# Eggs

This year a heavy production of eggs is again expected and will be far greater than our home market can absorb. No doubt you all know that enormous quantities of eggs were exported to Great Britain last year in powder form to conserve shipping space. Now, the people of the British Isles would sooner have eggs in shell. Since this is our only available export market it is up to the producer and the shipper of eggs to give them the best possible product.

Since it takes considerable time for transit, the duty of the producer is to use every means to keep the eggs clean and to market as frequently as possible. Our duty is to put the eggs in the best possible containers to assure clean and safe arrival. Every egg has to be stamped by us with the word "CANADA" in order that its source will be known. In this way a future market, and we hope a permanent one, will be established for a good product.

Till further notice the Creamery will be closed Saturday nights
