Cream Facts

It may interest our patrons and others to know that during our six years of operating the Markdale Creamery we have enjoyed a steady increase of production from year to year. Previous to our management the Markdale Creamery produced 200,000 lbs. a year and now we have increased the production to such an extent that in the year 1932 we had a production of over 550,000 lbs.

In the Dundalk plant, previous to our management Markdale Creamery about 125,000 lbs. a year. In the first year of our management we increased the make to close to 300,000 lbs. In this plant we did not start to operate until about May 15, 1932. This is a record which we are proud of and it should speak for itself.

As the cream season of 1933 is close at hand we are again soliciting your full cream patronage. As in the past we will pay the highest market prices.

You will greatly benefit by giving us your full patronage because by doing so it helps to keep our manufacturing costs low; therefore enabling us to pay you the highest prices for your cream.

We ask those who are saving last year's cream bills to compare our prices to those paid by other creameries, including creameries in Toronto.

We again ask you to bring in your cream to our Creameries regardless of quantity, and as soon as the roads are fit our trucks will call on you as in the past seasons.

Thanking you for your past patronage,
