

SURRENDER TO MONTGOMERY

Admiral von Friedeburg, Supreme Commander of the German Navy, signs surrender pact as Field Marshal Montgomery looks on. An estimated 1,000,000 Germans laid down their arms in Denmark, Holland, and northwestern Germany.

VOICE OF THE PRESS

SPEED OF THE FUTURE

Some visionary foresees that planes of the future will fly 100,000 miles in 60 minutes. The practical value of which will be that you can go four times round the world in your lunch hour.

— Peterborough Examiner.

AT A DISADVANTAGE

These elections may be hard on woman candidates. If a woman throws her hat in the ring will anybody but herself know what it is?

— Owen Sound Sun-Times.

BIRD CONSPIRACY

The early bird catches the worm. But a lot of other birds know why a lot of grass seed we've been planting hasn't come up.

— Ottawa Citizen.

NO SOLUTION

"Why don't the nations get along like one big family?" A humorist replies: "The trouble is, they do!"

— Quebec Chronicle-Telegraph.

NO ILLUSION

Germany has been cut in two. And this is no Horfani illusion. She stays cut.

WE CAN'T FILL A BUSHEL OUT OF A PECK MEASURE

It is estimated that about 72,000 people in Canada want to buy a new heating system. A good percentage of them would like a CLARE-HECLA Furnace.

Even with normal production we would not be able to meet the demand. And materials and manpower are still very much restricted.

Hence, CLARE-HECLA dealers can accept orders now for only a limited number of furnaces for fall delivery. First come, first served is the policy they must follow. Don't delay, if you need a new furnace.

OTTAWA REPORTS

That Munitions Minister Howe Forecasts Minimum Disturbance In Conversion From War To Peace In Canada

Based on information from the United Kingdom and the United States, the immediate war production picture in Canada was that aircraft production would continue indefinitely, and there would continue to be a high rate of delivery of ships well into 1946. Production of railway equipment would be stepped up to supply domestic and foreign demands. There would be a cutback in explosives in line with ammunition demands, but chemicals for agricultural and other industrial needs would continue at a high rate. Gun and small arms ammunition would be cut progressively. Armored vehicles production would decline sharply. There would be partial conversion in automotive vehicles from military to civilian requirements which would keep factories fully engaged. War and civilian demands would keep production of raw and semi-processed materials high.

Production of civilian necessities, together with production of exports to liberated countries, would absorb manpower released by the lessening of war production, Mr. Howe said. He paid tribute to the excellent plans laid by most of Canada's industries for the period just beginning and stated that in many of these reconversion would mean simply the moving of workers from one machine to another.

Canada will have a carry over of about 300,000,000 bushels of wheat at the end of the crop year, July 31, and the United States, about 350,000,000 the Dominion Bureau of Statistics estimates. This would be the lowest midsummer figure since 1940.

Officials from Dominion Department of Agriculture, accompanied by United States Department of Agriculture representatives, will go to Fort William later this month to observe tests being made in the Nipigon region to destroy the Spruce Sawfly. RCAF crew flying PB-5's will spray the new DDT insecticide on timber stands there in experimental tests.

Stalingrad Reborn

All Stalingrad celebrated when the 1,000th tractor was recently turned out in the giant plant re-born from the ruins and ashes left by the German invaders. Engineers and workers, most of whom fought in defence of Stalingrad, carried out their pledge to rebuild this pride of the Soviet tractor industry in the shortest possible time.

Faith In Peace?

One impressive sentence of Anthony Eden, Britain's Foreign Minister, at the San Francisco conference made at a press talk, intrigued the correspondents. It was: "In Britain we have an immediate problem. Our towns and cities have been badly wrecked and we must start at once to rebuild them. Are we to rebuild them with bomb-proof shelters or with faith in peace?"

Firewatchers Still Watching St. Paul's

Firewatchers have ended their duty all over Britain—but not the men who guard London's St. Paul's Cathedral. They have watched over Wren's masterpiece from the start of the war and will stay to the finish.

They were there on the night of the great fire blitz, Sunday, Dec. 29, 1940, when the cathedral stood unharmed within a city ablaze.
