CONFIDENT OF VICTORY

Facing the enemy with the determination of youth the pilots of the Russian air force, regardless of personal risk, are slowly but surely whittling down the vaunted Luftwaffe.

A. The Chinese method is to ash the article with boiled rice. Rub the rice on the stain as you would soap, and wash with clear water. If the first application is not effective, repeat the process.

"Richelieu" to Fight With Allied Navies

Vice-Admiral William Glassford, Jr., head of a United States mission to Dakar, said the 35,000-ton French battleship Richelien at Dakar would be refitted and within a few months will be a top notch ship fighting with the Allied navies.

He soid a number of American divers and technical experts had arrived at Dakar to supervise re-habilitation of the Richelieu, damaged b British attacks earlier the war, and other warships at the West African port.

This work, he said, is paving the way for "establishment of Allicd naval operations at Da-

Nazi Diet Coarse **But Still Adequate**

Food Position Far From Critical As Substitutes Used

Germany's diet is much poorer than that of wartime America, but its food position is far from crit-ical, the United States Office of War Information reports on the basis of data reaching the Board of Economic Warfare and other Government agencies.

Despite the Nazis' thorough miking of the produce of the occupied countries, the German diet is coarse, monotonous and lacking in such edible foods as meat, animal fats and white bread.

Food production in Axis-held Europe in the 1942-43 crop year will fall short of ordinary civilian requirements, it was said, but it is not expected seriously to impair the German war effrt.
Although the Germans are sub-

stituting less valuable vegetable protein for scarce animal protein, the substituion is not expected to diminish by a considerable amount the physical powers of the people this year.

Less Grain and Fruit United States Government data indicates that the German diet will be only slightly worse this year than last, with shortages of fats and livestock remaining the sore spots in the Axis food eco-

Both the European grain and fruit crops were cut last year as a consequence of bad weather, and the fish catch — affected by the blockade, the ship shortage and danger of mines—is still below normal, it was said, but practically every country in Europe reported

an increased potato crop.

Axis sugar stocks are considered only slightly less than those of the pre-war years, while German vegetable production and imports rose sufficiently in 1942 to enable Germany to increase her per capita vegetable consumption by more than 50 per cent.

Sweden Prepared To Defend Country

Prime Minister Per Albin Hanson warned the Swedish Parliament of the possibility of an attack on Sweden and said "beyond any doubt we will defend ourselves." He cautioned against the possibility of false orders being issued, as happened in Norway, and said if an attack came every-one would have to join in defending the country, the only re-maining neutral nation in Northern Europe.

The newspaper Dagens Nyheter said the country "must be ready to meet blitz attacks, especially by enemy air forces" and added that "Swedes have enough courage to face reality, even the reality of war."

PLASTIC RAZOR

A "simplastie" razor, as it is A simplastic razor, as it is called, has been designed of meet army requirements. The blades, of course, are still of the finest steel. The average metal razor weighs two ounces; the new plastic razer only three-quarters of an onnee. It requires 125 pounds of brass, steel and zinc to make a brass, steel and zinc to make a thousand meta; razors, but only five pounds to make a thousand plastic razors. These five pounds go into a small screw at the top of the handle. Since about 12,000,000 metal razors are produced annually in normal times, it follows that a million and a half pounds of fine etal could be saved by making razors of plastics instead of metals. Simplastic is an acetate cellulose.

NEARSIGHTEDNESS Children like to read the funnies with their heads down. Dr. Frederick A. Woll (Columbia) disapproves of the habit because it is one of the chief causes of nearsighteeine's When heads hang down eyeballs are stretched, so that the distance between the retina and the lens is increased. One Austrian physician went so far us to harness a class of children so that they could not get too close to their work. Result: A reduction in the percentage of nearsightednss. Dr. Woll prefers to enlarge the print so that when a funny is brought close to the eye the field of vision is narrowed. Children then hold the book away in order to take in a whole word or phrase at a glance.

Future of Arctic **Full of Promise**

The future of Arctic Canada, both commercially and spiritually, is full of hope and promise, said the Right Rev. A. L. Fleming, Bishop of the Arctic, in a recent

address.

He predicted that the Arctic way would be the quickest and safest route to Great Britain, Europe, Russia and Asia, and the most popular after the war. Bishop Fleming was enthusastic shout the development of air about the development of air fields by the United States Army, declaring that from it would come

a great opening up of the Arctic. The Arctic is short of many things, food supplies, particularly canned goods, radio supplies, spare parts for engines and commercial planes, he reported, but

the Eskimo exhibits considerable

ingenuity in substitutes. Bishop Fleming himself has wroked among the Eskimos for 34 years, and found them highly intelligent persons.
