How Place-Names Are Decided

Canada Week by Week

-in a country & large as Canada, with many areas which have been rapidly opened up, particularly as the result of rich mineral liscoveries, the selection and authorization of new placerames becomes a problem of some importance. Just how are these place-names finally decided upon?

All decisions in connection with geo-phy in the Dominion rest with the phy in the Dominion rest with the Geographic Board of Canada, which was established by the Dominion Gor-ernment in '897. The Board consists of 20 members, 12 of whom are mem-bers of the Departments of the Dominion Government; the remaining of the are the members representing as eight are the members representing as many provinces. Quebec has its own many provinces. Quebec has its own board to deal with names in that pro-vince. The view points, commenta, and susgestions of the provincial re-presentatives are obtained before any decision is arrived at regarding names which are open to question. When the Ecard reaches: decision the name is adopted and becomes official.

WILL I USED

With regard to names of geographary line, the Geographic Board of Can-ary line, the Geographic Board of Can-ada maintains a close co-operation with the United States Geographic Roard, in the adoption of names which are acceptable to both countries.

The duties of the Board, during the

36 years of its existence, have become greater each year as the mapping ac-tivities of the various Government detivities of the various General ad-partments have increased. About 20 maps a year come before the Board. Each of these maps has an average of 200 names to be examined and passed, making a total of approximatele 5,666 names. In addition a great number of inquiries from Government departments, libraries, societies, firms and private individuals, requesting inof places and regarding the origin and meaning of place-names, are received. A peep into thefuture. "Venetian gondoller fined for ignoring the traffic lights on the Grand Canal."

"Crop" to Revive Tract in South

CHAPTER XVIL-(Cont'd.) Instantly Dawson Haig held his breath. He had alighted unhurt on what felt like a brick floor, the feathshout him having broken his fall. He knew that he had one chance of life—he counter the seconds of time

which remained to him.... If this pit should prove to be identical with that which he had known in Singapore, there was still hope— provided he could hold his breath so long. One inhalation, he knew, would be fatal.

be fatai.

Standing upright in the fluffy mass which enveloped him, he visualized his position. Twelvo seconds had elopsed. And since he had not inhaled deeply. as for a dive, his time was short. He stepped back a pace, touched the wall, groped along it to the left, and knew that he was unfer the trap, reached the angle, groped further, and touched the rung of a worden ladder. He swung right, placed his feet upon

he rungs, and began to mount. Five rungs no mounted and seemed to be tree of the damnable feathers Higher yet, cautiously. His head touched the roof. Still holding his breath, he felt about with his left

preata, ne teit about with his left hand. His lungs were bursting. It was agont to hold out.

He looked up—and saw a faint gleam of light through a chink in the woodwell above... Raising his face towards it, he began slowly to inhale. The scent of the drug impregnating the feathers was nauscating, but the ir was just breathable. He half-filled his lungs. He knew that death must come at last if forced to remain in that atmosphere. But, at least, he ad survived.

Came soft footsteps on the floor im nediately above his head.

Jack Rattray, the first officer, walk Jack Rattray, the mis of the boat deck. ed out of his cabin onto the boat deck. It was a perfect evening. The turquoise blue waters of Lake Timsah nirrored an azure sky. He walked

An operator came out to look for him. Rattray stared gravely at the

nim. Kattray stared gravely at the message he brought.
"What shal! I do about it?" asked the Marconi man. "I know Mr. Kearney is a friend of yours. It's rather awful to think he doesn't know what's

happened."
"Poor old Matt," muttered Rattray 'I've been expecting this any moment.' He looked up. "I suppose there's no

"None whatever Mr. Rattray, about

deither of them."

Jack Rattray, staring hard at the flimsy, suddenly looked up. "I may be wrong." he admitted, "but honestly, if i'd been in the Old Man's shoes, I'd have shoved Dr. Oestler ashore at Port Said, or else chucke, him into the Canal!... They were both old friends what the devil can we answer? After all, there's still a chance she may be discovered. Can't we sort of break the naws gently?"
"Well," said the Marconi man, "

Essex County

Well, said the Marconi man, "I might reply, Mis Kearney went ashore a Port Said. Advise communicate apperts."

"He's 'hat'll do," said Rattray. St. Joachim.—Attnough the profile of pork has reached a point that is tempting to the producer, buyers have to cover much larger territory than formerly to purchase a car load of hogs.

Inatil do, said message to me when sure to send a message to me when he gets it. In the meantime I shall have to think how I'm going to reply But don't be surprised, my lad, if you hear the sound of a loud splash in the Red Sea. It'll only be Dr Oestler.

Dawson Haid had heard every wor of the conversation between Moham med and Joseph. It had been conduct cedented happening for Essex county, once the champion corn and pork producing county of Ontario or of the whole Dominion.

med and Josepn. It had been conducted directly above his head, as he crouched below the trap. Since he knew no Eastern tongue, he was grateful to both for speaking English.

The creaky tones of old Mohammed were unmistakable: Mohammed was the proprietor. And he srspected Jo-seph to be none other than the fortune teller whom he had followed ashore. Later, he was to consider this mat ter of anguage again-more coolly: the curious circumstance that these part in his lone campaign against the

powers of Yu'an Hee See.

He detected the presence of Joseph as he knelt above the trap, listening ... he heard his retreating footsteps. Then he inhaled again, cautiously, and tanding there is that drug-laden pit,

hought hard and swiftly.

The light shining through the chink aided his calculations that the hinged end of the trap was to his left, and that which opened, to his right. There was no ring on the underside, but he was not defeated. He carried a pocketknife which was a kind of a small armory, containing amongst its arma ments a strong corkscr w. It was piti fully short, but since it represente the difference between life and death he decided, grimly, that it must'suf-

He groped abou' above him. The planks ran right and left, parallel with the ladder, and he could find two inset cross-battens. The planks were strong but roughly joined. He selected

spot and set to work with the cork

It was a difficult and a nervous task. The wood was tough, and his implement fragile. The tool survived badly, drenched a, they were with fumes from the pit.

Inhaling slowly and cautiously, he held his breath and descended a step of the ladder. He pulled gently upon the steel handle of the knife. The trap responded, requiring little effort! He descended a step lover-and realized that his legs were plunged into the feathery, poisonous mass. But not he could grasp the edge of the trap. It proved to be carefully oiled, and

its opening was almost soundless. See ing above him the dimly lighted pass age, his first natural instinct was to alandon the knife and to climb out Illustrated Dressmaking Lesson Fer into cleaner air. But above all, Dawson Haig was a conscientious worker; and a scheme which was to have far-reaching consequences, in this very moment of peril took form in his brain.

Holding the trap with his left hand, noung me trap with ms lett hand, he detached the corkscrew, and, balancing perilously, slipped the knife into his pocket. Then, pulling the wooden frame fully down, and ducking to avoid it, he climbed up and reached the passage, above.

Gently, he allowed the tran operat-Geatly, he allowed the trap, operat-

ed by spring hinges, to rise again into place. He stood still, exhaling and inhaling, to free his lungs of those pois-onous fumes. We looked, right, along the dimly lighted corridor. He saw a closed door. He looked, left, into the room of the carpets. There was no

Quietly he stole out. Pocketing the spectacles of "Mr. Smith," Dawson Haig set out autiously to explore. And five minutes of exploration satisfied him. There was no one but him self in the shop of Mohammed-and it was quite impossible to get out! Heavy locked doors, iron-barred windows de
