# AT HOME 20 WEEKS WITH RHEUMATISM

## Wife Feared Husband Would Never Work Again

When her husband had been at home 20 weeks with rheumatism in his back, this woman began to think he would never work again. At last, she said to him: "Let's try Kruschen," and the change that took place was, in her own words, "like a miracle." Here is her letter:

"My husband is subject to rheumatism and suffered terribly with his back. Some time ago, I had him in the house 20 weeks with it. I really didn't think he would ever work again. We tried all the different kinds of salts you could mention, but none of them did him any good. Then I said, 'Let's try Kruschen.' Since then, we have proved Kruschen Salts to be worth its weight in gold. My husband is back at his job, thanks to Kruschen. The change it made is like a miracle."—(Mrs.) B.

Two of the salts in Kruschen are the most effective solvents of uric acid crystals known to science. They swiftly dull the sharp edges of the painful crystals and convert them into a harmless solution, which is then expelled through the natural channels.

## Signs Point Out Onset of Stroke

### Curb Is Found For Apoplexy — Within Foundation Able to Foresee and Prevent It.

Apoplexy, the "stroke" which heretofore has killed without warning, can now be foreseen and warded off, the American College of Physicians was informed recently.

Eight definite signs, which foretell the approach of one of these apoplectic strokes (cerebral hemorrhage) were described by Dr. Albert S. Hyman, director of the Witkin Foundation for the study and prevention of heart disease.

A treatment which reduces blood pressure has been developed by the foundation and proved to be effective in 81 per cent. of the cases treated," he said.

## Being Hard-Boiled Is Not Desirable

### Preacher Editor Thinks Sentimentality Is Great Need In Life

The words "hard-boiled" have become too common in world affairs. Rev. Robert Graham, B.A., associate editor of the New Outlook, declared in a sermon to young people at a special service at Bellefair United Church, Toronto. Mr. Graham said that it was a sad state of affairs when people denied the presence of sentiment in their lives.

"Some people nowadays profess dislike for sentiment," he said, as he pointed out the prevalence of the self-confessed "hard-boiled" person. Sentiment in writing, reading or thinking has come to be looked on as something childish, he said.

"Nothing But Machines" "Hard-boiled" are two words that have become too frequently used of late and too many people love to boast that they are "hard-boiled" he said.

As a matter of fact, he said, it isn't anything to boast about, for the man or woman who does not possess a heart and cannot feel sentimental at times is dead.

"And the man or woman or business firm who knows not sentiment are nothing but machines and they do not know the real glory of life," he added.

# ... Gardening Notes ...

## QUICK GARDENS

There are hundreds of annual flowers which may be satisfactorily planted by the person who is not going to stay long in one place. These annuals will make their full growth in a few weeks and bloom profusely from next June until frost. Vegetable gardens, too, can be developed in a few weeks and will give ample returns in the same year.

Even a fair layout of grounds can be carried out by a tenant. Quick growing grass will make a very fine lawn in less than six weeks and one infinitely better than a patch of mixed grasses and weeds. Instead of permanent shrubbery and climbers, a perusal of any good seed catalogue will disclose many bushy annuals among the flowers and some climbers which grow up to twenty feet in a few months. There are at least a score of big, bushy annuals which reach a height of from four to seven feet and can be used for screening just as effectively as tall, slower growing shrubs.

## EARLY VEGETABLES

The first of the garden peas, leaf lettuce, radish, and spinach will be among the earliest vegetables sown. These may be planted as soon as the ground is fit to work. All of the first named seeds should be sown at three times, at intervals of ten days so that there will be a succession of vegetables. The second sowing will be carrots, beets, onions, potatoes, etc., that can stand a little frost, and then the beans, corn and tomato, cabbage and cauliflower plants, etc., which kill with frost. Final seeding or planting will be those hot weather vegetables like lima beans, squash, well started egg and pepper plants, cucumbers, melons and similar things.

## WHY WE CULTIVATE

A constantly cultivated garden, will seldom be affected by drought. This

# HAVE YOU HEARD

God's best gift to a man is a loyal, faithful wife and his best gift to her is a husband who has the desire, the ability and the opportunity to work. care for her, and make her happy.

There was a loud knock at his door, and the doctor, who had just settled down for a nap, got up indignantly. Doctor (to little boy standing outside)—"What is it?"

Boy—"I've been bitten by a dog!" Doctor (crossly)—"Well, don't you know that my surgery hours are from 3 to 7?"

Boy (sadly) — "Yes, but the dog didn't."

Patsy—"You say you want to re-duce? Why don't you try gel?" Fatsy—"I tried that once, but it's no good. When I put the ball where I can see it, I can hit it, and when I put it where I can't hit it I can't see it."

## The Real Test

Thoughts, no matter how great they may be, Of life form but a fraction; Thoughts alone are worthless, you see, Unless they are backed by action.

A homely young Englishman, whose view was obstructed by the headgear of the girl in front of him, ventured to protest:

Young Englishman (leaning over)—"See here, Miss, I want to look as well as you!"

Young Miss (in a rich cockney accent)—"Oh, do you? Then you'd better run home and change your face."

Boozy—"I presume that when your son went to college he was inoculated with the love of learning."

Woogy—"Yes, but it didn't take."

## Read It Or Not

Gorillas, like human beings, are right-handed normally.

Proprietor of Mountain Hotel (to newly arrived guest)—"This is your room, sir. If you want a fine view over the mountains, put a dime in the slot and the shutters open for five minutes."

## Stick To It!

If the task is mighty tough — Stick to it.

If the way is long and rough — Stick to it.

Overcome it, mile by mile. Meet its hardships with a smile. Courage is the thing worth while — Stick to it.

Professor—"If I have talked too long, it's because I haven't watch with me, and there's no clock in this hall."

Student—"There's a calendar behind you."

Most people don't mind doing a little charity work secretly, says an exchange, if they're sure they will be caught at it.

Edith—"What did you tell Clarence when he asked you for a date?" Ruth—"Maybe yes, maybe no."

Edith—"Then where did he take you?"

Wife (at breakfast)—"Could I have a little money for shopping today, dear?" Husband—"Certainly. Would you rather have an old five or a new one?" Wife—"A new one of course."

Husband—"Well, here's the one — and that makes me just \$4 to the good."

## Unicorn

(In The Christian Science Monitor)  
Only the unicorn  
Only the doe.  
Only such lunar  
Creatures know  
How from a silver  
Vale to feed,  
How to pluck  
The tiny seed  
From the earth  
And how, being weary,  
To eat of the root  
And feed on the berry.  
Only the unicorn,  
Only the doe,  
Flanked by dawn  
And flecked by snow,  
Shall in a dream  
Of velvet run,  
Out of the night  
And into the sun.  
—HAROLD VINAL.

## FORGET-ME-NOTS

A few sweet herbs in a corner of the garden will be welcome kitchen material. They are inexpensive when grown from seed.

The brilliant orange coloring in carrots, called carotene, is the sign of high vitamin content scientists tell us.

The best way to assure an adequate supply of cut flowers is to plant a few rows in the vegetable garden.

See that your tools, mower and lawn roller are in condition for service. A little oil here and there will remove and prevent rust.

Plant at least a few of the outstanding novelties this year. Many of them are improvements over old varieties, and will be a welcome change.

Don't pass up a garden because you have but a small space of ground, or because you think the soil is too poor. Any small area will raise something, even if only a bit of lettuce and radishes, and by following one crop with another, you can have a whole season's supply.

Issue No. 17—'38

# Seas May Become 150 Feet Deeper

Then Montreal Must Be Moved Inland, Declares Noted Geologist, Dr. A. P. Coleman; Lake Ontario's Bottom Tipping.

Toronto is to have a warmer climate; the temperature will be four or five degrees higher on the average, according to Dr. Arthur P. Coleman, professor emeritus of the University of Toronto, and one of the world's leading geologists.

Toronto he sees as an important inland port because the ocean will be 150 feet deeper. The bottom of Lake Ontario will continue to tip, forming marshes in the Humber and in other rivers flowing into it near Toronto.

## Memories of the Ice Age

All this will happen thousands of years from now, for Dr. Coleman speaks in thousands and tens of thousands of years.

About 16,000 years ago, ice lay over Toronto's Scarborough bluffs, he said to the Toronto Star. That is why Toronto remains for him the most interesting part of the world. In the rocks of Scarborough and the Don Valley he can read the history of past ages.

His studies of Toronto's prehistoric history have produced the theory at the bottom of the Lake Ontario is tipping. The evidence is that the lake has overflowed its southern shore and marshes have formed in the Humber, Credit and other rivers near Toronto.

## "Will Be Warmer"

"It will be warmer here," he predicted. "The climate will be like Pennsylvania or Ohio. As the ice melts the temperature gradually rises about one degree a century. When the ice has all melted the oceans will rise 150 feet—Montreal will have to be moved inland — Toronto will be nearer the ocean."

"It is dangerous to prophesy," Dr. Coleman added, "but none of us will be here to see these things."

## Hypnosis Offers Newest Approach

### To Healing Art — Physician Allowed to Influence Subconscious Directly By Planting "Ideas"

Hypnosis offers an approach to many psychogenic difficulties since it allows the physician to influence the sub-conscious directly. Dr. James L. McCartney, psychiatrist at the New York State Vocational Institution, Catskill, N.Y., said last week in a paper read at the closing meeting of the American College of Physicians. The dissociation brought about by hypnosis, said Dr. McCartney, may serve as a "getaway" past resistances and allows approaches to problems "which otherwise could not be attacked."

"Under hypnosis," he added, "it is possible to implant therapeutic ideas upon the 'subconscious' and to have them take effect when endless numbers of suggestions given in the waking state would be given no heed or even actively resisted. Under hypnosis the patient accepts therapeutic suggestions and acts upon them without conscious awareness, and without building up defense reactions."

Contrary to the popular conception of hypnosis, Dr. McCartney explained that the application of hypnosis requires no unusual personality or "strong will" on the part of the practitioner nor "weak will or feeble intellect" on the part of the patient. He said that on the "best" subjects were highly intelligent patients with good powers of concentration, younger adults or adolescents being more receptive.

"The experienced individual," Dr. McCartney said, "is often surprised by the dramatic results that unexpectedly occur in cases he may consider beyond help. A long standing paralysis that has resisted all other forms of treatment may immediately recover under hypnosis. A case of amnesia may be awakened into reality. An insomnia case may sleep like a baby."

## Flock of 1,600 Whistling Swans Was Seen in Maryland by Group of Wildlife Observers.

A flock of 1,600 whistling swans was observed at the famous waterfowl grounds of the Susquehanna Flats, near Havre de Grace, Md., by a group of staff members of the United States Biological Survey and conservationists who attended the third North American bird conference held recently in Baltimore. For that spot, says the New York Sun, this was an unusually large concentration of the handsome, white-plumaged, black-billed and black-footed birds. About 4,000 ducks, including black ducks, mallards, American mergansers, golden eyes, baldpates, pintails, green-winged teal, canvas-backs and scaup were also seen during the day's trip. The chief guest was
