# Cream

No doubt every cream producer is now acquainted with the minimum butter prices set for each month by the Government. This will assure the farmer a fair cream price for the summer production.

To maintain a higher price for cream we must keep our manufacturing cost down. The extra taxes placed on materials used in the manufacturing of butter and the extra gasoline tax which makes the cost of gathering cream higher have a bearing factor on cream prices.

You can help us keep the costs down by selling your entire production of cream to us and avoiding duplication of trucks. By so doing you increase our volume of production and make it possible for us to pay you the highest price for your cream.

## Meat Storage

To those who have not tried our meat storage lockers we assure satisfaction. You may do your butchering no matter how warm the weather may be. Our cold storage facilities are the best.

Open Wednesday and Saturday Nights
