## Modern Etiquette BY ROBERTA LEE

1. How far in advance should a man telephone a girl to ask her for a dinner date?
2. When it is necessary discharge a servant, shouldn't one give this servant a good re-

ference, if possible?
3. Does a well-bred man ever discuss a woman of his acquaintance with other men or women? 4. If a young man deliberately breaks a date with a girl, without a plausible excuse, then asks her for another date, what 5. When someone compliments you on the suit or gown or hat you are wearing, what should you say? 6. Is it correct to answer private telephone by saying "Hello"?

1. One day ahead is sufficient If she is engaged for that evening, he may ask her what even-ing she will be free. 2. Yes. Anyone who is fair and consider ate will do so without being asked. 3. Never. 4. Decline the invitation. 5. "Thank you" is sufficient. 6. Yes; that is the ac-

## Home Plan Styles **Change With Time**

Trend To-day in House De signing Is Toward Placing Kitchen and Garage at Front of House - Living Quarters at Rear

ot just for today but for the future, so in designing or selecting a home families will benefit by considering architectural trends, the Federal Housing Administration suggests.
YARD AT REAR

There is a growing movement today to place garage, kitchen and service facilities at the front o the house and to move living quar-ters to the rear. Houses are being moved forward on the lot, allowing greater use of the yard as add tional living space. The uniform and houses are being placed so that each home will be separated as widely as possible from the

neighboring dwellings. Improvements in the design of so-called "modern" houses, new materials, and new methods of building are helping to broaden the acceptance of modern styles of ar

## Safer To Fly Than To Walk

Than Those Which Take Toll of Pedestrians

No mode of travel carries an a

solute guarantee of safety, says the Galt Reporter. Probably more the simplest form of locomotio provided by nature, walking, than by utilizing swifter modes of trav el, such as airplanes. Death comes to them individually. A pedestrian here, knocked down and killed by an automobile. Another, thousand of miles away, slins on an icy nav the fall. These isolated incidents death attract little attention. few paragraphs in the local papers and that is all, unless the person enjoyed national prominence. We accept these fatalities as the

logical consequence of the hazards we must continually meet in this risky business of living. Fatal train wrecks and airplane crashes receive a prominence ou of all proportion to the really few alities directly attributable to these modern modes of travel. The ingenuity of man has made it safer to fly than to jay walk across the ice-encrusted street of a busy city thoroughfare. However, certain hazards remain, and one of several possible ones turned the westbonne flight of the Trans-Canada Airline plane into a tragedy at Armstrong

the other week, a tragedy in which 12 lost their lives. Previously, 81,000 passengers had been carried by T.C.A. without in-Jury of any kind. A total of 8,165,-600 miles had been flown in creating this splendid record.

# Saving Ontario's Natural

potent destroyers of mice. It arshes. The only place when I have ever seen it was Cataraqu marsh, near Kingston, where Ed-win Beaupre found it breeding many years ago. These owls have late winter or spring roosts in groves of evergreen trees. They bott their food entire, regurgitating the skin and bones as a pel let when digestion is completed So, when a roost is found, ex ination of the ground under the trees will often show many pellets and these, if collected and sorted, give a definite picture of

What They Ate ... L. L. Snyder and C. E. Hope Zoology have been studying the food of this owl for some time past. On a golf course near Toronto they found a roost of these owls in some ornamenta evergreens, to which they resor year after year. In 1936 during April the observers collected a half bushel of the pellets from they assumed that about 18 owl represented about 1,000 meals of these birds.

and find what animals were represented in these remains of the food. They did this by comparing the bones that they found in the helicity with the second control of the co the pellets with bone specimen that they have in the museum. As each animal has characteris-tic skull or teeth it was a fairly simple job for, one who knows how. Mostly Meadow Mice

The Following Have Been

have pointed out before was to bolster the flagging Italian war ef-fort at as little cost as possible so tish fleet busy in the Mediterran-ean, plus formidable British land forces, far from the scene of the Battle of Britain. (Eis occupation of Bulgaria secondarily served to give idio divisions of the German army something to do; and added considerably to Axis prestige in southeastern Europe and the Near East). For the present, the Dardanelles and Suez could wait. Hit tish might move first, from Salonica, and scotch his plans by forcing him to accept the reality of a two-front war. Supremacy At Sea Unless she can maintain suprem-

Cinger Rogers, crowned the outstanding actress of 1940, is shown, LEFT, arriving for the annual dinner of the Academy of Motion Picture Arts and Sciences, accompanied by her mother, Mrs. Lela Rogers, James Stewart was awarded the "Oscar" for the best actor of 1940, at the uch supremacy involves ability to keep the sea lanes open (the Axis presented a strong challenge in he Mediterranean and the North Atlantic), and particularly to transport in safety the industrial output of the United States. The Roosevelt administration in Washington last week was thought to have readied plans to give the British, following the passage of the Lease-Lend bill, what they so vitally needed; repair facilities in United States ports; a supply of mer-U. S. Takes Risks

The United States in the opinior of most experts was expected t adopt a full war economy for the nation immediately after enactment of the bill, since each and every provision made to aid Bri-tain could bring war to the western hemisphere. The U.S. would have to be ready for anything. Nevertheless a war incident was deemed much more likely to occur in the Pacific than the Atlantic. In the Far East American naval and air power had been mobilized with due consideration for even ready to fight.

FIGHT FOR THE MARKET

Ontario farmers had better

ook to their laurels. In the fire

six weeks of 1941 Ontario farm

ers have delivered to packing plants 225,000 hogs. Alberta

plants 225,000 hogs. Alberta farmers have delivered 176,000.

31,000 against Ontario's 33,000.

Competition for markets for

farm products within Canada has

never been great while the west

could rely on selling its wheat crop. With the wheat market badly clogged western farmers

are turning to mixed farming

products which compete more directly within Canada. What is

happening in hog production shows what the west can do when

forced to it.-Lethbridge Herald

Scientific Experiment

In Long Beach, Calif., a 33-

year-old chiropractor named Wil-fred C. Blair locked himself in a

closet with a 25-lb. cake of dry

ice. Aim: a "scientific experi-

ment" with carbon diexide. As

the ice melted, it gave off CO2

fumes. In 20 minutes, the chiro-

practor was dead. Next to his

body police found a notebook

containing his pulse, temperature

and respiration record.
