aid digestion, and then ensures complete, regular, and unfailing elimination of all waste matter every day.

Soon after you start on Kruschen you will begin to feel the benefit. You will find to your satisfaction that you are able to enjoy your food without any distressing after-effects. And, as you persevere, you will see that the relief which Kruschen brings is lasting relief.
