For YOUR SAFETY every Ford car has a SHATTER-PROOF GLASS WINDSHIELD

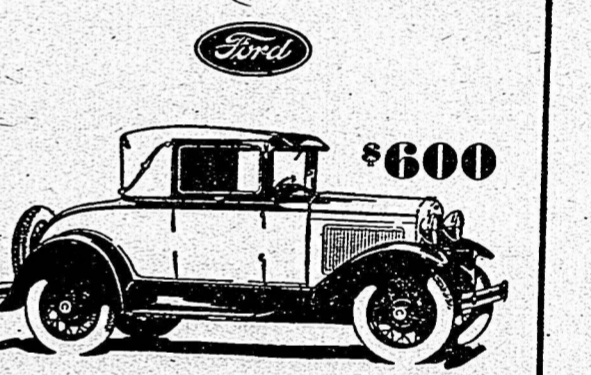

For greater safety in driving, every Ford car is equipped with a shatter-proof plate glass windshield. By reducing the dangers of flying glass it has saved many lives and prevented injuries in automobile accidents.

The value of this important safety factor has been known for years, but its use has been limited by expense. It is brought to you on the Ford as standard equipment only because of the efficiency and economy of Ford methods.

This windshield will withstand a 50% harder impact before breaking than plate glass of equal thickness, and is more flexible under impact. When struck an unusually hard blow, it will crack, but the danger from flying glass is minimized.

Many improvements in methods and material have been made in the past three years, so that today shatter-proof glass is recognized as one of the greatest contributions to motoring since four-wheel brakes. High speed and crowded traffic emphasize the need of the protection it affords.

Come in today, and let us explain how the Ford windshield is made. You ought to know how much it contributes to your safety, and how much more it makes the Ford a value far above the price.

PLEASE

There are a good many of the subscribers to The Standard who have let their subscriptions become in arrears and the sum of such arrearages makes quite a total. We need the money and would ask all those indebted to us to please make an effort to let us have a remittance at the earliest possible moment. The amount of each individual account when multiplied by four or five hundred means much to us.

Please let us have your little contribution.
