

More FOOD NEEDED

As Victory Draws Nearer

As the United Nations invade the Axis-dominated countries, famished populations as well as our fighting forces must be fed. The need for food increases as victory draws nearer.

Canadian farmers are confronted with a heavy task, which may be made easier through the use of bank credit. The Bank of Montreal stands ready to make every reasonable loan which will promote an increase in food production in the world emergency.

If you need to borrow to improve your production of food, do not hesitate to talk with our nearest branch manager.

Cream

GREATER THAN EVER is the NEED for an INCREASED BUTTER PRODUC-TION this year. This is due to the bigger requirements of our Armed Forces and Overseas Shipments.

In order to encourage HEAVIER CREAM PRODUCTION the Government announced that it will continue to PAY THE 10 CENT BONUS without interruption during the coming summer months, right up to April 30th, 1945. This is certainly worth your consideration when you are planning your capacity production for some time ahead.

suddenly" aware of the familiar Martin-Senour sign (although it there all the year 'round' because Spring is the usual and accepted time to repaint for fresh beauty and protection!

And this sign is a sure sign of an enduring paint because Marti Senour is 100% pure!

Whenever you see the sign of Martin-Senour, there will be found the paint of endurance and longer lasting beauty. It is the sign which in one breath welcomes Spring and the chance to beautify as well as to do the patriotic job of protecting property!

This is one in a series of messages explaining problems of electric supply to farm and hamlet consumers served direct by The Hydro-Electric Power Commission of Ontario.

Uniform Rural Meter Rate Anywhere in Ontario

Our last advertisement illustrated the reductions which will apply to farm and hamlet services in most areas in the Province. Herein we give some of the reasons for and benefits of the new Uniform Meter Rate.

The cost of rural electric service is made up of two main parts: (1) The cost of providing electricity in bulk at convenient

central points (substations); (2) The cost of distributing this electricity from these substations to the user.

ince electricity cannot be stored, it is necessary to provide lines made up of poles, conductor, transformers, etc., to carry the electricity from the substation to the consumer so that each user will have service available at the flip of a switch. To the cost of building these lines must be added the cost of maintaining and operat-

Electric service rates originally included a Service Charge to cover the cost of distribution, plus a meter rate to cover the cost of the bulk electricity at the substation. The Province was divided into a number of rural power districts created around available substations without particular regard to township or county boundaries. Each of these districts had its own meter rate, varying from a high of 6c, 2c and 3/4c to a low of 21/2c, 11/2c and 3/4c.

During the past twenty years many complications and inequalities have arisen in trying to maintain the identity of these districts. Therefore in order to provide suitable service to all at the lowest and fairest cost, the 120 Rural Power Districts have beencombined into one Provincial Rural Power System with a Uniform Meter Rate of 4c, 1-6|10c and 3/4c. Now, all Rural Power Consumers anywhere in the Province pay the same meter rate. This Uniform Rate represents a reduction in most of the old districts and an increase in only a few districts formerly having a very low rate.

These explanations are given to help you understand the new rate. In our next message, we shall discuss, for your benefit, the MINIMUM BILL. In the meantime, if you need further information, please ask your Rural District Superintendent.

THE HYDRO-ELECTRIC POWER COMMISSION of ONTARIO

In order to have a complete understanding of the new rural rates, we suggest you clip and keep these explanations.

THURSDAY, APRIL 6th, 1944

SINCE THE CALL TO ARMS

WITHIN AN HOUR of the opening of hostilities the Canadian National began what has proved to be the largest and one of the most exacting war jobs in Canada. This job has continued day and night without stop for four and a half years.

FROM SEPTEMBER 10, 1939 to March 10, 1944 the Canadian National carried more than 100 million passengers and 300 million tons of freight. Since the beginning of the war the Canadian National Dining Car Department has served 13,631,387

THE RAILWAY not only hauled away the completed munitions of war, but brought in the raw materials to make them. Without this two-way service. Canada's magnificent job of production could not have been carried out. The Canadian National itself builds mine-sweepers, 12,000-ton freighters, naval guns and gun mountings, aircraft components, and parts for other gun factories.

OF THE 100 MILLION PASSENGERS carried, a high percentage consisted of members of the armed forces proceeding to camps for training and to shipboard for embarkation.

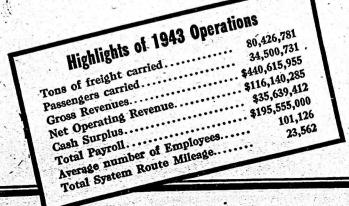

STEAMSHIPS OF THE COMPANY, though reduced in numbers by sinkings through enemy action, have served gallantly in the war as auxiliary armed cruisers, hospital ships and transports.

CANADIAN NATIONAL Express and Telegraph facilities have worked to capacity to meet war de-

The Canadian National's nine all-year hotels, situated in cities from the Atlantic to the Pacific, have provided service of an essential nature to those engaged in the war effort. All the Company's resort hotels are closed for the duration.

22% OF THE PERSONNEL in Company's service in 1939 have joined the armed forces. In Victory Loan campaigns Canadian National men and women have purchased bonds to the amount of \$26,924,600.

TRANS-CANADA AIR LINES, subsidiary of the Canadian National Railways, has carried 435,000 passengers during the war, 9,417,000 pounds of air mail letters, and 1,476,000 pounds of wartime air express. Trans-Canada Air Lines is also flying the Atlantic regularly with mail to and from the armed forces.

TRANSPORT for a NATION AT WAR

The Canadian National has been privileged to join with all the citizens of our country, including those who are serving in the armed forces, in the prosecution of the war. It believes that Canadians will be interested in this outline of some of the System's war activities.

Extracts from Annual Report of the Directors of the Canadian National System:

OUR OBJECTIVE IN 1943, as in other war years, was to place the full strength of our manpower and facilities behind the war effort of the United Nations. To this end all energies have been directed. The requirements of the armed forces, of industry and agriculture, for transport and other services, have been met in all of the nine Provinces of the Dominion and in the important sections of the United States in which we operate.

RECORD TRAFFIC

These demands were greater than ever before, the traffic moved in 1943 being 17.3% greater than in 1942, the previous peak war year, and 44.7% greater than in 1928, the peak peace year.

Freight traffic in 1943 was more than double that of 1939, and passenger traffic four times that of 1939.

Despite this, the very large movements of war materials and personnel reached their destinations in accordance with schedule arrangements. There was no lowering of the recognized standards of safety.

MANUFACTURE OF MUNITIONS

The Company also extended its activities as a manufacturer of munitions, ships and naval appliances.

EARNING POWER

The 1943 operations demonstrated the great earning power of the System, the railway proving again that it can handle an immens volume of business economically as well as expeditiously.

After providing from revenue for all operating expenses (including deferred maintenance, depreciation, amortization of defence projects and reserve for inventories) and also a reserve for pension contracts, taxes, interest on funded debt and Government loans, the surplus paid in cash to the Government was \$35,639,412.

OPERATING EFFICIENCY

The operating ratio for the year was 73.64% (an all-time record) as compared with 76.93% in 1942 and 81.99% in the peak peace year of 1928.

It is interesting to note that the vastly increased war traffic in 1943 was handled with 16.6% fewer locomotives, 15.4% fewer freight cars and 5.1% more passenger cars than was the traffic of 1917, the fourth year of the last World War.

SPECIAL SERVICES PROVIDED

The Company was honoured in being selected to provide extensive train and other services for Prime Minister Churchill, President Roosevelt and Madam Chiang Kai-shek during their visits to Canada in 1943.

POST-WAR

Changing conditions will call for new methods of railway operation and new types of service, and there must needs be a continuing search for improvement in all aspects of the railway industry. In view of this, the Company has in hand a programme of research. This programme, in addition to considering ways and means of improving service and efficiency of operation, also encompasses the problems of post-war reconstruction and rehabilitation.

THE OFFICERS AND EMPLOYEES in all departments of the System have worked hard and loyally to cope with increased responsibilities arising out of the war, and the directors record their appreciation and thanks. The traditional harmonious relations between management and employees were maintained throughout the year. Appreciation also is expressed to shippers and the travelling public alike for their cooperation in and sympathetic/understanding of difficult operating conditions caused by the war.
