## Open Letter

To All Dealers of Canadian General Electric Refrigerators:

1935 GENERAL ELECTRIC MONITOR TOP REFRIGERATORS COST FROM 10% TO 50% LESS TO OPERATE THAN ANY OTHER MAKE.

The above is a conservative statement which is amply verified by admissions of competitors themselves. These admissions were made in the specifications which each manufacturer was required to submit with their 1935 tenders to the U. S. Government. Every manufacturer of refrigerators was required to submit with his bid guaranteed data to show the true operating cost for the respective sizes of his machines. These figures were not guesswork but were the guaranteed statements made by the respective manufacturers on their own machines telling what they, themselves, guaranteed their machine to do.

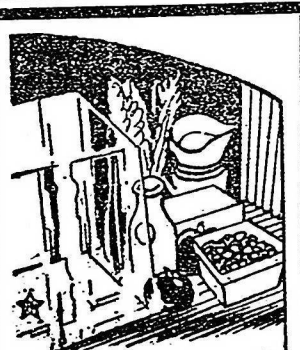

Again the statement was re-verified by comparative tests made by the Electrical Testing Laboratories of N. Y.

At least one of our competitors is endeavoring to confuse our straightforward statement by sending out a copy of a letter containing misinformation dated May 22nd, written by their U. S. affiliated company.

The true story is that the General Electric Company in the United States have chosen not to use this statement in their advertising in order to keep peace among the members of the N.E.M.A. and the competitor in question has seen fit to circularize misinformation.

That 1935 Monitor Tops cost from 10% to 50% less for electric energy than any other make has been verified and can be re-verified by anyone who will make a fair comparative test. In fact, there are several competitive makes of refrigerators on the market that take three times the energy of a Monitor Top after each has been in regular service for a period of a year or two. Your prospects are interested in saving money. Bring this powerful selling information to their attention. We are at liberty in Canada to use freely this statement that G-E Monitor Top Refrigerators cost from 10% to 50% less to operate than any other make.

Very truly yours,  
H. S. Brown,  
Household Refrigeration Division
