# Where Apples Get Their Rosy Cheeks

Chemical Substance Called 3-Galactosidylcyanidin is Said to Be Nature's Rouge; Effect on Com-plexions Studied.

According to chemical tests carried out by the United States Department of Agriculture, it is not rouge that puts the blush on the cheeks of apples, out a chemical substance that sports the awe-inspiring title of 3-galactosi dylcyanidin. If an apple merely has 3galactosidylquercetin it is usually yellow in appearance, but 3-galactosidylcyanidin is the stuff that makes one of those nice red skins you love to crunch. The tests have shown that this substance is present in yellow apples of the Grimes Golden variety but it is not identical with or respon thle for the vellow color of the skin In red apples the unseen coloring matter is acted upon chemically and changed to red idaein, which is a simpler name for 3-galactosidylcyanidin. They have not yet identified the conditions that cause this change from

Color Is Important Color in apples is important to grov ers and to consumers. For the grow er there is the practical advantage that well-colored apples are not nearly so subject to injury by storage scald as are apples in which the color is imperfectly developed. Buyers have a decided preference for well-colored ap ples, whether they are yellow or red and are willing to pay higher prices for them.. There is good reason behind the preference. For the consumer, good color is a practical and easy guide to selection of good ripe fruit.

The chemical changes that are essential to the formation of good color are the changes that are also required to bring fruit to maturity and to de velop flavor, aroma, and palatability. This research does not compare the merits of vellow apples and red ap ples. It does bear out the popular idea that to be good, red varieties ought to be red and yellow varieties

# Saves Village

British General Shoots His Savage Elephant After It Killed Two

LUCKNOW, India.—The coolness of General Sir Douglas Baird this week saved a viliage from destruction when his hunting elephant ran amok.

The beast threw and seriously in-jured his driver and then killed two villagers. Sir Douglas shot and killed the mad animal as it rampaged

through the settlement. Sir Douglas is general officer comnanding-in-chief, eastern command ndian army.

Water exists in three forms: liquid, solid, and gas. We can't see it in the be held in Sweden, Latvia, Lithuania latter form, since it is invisible steam. Luxembourg and Iceland. The date: The visible clouds which we erroneously call steam, are really vapor.

# Passenger Traffic Is Up 15 Per Cent

C. N. Railways Vice-President Reports Volume of Freight For Year 1937 Also Tops 1936 Fig-

MONTREAL, Jan. 11.-The volume of freight and passenger traffic car-ried over lines of the Canadian National Railways during the past year shows a considerable improvement ver that of 1936, Alistair Fraser, Vice-President in charge of Traffic stated in a review issued here las rcek.

"The year 1937 was one of steady progress in the volume of freight traffic handled, as well as changes and improvements effected in our ser vice to the public," said Mr. Fraser While there was a heavy falling of in grain shipments, resulting from the very light crop in parts of Western Canada, this was more than offset by the improvement in general busines resulting in an increase in freigh tonnage handled of approximately ter per cent. over that of 1936.

Progress In Mining Development "Mining developments in North vestern Ontario and Quebec have hown remarkable progress during the past year. The opening of that por-tion of the Canadian National Rail ways' new Senneterre-Rouyn line from Senneterre to Val d'Or on November 29 provided much-needed rall facili ties to the numerous mines located in that area."

Increased 15 Per Cent

Mr. Fraser stated that passenger traffic on Canadian National lines had shown an increase of fifteen per cent. during the year. "Increase in train travel generally resulted from the ward trend in spending power that was noticeable during the greater part of the year," he said. "Frequent low fare excursions between Canadian cities and towns, and to points acros the international border, brought hun dreds of thousands of people to the railway for short coach trips. Good rogress was made in the air-conditioning of our passenger equipment We have had air-conditioned standard and tourist sleeping cars, dining cars, compartment, observation and library ears, parlor cars, buffet club coaches and lounge-buffet cars in service for some time. By the purchase of fifty ir-conditioned first-class coaches o the latest design during the past year, we have attained the objective of having all principal main-line trains fully

## Motor League **Asks Severity**

For Recklessness — Recommends Jail Term at First

their first offense, the Ontario Motor of great activity. East Malartic Gold League has decided.

At a meeting of the executive comth impounding of the car and its license, plus a jail sentence for the driver convicted of recklessness, all artic property reports good diamond hese punitive measures to be taken drilling results. On the Lacoma pro driver's first offense. Needing Drastic Penalty

curbing careless driving, which claimed so many victims Christmas Eve. In the west section of the Province was an urgent one, which needed some drastic penalty. In accord with this suggestion was the Ontario Safety League. When told of the motor league's approval,

in agreement. "All you need now," he asserted, "is to get magistrates to act on this suggestion. That should be easy, provided public opinion demands it. If they

did, we'd get somewhere." Dealing With Human Lives "I feel very strongly about this question," he said. "You're dealing with human lives, and you can't afford to let it go unchecked. I think imprisonment should take place in any

There is a provision in the Highway Traffic Act which says that the mot vehicle driven by a person convicted of drunken driving may be seized impounded and taken into the custody of the law for a period of three nonths, but only on the third or subsequent offense.

The Ontario Motor League would have such a penalty imposed, more severe additions, on the first of-

### Cars Must Stop; Not For Skunks

Court Demands Charges be Laid If Animals Hit By Drivers

Magistrate P. C. Bergeron ruled in court at Cornwall, Ont., last week, that an accident will be considered such even if only a cat or dog is involved and that a motorist who fails to stop after striking an animal is laying himself open to a charge of accident-except if the animal happens to be a skunk when "it would be wise not to stop".

The magistrate's ruling was prompt ed by a legal argument that some time ago when a Charlottenburg Township farmer was charged with failing to remain at the scene of an accident after his automobile struck a dog. The charge was dismissed or grounds the farmer did not know his car struck the animal.

Mr. Bergeron maintained striking of the dog constituted an accident and said his ruling would stand unless quashed by appeal.

Water is at its greatest density at 39.2 degrees Fahrenheit, freezes at 32 degrees, and turns to vapor at 212 de

The marriage and birth rates England are increasing, while the death rate is decreasing, according to statistics.

A moto car, "complete with chauf-feur" and funds for upkeep, were the ghostly hand of George Washington gifts of the Boy Scouts of Holland to The retired admiral had head ed the Dutch Scouts since 1920. H.R H. Prince Bernhard of the Nether lands has accepted the post of Royal Commissioner for the Scout Association of Holland, as successor to Admiral Rambonnet.

When Manager John Murray of the Stratford midget hockey team found himself short a first aid kit for taking care of playing casualties he turned to the 4th Stratford Boy Scout troop. He was promptly obliged with a com-plete and up-to-date first aid box.

The Carneg'e Hero Fund Commission has awarded a monthly pension to the widow of the late Geoffrey R Milne, formerly a Scoutmaster of a St. Catharines Boy Scout Troop, who lost his life in an attempt to save Charles A. Moreau, a deckhand, from drowning at Sorel, Que. The Do-minion Medal Board of the Boy Scouts Association recognized the deed by the posthumous award of Scouting's V.C., the Bronze Cross.

What is said to be one of the fin est amateur astronomical telescope in Canada was presented to the Boy Scouts of Vernon, B.C., by Mr. Fred E. Lewis of that city. The instrument was made by Mr. Lewis.

During the summer of 1938 nati onal Boy Scouts Jamborees to which Scouts of other lands are invited will Luxembourg and Iceland. The dates for the Swedish Jamboree have been announced as July 28 to August 8.

was one of the unexpected concerns Admiral Rambonnet, upon his recent of the leaders of the Boy Scout Jamretirement as Chief Scout for Holboree in Washington last summer. Shortly before the 28,000 boys wer due to arrive in the U.S. capital, camp headquarters was called by phone and a much concerned femin ine voice, "on behalf of a committee of ladies," implored the Scout officials to do all in their power to prevent the boys "chopping the trees with their Scout hatchets." A somewhat similar appeal came from the office of the Fine Arts Commission or behalf of Washington's monument and public buildings. So there was a final enjoyed laugh at the Scout Jamhoree headquarters, after the last boy had left, when the committee of la des and the Fine Arts Commission called with the "good news" that not one sign of damage had been found anywhere.

A difficult question was left, how

ever: Whether American Boy Scouts beg to doubt the story of George Washington and his hatchet and th cherry tree, or whether, with respect to trees and hatchets, they presume to be more moral than the great Fa ther of their country. Whichever way

# Money Spent Was Boon to Industry

\$61,000,000 Spent By the C. N. R. During 1937 From Almost Ten Thousand Canadian Firms.

Purchases made by the Canadian Sational Railways during 1937 amount ing to over sixty-two million dollars from approximately ten thousand Can adian firms assisted very materially n bringing various branches of Cana dian industry back to normal conditions, R. C. Vaughan, Vice-President in charge of purchases, stores and steamships, stated in an interview at Montreal last week in which he reviewed the year's activities of his department.

"We expended considerably more for the purchase of material and sup plies in 1937 than in 1936," Mr Vaughan said. "That was necessitated by the increased business handled which required the running of more passenger and freight trains to meet the needs of increased traffic. Conequently, more fuel was burned and larger quantity of train and other "Ov: shops were also operated to

greater capacity during the year, which was necessary to meet the equipment requirements of the railway, and, therefore, more material was required for that purpose." Fifty First-Class Coaches

"Our total purchases of material in Canada in 1937 approximated \$62 506,000. Of that amount approximate ly \$15,140,000 went for new equip ment, and \$11,216,000 for Canadian fuel used on our locomotives and in our boiler houses, stations, coaches, etc. Approximately 315,700,000 feet of forest products were bought in Can ada by the Canadian National Railways in 1937, which consisted of ma terials for construction and repairs to equipment. buildings, etc. Of that quantity 225,700,000 feet are repre-

chted by track ties." During the year the following nev quipment was delivered to the Na tional System by car builders in Canada. Mr. Vaughan announced. Fifty first class coaches; 10 mail and ex-press cars; 2,665 box cars; 49 flat cars; 15 ballast cars; 30 and cars; 300 gondola cars; and 175 freight re frigerators. In addition, 125 freight re frigerators were built in C. N. R. shops.

Air-Conditioning to the Fore "During the year we had a heavy ir-conditioning programme in connec ion with our passenger cars, and 126 ars were air-conditioned." Vaughan added.
"In 1837 there was a substantial in-

crease in the price of some lines of material. but we are there will be recessions in price dur-ing the year."
"The expenditure by the Canadian National Railways of such large sums of money in Canada has meant many

million man hours of work for our

Canadian citizens and has done much

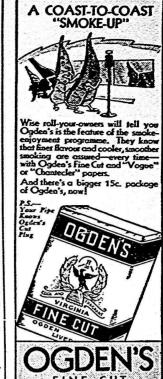

to assist various branches of Cana-

dian industry back to normal condi-Lead pencils are made of graphite and clay. The name comes from the old days when people wrote with

The knotted spiral nebulae thrown off by the sun in the formation of the solar system began drawing the outer particles, or planetesimals, to them. Thus the earth grew after it first was formed.

# A MISTAKE

WHEN "ACID INDIGESTION"

ALWAYS The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, pepper-mint flavored tablets—in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoonfuls of liquid Phillips' from the bottle. At once you feel "gas." nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

### MAKE YOUR LIVER Produce its bile

Your liver has a big job to do. Make it do that it is supposed to. Its job is to produce 8 to 36 fluid ounces of bile every day and end it through the system. It it falls down its job you suffer. AND HOW!

The most effective stimulant for the liver nown to medical science is calomel, which is mail doses is of the highest use in congesive conditions, especially three due to oversiting, over indulgence in alcohol, lack of excise, etc. Tanol Tablets contain a certair roportion of calomel, blended with cascarrand of ther medicines.
