

Eggs

The producers loss on eggs is 5c to 6c per dozen when eggs are slightly soiled and are placed in "B" grade rather than "A Large" grade. Is it not, therefore, worth 5c to 6c a dozen to you to keep your eggs clean and fresh before marketing? It will help us speed up the grading too.

Poultry

We need live and dressed hens and are paying:
 Alive .. 22c (A grade, over 5 lbs.)
 Dressed .. 26c (A grade, over 4½ lbs.)

Open Wednesday and Saturday Nights

What does YOUR FARM NEED?

How often have you said "If I could only raise the money!" Well, if you could, what would you do to improve your farm and increase your production?

Would you build a modern barn?
 or buy new machinery?
 or modernize your house?
 or electrify your farm?

You can raise short term money from your bank; and long term money from other institutions by way of mortgage. But there are some things you would like to do which require loans that are neither long nor short...

That is where the banks, operating under the new Farm Improvement Loans Act, can help you. The gap has been filled. "Intermediate" loans at a specially low rate can now be obtained for periods of two or three years—or even longer, in cases up to ten years.

So, if you have a project in mind to improve your farm, drop in and talk it over with your local bank manager. Ask him what he is now empowered to do to help make your farm living more attractive and your work more profitable.

He will tell you—and show you—that your bank is just as eager to meet the sound credit needs of the farmer as of the merchant or manufacturer.

If you want to build a modern barn

or buy new equipment

or electrify your farm

or modernize your house

...then have a talk with your bank manager about his new powers under the Farm Improvement Loans Act.
