He stood there for a moment looking about him and failing to notice a man who, ten paces away, seemed to be watching the dock gates—a tallish man wearing a white raincoat, collar turned up, and a soft brown hat with the brini pulled down. But h other man had seen Kearney-and the sight of Krarney had set him dreaming.

Misty, wet streets faded from ken with their din of rumbling lorries, and the watcher of the dock gates was transported to Colombo-Colombo a year before. A year! It seemed only like a week! The mist dispersed before the eyes of the dreamer by the gates. He saw Mount Lavinia Hotel, and a petite, slender girl in a blue frock crossing the deserted mahogang dance floor. She had been a sort o revelation, opening his eyes to all that had been lacking. He was among the stars again, could see the winking light house callously stabbing the tropical night, hear the plaintive tre-molo of a Tamil love chant floating

up from the village.... From these haunting memories he was abruptly jerked back to reality. He withdrew into shadow.

A man was coming out of the gates -so muffled up in a heavy fur-collar ed coat that his features were indistinguishable. This man turned sharply left, passed Kearney, and was swallowed up in the fog.

And as he vanished, somethingan instinct perhaps; or was it a faint odor suggestive of musk?—suddenly brought Kearney an unaccountable return of hat sensation as though cold water trickled down his spine. He stared into the fog. Had son passed him—or had he imagined it?

He hated this sensation—as of an ndefinable dread-which twice, nov

anybody in any country!

This habit would perhaps not have done us quite so much harm if we had been isolated, but we have been deluxed with newspapers, magazines and ooks that are partly propaganda for the greatness of other peoples and the wonderful men that they have produced. I suppose, for instance, that all upper school children in Canada know something about "the American wizard of horticulture." Burban's: of the things they know about him are uctrue. How many know about the late Dr. W. T. Macoun, Canadian horticulturist, who without question has done more for borticulture than Bur-bank? But Macoun was a hard-working Government official on a small salary and never thought of advertising himself, and unfortunately we have not yet reached that stage of our national development in which there is full recognition of outstanding cientific work done at home. One reason why our achievement

in horticulture have not gained more publicity is that many of the big things have been done by men gener ous enough to share thoroughly with their associates. The important fruits produced at Vineland have never been eized upon by the head of the statio as his production. Among those who know of them they are always spoker of as, "by Palmer and ils associates," or more commonly still, simply a produced at Vineland."

Predictions are risky but I should like to chance a statement that the toba; he was a servant of the whole Dominion and worked as much for the Prairie Provinces as he did for the est fruit lands of the country.

Vegetables, fruits and flowers all re-

In the profession, of course, Dr. Ma-

coun's p ition was very high. One of the greatest honors accorded him was that the New York State Fruit Testing Association named its choice apple the Macoun. Many medals were warded to his productions including the Grande Medaille de Vermeil from the National Society of France, a gold medal struck by the International Ex-position of borticulture at Brissels for the Melha apple alone, medals struck by the American Pomological Society to commomorate the Melba apple and the Lobo apple, another of Dr. Macoun's productions. The first award of the Carter Gold Medal of Honor for the Advancement of Horticulture was to Dr. Macoun, and many other similar honors showed the appreciation of the scientific world of his work.
