A Record of Stability

THE year in which The Bank of Toronto opened its doors, Ontario rode the crest of a boom. Over \$60,000,000 was spent on railways and canals in the six years following 1850. Millions of dollars of invested British capital stimulated prosperity. United States markets were thrown open to produce of Canadian farms. Prices were high. Immigrants poured in . . .

seeking for stability. When the landslide came in 1857, when harvests failed and capital dried up, and other banks suffered losses, The Bank of Toronto emerged intact from this first depression.

This policy of safe, sound banking has characterized The Bank of Toronto for three quarters of a century. Today the Bank stands for stability and safety in every department of its efficient banking service.

You are invited to make use of the strength and service of this friendly bank.
