TRAVERSTON

Summer flu and an ugly kind of cold is causing a lot of trouble and suffering.

Rural school pupils wish there were no M.H. officers. Occasionally they do something for the sums they draw from the various municipalities.

The heavy frost on Sunday night struck low lying farms and gardens, others escaped unscathed.

Sorry to report Mr. Basil Davis laid up with an attack of pleurisy. Mr. and Mrs. Jos. R. Edwards and family were visitors with Mr. and Mrs. John Newell, near Durham the first of the week. Nearly all the fall wheat in this

vicinity has been sown in the past six days. Hessian fly in the fall and weevil attacks before ripening are causing later seeding than in bygone years.

A weather hoodoo has a pick at Durham fall fair, year after year. New fertilizer drills are the best sellers now, and will be in great demand in the future, the soil of Mother Earth has to be pampered to ensure a crop.

Time is flying fast, we haven't time to get our toe nails cut. Inspector G. H. Pentland visited No. 5 School on Friday and his report is good.

WHERE

Death takes a Holiday!

Suppose it were your loved one being made ready for the climax of this grim struggle with Death. Anxiously you await the outcome—hoping against hope—praying that these men in white will not fail. Your heart is in their hands, but all their skill, and all their specialized knowledge would be powerless should these operating room lights go out at a critical moment.

But those lights will not fail... nor will the power to operate the many delicate electrical apparatus used in modern surgery today.

Outside the operating room is an organization of highly trained Hydro men, whose duty it is to see that nothing is allowed to interrupt Hydro service, and to be ready for instant action in any unforeseen emergency.

The service which Hydro provides to, and widens the scope of, medical science in Ontario is the same service that brings so many comforts and conveniences within the rooms of your own home—lowered production costs to industry—greater utility and facilities to commerce—a greater measure of prosperity to all in Ontario.

The Hydro of today is striving to extend the benefits of low cost electricity everywhere in the Province, and to making every effort to still further reduce power costs. As a partner in this gigantic enterprise you should be vitally interested in these efforts.
