And then there is the chap in the car who is always in such a hurry to get no place in particular. The new rules ought to help him.

A Tip to Cream Producers

With a good demand now existing for Butter as well as an equally good price being paid for Cream (now 40 cents for Special Grade with a possibility of even higher prices) would it not be wise, during this dry spell, to give special attention and feed to your milking cows, as pastures may improve with possible rains. It is also essential to maintain the quality of your cream and by selling to your nearest Creamery eliminate deterioration when hauled long distances by truck.
