FARMERS AND FARM WORKERS

If Your Farm Work has Slackened for the Winter, You Are Needed Elsewhere in Essential Employment

Highly essential work—very important in Canada's war effort and for the welfare of the Nation—is threatened with shortages of workers. One of the few sources of men available for other high priority jobs is those men on the farm who will not be needed at home during the Fall and Winter. Heavy needs must be met in many lines—producing fuel wood and other necessary forest products; in base metal mines, in food processing, in railway track maintenance. If you live on a farm and are not needed at home during the Fall and Winter, you are urged to answer this national appeal.

Farmers engaged in essential work during the off season will be allowed to return home when needed. Also, those on postponement under Mobilization Regulations will continue on postponement while in approved essential work during the slack on the farm. Please answer this vital call NOW.
