of Hospitalization Scheme

At the regular meeting of the Rotary Club held on Monday evening Mr. T. S. Cooper, Agricultural Representative for Grey County, was the guest speaker and he gave an interesting and instructive address on co-operative hospitalization. His address follows:

A study of the financial records of the ever enlarging drain upon public funds for hospitalization of increaspective municipalities.

It is unnecessary to enumerate developed now. Suffice it to say old friends have passed on. that I venture to say many seated round this festive board would be quite badly embarrassed, if unexpected sickness should befall your elf or those nearest to you in your ouseholds.

And I take it that you, as business and professional men, are in such a position that you are above the average in this village and vicinity: therefore, are better able to withstand the jolt caused by your being sent to the hospital. Yet statistics reveal that by the law of averages one family in every five will have a hospital bill this year.

That being true, is it not time, ndeed is it not long overdue when ome scheme should be devised to provide hospitalization at a minimum cost to our people? cheme is now available.

Some twelve years ago in a State of Texas city, a young school teacher had the misfortune to fall and break hip. Hospital care and treatment were necessary. During the long convalescence she worried and at last confided to one of her friends her inability to pay. At once a collection was taken, the account was settled and the young lady relieved of the stigma of being a public

Her success can be notes bearing interest at the rate of determined by the fact that the plan for hospital care has extended into every state of the American Repuband place the farm, consisting of 50 lic and some two years ago was accepted in Ontario. Its popularity is shown by the fact that to-day at least 200,000 persons are enrolled in the scheme. It may be of interest to know that the Owen Sound Kinsmen's Club sponsored the scheme about six months ago and to-day there are 3,000 members in a city of only 13,006.

Plan provides for injuries and illness occurring at work when not covered by Workmen's Compensation. Diseases which had their inception prior to becoming a subscriber are covered. The Plan; of course, cannot provide for cases admitted to hospital prior to effective date of contract.

The plan of hospitalization care requires that a group enrol in the Scheme. For example the members of your Rotary Club could join as a group-or, if you wish, organize the Markdale people into a group, named whatever you will, and join the plan. If there are 5 to 10 in the group all must join. If 11 to 25, hen 10 must join and if over 25 then 40% must belong. Undoubt-edly you are all concerned about the That is the important consid eration. The payments may be made monthly, quarter or semi-yearly as the group prefer. Naturally a salaried group will have the payment deducted from their monthly cheque. Others will prefer a different set-up. The cost per individual is 50 cents per month in a standard ward and 75 cents in a semi private ward. If the subscriber wishes his family included he pays \$1.00 for himself and wife and all children under 16, in a standard ward; \$1.50 for himself, wife and all children under 16, in a semi-private ward. No private rooms are available under the system but in event of con-
