WARNING

CANADA FACES A WOOD-FUEL FAMINE NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather?

Or perhaps you are one of the lucky ones who just managed to scrape through?

In either case, you will want to be prepared for next winter when greater hardships loom unless you take immediate action.

The shortage already has affected many communities... total stocks of dry wood are nearly exhausted... in some places the small supply of green wood cut for next winter is being used now to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is consumed. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end, the following measures will be adopted:

- 1 A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date.
2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies.
3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been paid and which are still in dealers' hands as at May 31, 1944.
4 Assistance will be given in providing priorities for necessary equipment.
5 Farmers now on the farm, and who leave the farm temporarily in response to this appeal to engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communities where wood-fuel is burned, are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shortage.

THE DEPARTMENT OF MUNITIONS AND SUPPLY

Honourable C. D. Howe, Minister

Canada's Call for 35 Million Pounds of Waste Fats

The units of the United Nations... never doubt that our suffering Allies would turn to us with open handed generosity... he glad to help!

On the giving side is the preferred position after all. Un- touched by Blitz, Canadian women have been able to spend long hours 'tolling and spinning' in Red Cross Branches all across the Dominion.

Mr. Bob Hutchinson was a week-end visitor with friends in Owen Sound. Mr. Albert Wyrill spent a day in Toronto recently.

Miss Ruth Hutchinson of Owen Sound was a recent visitor at her home here.

Mr. and Mrs. Bert Hutchinson and family moved last week to their new home east of Owen Sound, where Mr. Hutchinson has secured work with Mr. G. A. Bothwell.

His interest lay in the Fraternal sphere and served as County Master of the Orange Association in East Grey. He was an honorary member of Flesheron L.O.L. No. 2855.

Following a private service for the family, all of whom were in attendance with their families, a public service was conducted in St. John's United Church by Mr. F. B. Keys. Interment was made in the chapel in Flesheron Cemetery.

Little men are thought to have more brains than big men. This is not so. The little men—with an inferiority complex—merely advertise better.

Canada Needs 40 Million Pounds of Fats for Explosives Here is a day-to-day War Job for You! There is a serious shortage of Fats and Bones in Canada and the only way in which this shortage can be overcome is by the day-to-day saving of every scrap of fat dropped, every piece of scrap meat, every bone, cooked, uncooked, or dry. Fats make glycerine and glycerine makes high explosive explosives to bomb the Axis powers—Aches, Benito, Tojo, and their henchmen, destroy their tanks. Bones produce fat. Also give for war industry.

HERE IS WHAT YOU DO Save every little bit of waste dripping, lean waste-meat, and every scrap of fat and bone, cooked or uncooked, or dry. Save every scrap of fat and bone, cooked or uncooked, or dry. Save every scrap of fat and bone, cooked or uncooked, or dry.

HERE IS HOW TO DISPOSE OF FATS AND BONES The Meat Dealers of Canada are co-operating with the Government in this important war work by contributing their collection facilities. Now you can dispose of your Fats and Bones in any one of the following ways:

1 YOUR MEAT DEALERS will pay you the established price per pound for your dripping and your scrap fat. You can keep this money for yourself or... 2 YOU CAN TURN THE PROCEEDS over to your local Voluntary Salvage Committee and/or to a registered local War Charity.

3 YOU CAN DONATE your Fats and Bones to your local Voluntary Salvage Committee in any place where they collect them... 4 YOU CAN CONTINUE to place out your fat and bones for collection by your local Voluntary Salvage Committee where such a system is in existence.

CREAM!

With the present exceptionally attractive price being paid for Cream it is worth the effort to produce as much of it as possible.

Just now, due to bad road conditions, it is difficult for us to make our regular pick ups. We therefore urge the patrons to bring in their cream whenever they come to town.

Sell your cream to the Markdale Creamery; IT WILL PAY YOU WELL.

First Women Blood Donors at C.P.R. Clinic

MARKING the first time women had given blood for the Canadian Red Cross Society in an industrial clinic in Quebec, these office workers in the Angus Shops of the Canadian Pacific Railway in Montreal joined 450 men who had gone before them as blood donors in the clinic which has been in operation at the shops since July of 1942.

The women, part of a group of 27 who have registered for blood donations from the big shops' total feminine personnel of 144, made their appearance in the Angus medical centre at the weekly clinic on February 4.

The clinic, first to be operated by an industrial enterprise in Quebec and first to be operated by a railway in all of Canada, has resulted in 1,134 donations to supply the blood bank shipped overseas for civilian and military transfusions.

An honor roll posted in Angus shows the names of those who have made three donations, with 100 being in that class now while one, Malcolm Myatt, a schedule man, has given blood six times.

In charge of the clinic is Dr. J. U. Page, chief medical officer at Angus Shops' medical centre. Upper left shows the fair donors receiving coffee in the recovery room after giving blood, with the picture on the upper right showing the operation. Lower left shows the 'pioneer' group with H. E. Naylor, works manager, Angus Shops, and Dr. Page. At the lower right Mr. Myatt receives his silver badge from Mr. Naylor for six donations totalling four and one half pints.

EBENEZER

Mr. and Mrs. Chas. Thompson of Harkaway spent a few days with Mrs. W. W. Taylor.

Mr. and Mrs. Howard Wilson and Wayne of Hanover visited with Mrs. Wilson's parents, Mr. and Mrs. Albert Wyrill.

Miss June Freeman of Markdale High School spent the week-end at her home here.

Mr. Bob Hutchinson was a week-end visitor with friends in Owen Sound.

Miss Ruth Hutchinson of Owen Sound was a recent visitor at her home here.

Mr. and Mrs. Bert Hutchinson and family moved last week to their new home east of Owen Sound, where Mr. Hutchinson has secured work with Mr. G. A. Bothwell.

SUN POWER BROUGHT NEARER

Dr. Charles Abbott, of the Smithsonian Institute, demonstrates the solar power machine, at the convention of the American Association for the Advancement of Science. This new device, the 'Solar Engine', is a solar engine constructed by Dr. Abbott—eliminates most of the serious defects of the earlier models and brings closer the era when man will be able to harness the vast energy of the sun to do his work.
