# HEALTH TOPICS

SUN STROKE VICTIMS During very hot weather, most of us try to keep out of the sun be-cause we wish to avoid sunstroke. but we should try to remember also tration may occur in the home where we are shielded from the rays of the sun. Sun stroke and heat exhaustion are two different ai ments and require somewhat dif-

ferent treatment. In sunstroke you may feel tired toms occur. These are headache, a feeling of oppression, sometimes a tightness in the chest, great thirst, restlessness, frequent desire to pass urine, hot skin, a "sicky" feeling, flushed face and high temperature

finally unconsciousness.

Treatment in sunstroke is to lay the patient in a cool, shady place, off the ground if possible or on the ground on newspapers or clothing if no bench or table is available. Cold cloths are then applied to the back of neck, face, and chest, cloth ing removed, body sprinkled with water. The head should be kept up high and patient fanned with a tov patient is able to swallow, some cool water containing a pinch o salt should be given.

# - HAVE YOU HEARD?

Grandma Jackson and her young grandson were riding on a train. Grandma had dozed and suddenly she sat up. "What was the station the conductor called? she asked the boy. 'He didn't announce any s tion; he just put his head in the

door and sneezed."

"Get the bundles together quickly," said Grandma. "This is hkosh."-Christian Herald. -0-

newspaper asked his readers to send in remarks on the ubject. "Books that have helped me." One of the replies war: "My mother's cook book."

The much preoccupied custom-er walked into the barber shop man who was having her hair "Haircut, pease," ordered th

"Certainly," said the barber. "But would you mind talking off your hat first?" The man hurriedly removed his hat. "I'm sorry," he apologized as he looked around; I didn't realize there was a lady present!"

Hostess (gushingly) "You know, I've heard a great deal about you."

and leaves the skin soft and glow-ing. Here we find Miss Turner drinking a large glass of cold milk (not mixed with cold cream). This proves that it is just as good inside as outside.

Nearly Two-Thirds of Canada's Wood Pulp Production Is "Groundwood" - Used in Making Newsprint Paper

roundwood pulp is obtained l the rubbing action of wood held by pressure against a rotating grindstone which has a pattern imprin the pulp produced depends on th moisture content of the wood, the speed of rotation of the stone, the pressure of the wood against the grinding takes place. Spruce, balsam, and, on the Pacific Coast, the Canadian woods used for the manu ern hemlock and jack pine are used to a limited extent, and poplar is also ground to make a bulky sheet. The total preduction of woo pulp in Canada has reached much as 5,000,000 tons per year and the value often exceeds \$100,000 000. Nearly two-thirds of this quar tity is groundwood pulp, and abou 80 per cent, of the groundwood pull is used in making newsprint paper one of Canada's most important e

# Tobacco Crop Said Lagging

Ottawa Reports It's From 10 To 14 Days Behind Schedule

The tobacco crop as a whole it Ontario is from 10 days to two weeks behind normal growth sched ule, the Dominion Bureau of Sta-tistics reported in its second seasonal report on the 1940 comme cial crop of leaf tobacco.

Excessive rainfall and cool wea ther during most of June and the siderable rootrot and stunting in the tobacco crop. With weather conditions more favorable during the past fornight, most fields of to

average.
TOO MUCH RAIN, COLD Planting was unusually delayed by the late cold spring in Quebec and growth was slow owing to low emperatures, dull eather and the heavy rains in June. Resulting from warmer weather during the past 2 weeks, the crop has shown much Improvement but is still about two weeks later than normal.

covery but the crop is still below

Cutworms have inflicted heavy damage, especially to the flue-cured crop and several fields of flue cur-ed tobacco were destroyed by the strong winds in June THE WAR-WEEK-Commentary on Current Events

### Determination One of Britain's Greatest We a pons: Canada's Training Plan

GREAT BRITAIN: The German offensive against Britain became somewhat stronger last week and somewast stronger last week and bombing in streets and congested areas resulted in many casualties in the scuth of England. Reports say that the Nazi have cleared zones across the channel along the coast of France as military opera-tions extend some hundred miles inland. This zone of activity ex-tends from Dunkirk to Brest, opposite Plymouth, and the southopposite Plymouth, and the south-east corner of England. In spite of heavy bombing raids Britains are prepared to deal with the enemy and anti-aircraft batteries and the R.A.F. have been in con stant combat with effectiveness, downing satisfactory percentages

Britain's blunt rejection of Hitler's "peace" advances were fol-lowed by the preparation of an "eight-point peace program" by Hitler and would indicate that Nazidom is more anxious to end hostilities than it cares to admit. The best offer Hitler can make therefore, is a return to the pr September status quo, perhaps with some concessions to the Czechs. This, though a far cry from the eight points which would leave his boundaries as they are at present, would assure Herr Hit ler of continuing as Fuehrer. It is not rash to assume that he is ready, if not eager, to strike a between those extremes

Britains to rid Europe of the

THE BALKANS-The German warning to King Carol of Ruhe is or is not King. He has been playing both ends against the middle for so long that there is little left for him to attempt fur-ther. He must settle differencewih Hungary and Bulgaria before September 15th, so say the Axis Powers. Failure to meet this deadine, authoritative quarters say, may result in intervention by Reports of the German war

ing were circulated as Juliu Maniu, leader of Rumania's powerful peasant party, arrived at Bucharest from his home in Tran sylvania to oppose any concessions to Hungary or Bulgaria. Sources close to the government had indicated that Rumania migh try a compromise solution of Hungary's claims to Transylvan ia by offering to cede the three border cities of Satu-Mare, Or adea and Arad and arranging an exchange of populations in other districts. Maniu pointed out that Rumania's chief strength in op-

posing Hungarian and Bulgarian demands lay in Germany's desire

to maintain peace in the Balkans Hitler and Mussolini are extend ing their domination down the more than ever imperative that she should maintain her control the Battle of Britain reaches far beyond the British shore. Gibraltar (gateway to the Atlantic), Malta and the Suez Canal are

than they are now.

CANADIAN DRAFT FOR HOME DEFENSE: The details of Canada's Home Defense Policy were outlined in the House of Commons on Monday, July 29th by the Hon. J. L. Ralston. One of the most important of our war ef-forts is rapidly taking shape and the present plan is to train 200,000 men for home defense yearly at the rate of about 30,000 a month Mr. Ralston explained. These men will be trained in thirty or mortraining centres across Canada, each of which will handle about 1,000 men each month. The 300,-000 figure for a year set by Mr. Ralston is apparently prediced on doubt whether training can be carried on during the two midwinter months. "It is unlikely that married men will be called during the first year," he stated. There are to be no exemptions from service. Physically fit men regardless of their occupation, are to report when their classes are called. The first class is to report about October 1st.

MINIMUM DISLOCATION TO INDUSTRY: There are difficult ies in withdrawing so many me from the normal life of the com munity even for the comparative ly short period of thirty day's training, but difficulties cannot to be reached. The plan has been worked out so that it can be speeded up or slowed down a vents require.
NO DISTINCTION TO BE MADE BETWEEN NEW RE CRUITS AND REST OF MIL ITIA: It is important that from these men drafted be regarded as As recruits they will pass direct

ly into the militia regiments. No distinctions shall be made excepthan the men called under this plan will not be available for duty outside of Canada unless they volunteer for such service. NAZI UNEASY As part of a mighty Canadia army which will be available to defend the county, they will share its traditions and be the cus odians of its honor. THE AMERICAS TO PREVENT AXIS POWERS FROM CON-TROL IN COLONIES Students of history will no ave another date to memoriz in the future. The plan to pro-tect territory in the Western Hemisphere now belonging to

European powers, was embodied in a draft resolution last week, called "The Act of Havana" and provides that The American Re-publics may establish "regions of provisional administration" in any

nations which are in danger of be coming the subject-matter of ex-change of territories or sov-ereignity. Thus the 21 American Republies have prepared to back up the Monroe Doctrine with whatever force is necessary to prevent American territory ruled by European powers falling into the hands of Germany or her Its implications mean that for the first time in history the arm-

ed forces of the United States can be used to protect any part of the hemisphere without incurring any liability or charges of imperialism, since the United States Government would be acting on be-half of all other republics. Since the United States is the only Republic in this hemisphere with a navy strong enough to prevent an nvasion or to prevent any power rom taking over the French and Dutch possessions, the resolution was considered to nominate the United States as the hemisphere's THE FAR EAST

THE MEDITERRANEAN-The hard-handed briskness with which Balkan peninsula increases the threat to Britain's great interests in the Near East and makes it of the Mediterranean which Italy is challenging. Bombs over England tend to obscure the fact that tish Empire. The British are guarding the

Suez canal as zealously as they are their own home shores. Inessity of maintaining such strong naval and air forces in Egypt Gibraltar and Malta, the home defenses would be much mightier

RECRUITING FOR OVER-SEAS SUSPENDED: Mr. Ralston indicated that during the period when Canada was mobolizing new army for defense, recruit ing for overseas service would be stopped. "It must be remembered," he said, "that there is at the present moment no shortage of manpower in England; the real demand is for equipment. England Expects Every Man To Do His Duty

Doing his duty for his country, here, is a 15-year-old lad named Fiske who takes great pride in showing King George his handiwork during the visit by the King to a royal ordnance factory. The youth is one of the youngest workers in the factory, and very likely one of the youngest factory workers in all of England. He works in the bullet-making shop.

had rejected unconditionally re-cent Japanese overtures to hait embracing settlement between the two nations — largely at the ex-pense of third powers interest in Eastern Asia. These informants said the Japanese proposals included the following:
1. Outright cession by China to Japan of five provinces, Hopei, Charhar, Shantung, Shansi and

Suiyuan.
2. Recognition of Wang Ching Wei, Japanese sponsored puppet, wet, Japanese sponsored puppet, as president of a Chinese repub-lic made up of the remaining provinces and also British Burma, French Indo-China and Thailand (Siam), in which China and Japan would share economic op-3. The status of Manchukuo would be left in abeyance in-

definitely. JAPAN: In the meantime some dozen British subjects were arrested in Tokio by Japanese police and are being held in connection with Japanese military secrets. The reply to Sir Robert Craigie's protest said the arrests were "the first step" against a British espionage network covering the entire country. Authoritative sourcsaid they understood that Craigie in protesting against the arrests had touched "on the fact" that a strong German Nazi party organization exists in Japan, "well instructed" in propaganda and political activities.

Indignation is being expressed in London and demands are being

FAIRS MUST CHANGE OR DIE There is no good reason yet for cancelling a fair, but there are lenty of reasons why the small ownship fairs should be reorgan ized, refurenated and made to re their constituencies. Times have changed tremendously. The town ship fairs must change or die. FARM LABOR SHORTAGE

One of the pressing problems a the present time is a shortage o farm labor throughout Ontario. Ac ording to an official of the Ontario Department of Agriculture, many hired men have enlisted in the arm out adequate manpower at a very inopportune time. Farmers' sons have also deserted the farm for the army. The department is endeavor ing to meet the situation by rushing school boys, registered with the lengriment as available for farm work, to the localities most in the need of help. All along it has been ontended that it takes longer to train a man for farm work than for oldiering, so that the seriousness of the situation facing the farmer should not be minized. — (Simcoe
