born, she was quarried!" Arriving at a strange hotel. fussy woman thought she'd better now where the fire-escape was. So she started exploring. During her tour, she opened a door and found herself in a bathgoom occupied by an elderly ger

tleman.
"Oh, I'm sorry," she twittered, "I was looking for the-fire-es cape."
Continuing her search, present y she heard the pad of bare fee chind her and a shout made he turn. It was the elderly man, clad

n a bath-towel.
"Wait a minute!" he gasped "Where's the fire?" David loved bread and jelly. His mother usually pur-chased sliced bread. One day she bought a loaf of unsliced bread. When he saw her apply the butcher knife, he ask-

"What's that bread all stuck together for?" The two friends were discussing motoring as they sat in the club. "I was once buying second-hand ear from a garage owner," said one. "Of course, he praised it up, as I was a novice. But I found a way of discovering absolutely all its faults."

"How?" asked the other "Why." went on the first. "I had it on trial, and took it to another car-dealer and asked him

Who remembers way back A man in debt got out again?

Feathered Hats Quite Popular

Feathers, made into colored oak eaves and butterflies in natural colorings develop several small shapes, while a "half hat", to be posed over a veil-draped head, consists of 48 tiny colored birds. Burned goose, ostrich and cog are strongly endorsed. An ostrich model stemming from Victorian inspiration trails more than ard of tied willow ostrich down the back. Cog feather hat and coq and various other types of feathers, including quills, wings and birds accent many of the colored suede hats.

Where Many Canadians Spend A Pleasant Winter

Scenes like this are common on Brentwood Bay, near Victoria, B.C., all winter long, with particular emphasis this fall and winter when Canadians are keeping Canadian dollars in Canada. Grilse, like the 12 pound er just brought to gaff, and salmon in the tidal waters, coupled with keen fly fishing in "up island" stream combine to make the west coast a winter fisherman's paradise. Reports flowing into Canadian Pacific offices, and reservations at the Empress Hotel, indicate a heavy vacation travel to Victoria this winter.

MEDICAL!

PARADE ...

For whatever reasons-religi ous, political or commonsense-the people of Quebec voted to turn Premier Maurice Duplessis out of office, the results of the recent provincial elections were u deniably gratifying to Federal Liberal leaders. And whether or not Duplessis' defeat on October 25 could be interpreted as 2 sweeping victory for Quebec par-ticipationists, the position of the Dominion Government taken with respect to the war in Europe was respect to the war in Europe was immediately strengthened. That day saw Canada present a united front riong with the other coun-tries of the Empire. And from that moment on, we were in the

The vote in the Unked States Senate, 67-22, in favor of repealing the arms embargo clause of the Neutrality Act pointed to an early assent by Congress to Pre-sident Roosevelt's bill. The adoption of the revised Act, with ke "cash-and-carry" clauses, will be of indirect but vastly importan aid to the Allies; thence may bring the United States a step nearer to participation in the war.

Of the situation on the Western Front, John O'Donnell of the "New York Daily News" wrote: "The war is a washout—figuratively and actually." Heavy rains, alternating with sleet and snow, made the lines a mass of mud, and military operations on both sides were again almost at a standstill. On the political front, bigges

news of the war's eighth week came when Benito Mussolini sensationally dismissed seven of his-pro-German Cabinet Ministers, the secretary of the Fassist party and the chief of sinflict the his and the chief of staff of the Ital-ian army. Before the full effect of this shake-up on his former Axis-partner Hitler could be appraised, the world turned in watchful waiting to the sessions of Russia's Supreme Soviet from which a declaration of the U.S. S.R.'s foreign policy was to come forth, clarifying Germany's posi-tion, whether of strength of of weakness in the war. Many puzzling questions were expected to be answered: how far Russo German co-operation extended in the economic, diplomatic, military fields; what Russia's new policy publics, and the war in general.

In the Fer East, all eyes were on India. Native leaders there (Nehru and Gandhi in particular) felt it unjust that India should be called upon to fight for de-morracy in Europe while being denied independence themselves. Mahatma Gandhi's National Con-gress Party which controls eight provincial governments in Politich provincial governments in British India threatened resignation of all its Cabinets. This would force the Government to call upon leaders of the opposition to form new governments, while Gandhi foldovernments, white Ganam tot-lowers, retaining a majority in the Legislatures, could vote down the new Cabinets one after anoth-er. A civil disobedience campaign, naugurated again in India, would be as serious a threat to the Brit-ish Empire's existence as Adolf

How Daylight Saving Began

As A War Measure "Summer Time" Came Into Force In Britain In 1917

A great many things have beer blamed on war, but those who are opposed to daylight saving time be lieve that is the greatest piece of confusion left in the wake of the last Great War. Daylight saving time was adopted in Britain during the last war, in the spring, summer and early autumn months, in an effort to save fuel ordinarily used in heating or lighting. The encyclopaedia Britannica says that "in the second year of the Great War nearly every country in Europe adopted the device of puttingthe clock forward one hour during the spring and summer and aut months. The motive was to get the people to bed an hour earlier and out of bed an hour earlier.

to save fuel for lighting and heat-The first suggestion of a daylight saving scheme was made in England in 1907 by William Willett. In 1908 a bill was introdu into the British House of Com-mons but it was not adopted until 1916 when the British Government set up a committee to study ways and means to save fuel.

The United States adopted daylight saving time in 1918 but it was repealed in 1919 because of considerable opposition. The move was adopted in Canada in 1924-but was

Canadian Hog

Quality Better

The quality of Canadian hogs, a

indicated by grading results, has

been steadily improving ever since

the inauguration of the National Bacon Hog Poll y instituted by the

ture in 1922 and this improvement

has rapidly increased within the

past few years through the greater stability given the Canadian hog

industry by the establishment of

the bacon quota with Great Brit-ain. This is shown by a compari-

son of the years 1934 and 1938. In 1934 there were 3,025,161 hogs all

graded, of which 19.1 per cent, of

them were selects; in 1938 the number of hogs graded was 1,940,-

161, showing the percentage of sel-

ects at the increased figure of 29.5.

These figures refer to live gradings, and the smaller number of hogs shown for 1938 is due to the

fact that 1,305,324 hogs were grad-

ed as carcasses in that year.
An important factor in hog im

provement has been the carcass

grading service, inaugurated in the year 1934 as exemplified by the ac

celerated increase in desirable

when this system of grading reach-

ed considerable proportions.

One of the greatest difficulties

in selecting suitable bacon for ex

of hogs marketed at undesirable

weights, but even this situation is

MICKIE SAYS—

Ontario Cities Have Large Classes In Technical Work

Twice a week 34 Toronto girls forget their business careers, and Now that shotgun shooters in Ontario and the rest of Canada are blazing away at those fast flying ducks, a word or two on what has helped to increase the climb into overalls or smocks and delve into the mysteries of spark plugs and carburctors.

They are learning about cars from the inside out in a course of flocks these last few years would motor mechanics so they will be prepared if they are needed to not be entirely out of place.

The answer lies in two direcdrive ambulances or take men's tions: the establishment of refu-ges and the curtailment of shootplaces in mechanical jobs during

the war. Cars From Inside Out For six months the girls—school teachers, stenographers, store clerks and all with jobs — will spend three hours or two nights a week at the northern vocational school, Ordinarily women are excluded from the motor wechanics' class at the vocational school and applicants have been few in past or instruction became numerous G. E. Mahn was put in charge of a class for r. v.m. The class was originally planned for 20 and now has 31 students.
A similar class for women mechanics has been organized in the

To Fix Lawn If You Would Ensure A Good

Growth of Grass Next Year Proper attention to the lawn-in the far will help to ensure a good

growth of grass the following year. Lawns should be allowed to go into the winter with a considerably longer growth than is maintained all during the summer. The cutting bar of the mower should be raised and clipping should be done less-frequently than during the earlier part of the season when growth is nore rapid. Mowing should stop altogether before the weather turns cold.

Stop Mowing Altogether The use of a fertilizer mixture containing a small percentage of nitrogen but considerable amounts of notash and phosphorus is recommended at this season. Such treatment will help to build up the strong root systems. All fertilize after; application as otherwise the burning of the grass may result.

Don't Cover Grass

On no account should coverings be applied to protect the grass dur usually do more harm than good to the grass. Whenever possible, a so as to prevent the accumulation of water on the lawn in the latfall or early string.
