"And they bring him unto the place, Golgotha, which is, being in-terpreted, The place of a skull." Golgotha simply means "skull" as Mark himself explains for use. Thi place was probably given such contour. The site cannot be identif led with certainty. There are only two places that can be seriously considered to-day as the site of the church of the Holy Sepulchre skull-shaped knoll above Jeremiah's grotto, outside the present north wall of Jerusalem.

When pressing your clothes, never rest the iron on the right side of your material, as this will cause a shine. Most pressing is done on the wrong side. If it is ecessary to press the right side always cover with a pressing cloth. Be sure your iron is not too hot when you start to press a dress. There are few marks harder to remove from a garment than scorch, aside from the fact that it weakens your material.
