Gardening

NO HURRY does not apply to the hardiest vegetables or flowers or to grass seed. These should be sown just as soon as grass it fit to work.
A SHORT CUT

For a short cut the gardener i lar varieties wanted are in th boxes of plants bought.
Among the flowers which

be purchased as started plants are cosmos, zinnias, petunias, mari-golds, salpiglossis, nicotine and a hest of others. Cabbages, celery, tomatoes, head lettuce, egg and pepper plants in the vegetable are all cold as started plants. MOST FOR MONEY

Those with only a little land to spare should concentrate on those vegetables which give the biggest returns for the smallest space oc-cupied. • Among such kinds are beans, carrots, onions, lettuce, swiss chard, spinach, cucumbers and beets. In the lesser-known regetables are leeks, egg and pepper plants, broad beans and cos lettuce. These can all be grown in almost any part of Canada. Experts advise the inclusion of some thing new in the vegetable line each year so that variety can be gradually widened.
