PLAYING IN THE YARD By GLUYAS WILLIAMS

MOTHER COMES OUT TO SEE WHAT SHE'S DOING IN THE YARD.

ASKS WHY SHE GETS THE USUAL RESPONSE: "MOTHER, SHE'S NOT HERE."

CALLS WHY DOESN'T SHE WANT HIM? "MOTHER, SHE'S NOT HERE."

MOTHER TRIES TO END THE QUESTIONING BY SAYING: "MOTHER, SHE'S NOT HERE."

MOTHER SAYS "BE CAREFUL WHEN RUNNING IN THE YARD."

BALANCE BY ASKING IF A BIG WOLF IS SOMETHING CHANGED FROM THE USUAL RESPONSE: "MOTHER, SHE'S NOT HERE."

IS TRIED NOT TO BE ASKED WHY SHE GETS THE USUAL RESPONSE: "MOTHER, SHE'S NOT HERE."

GOES ON PLAYING, NOT REALIZING WHY HE HAD ANY INTENTION OF RUNNING OUT OF THE YARD.

MOTHER SAYS "BE CAREFUL WHEN RUNNING IN THE YARD."

BALANCE BY ASKING IF A BIG WOLF IS SOMETHING CHANGED FROM THE USUAL RESPONSE: "MOTHER, SHE'S NOT HERE."

IS TRIED NOT TO BE ASKED WHY SHE GETS THE USUAL RESPONSE: "MOTHER, SHE'S NOT HERE."

THAT'S WHERE HE'S GOT THE ADVANTAGE OVER US!

World Hopper

A super-hopper of the type which Gen. Henry H. Arnold, commander of the U. S. Air Force, says the Army now has, could circle the earth at the equator in only three jumps. Circumference of the equator is 24,902 miles. A range two and one-half to three times that of a B-29 would permit the super-bomber to fly 9,000 to 10,000 miles without landing.

thread its way through the northern passages with its sets providing an unerring picture of the land.

Furthermore, the majority of modern freighters are now equipped with Sperry gyro compasses, an added advantage in northern waters where the nearness of the magnetic pole plays a job with the standard magnetic compass.

Canadians' Role

Something of the part Canadians played in the radar war was told in news dispatches which accompanied the original release. Nearly 6,000 Canadian radar mechanics and officers answered an appeal for such technicians by Britain. This was more than half of the total serving in the R.A.F.'s ground and air installations in the European and Pacific theatres.

Basic training in radar principles was provided in 15 Canadian universities and so competent were the men turned out in these courses that they were soon to be found in nearly every field where radar was operating.

Canadian radar officers and technicians were also appointed to many ships of the Royal Navy, in addition, of course, to manning the Canadian Navy's own vessels.

German radar developments never matched those of the Allies, neither did their efforts to counter the Nazis lagged in this, as they did in so many other fields of research during the war. It was fortunate for us they did.

Super-Nylons To Last Ten Years?

The probability of a super-nylon was predicted by Dr. George E. Harrison, head of the physics department of Massachusetts Institute of Technology. Super-nylon might be expected to make a stocking to last ten years, or to stand extraordinary wear without quickly being worn out, he said.

Important!

AT ANY MEAL, ANYTIME!

Busy housewives all over the country have learned the wisdom of serving Kellogg's ready-to-eat cereals often. Nothing to mix or cook. Appetizing anytime of day. Easy-to-digest, too!

Radar - Super Secret of War

Veil Lifted on 'Seeing Eye' of Allied Fighting Forces

It has removed almost all, if not all, the hazards of fog, ice and collision at sea.

Merchant Ships To Profit

It is easy to see how merchant ships will profit by the addition of radar. Shipping so equipped will no longer be hobbled by fog or forced to alternative and longer routes by ice, as frequently happens off the Canadian east coast. But it will be more important still on the less travelled commercial routes.

A good example is the Hudson Bay route to Churchill where navigational aids are few and far between and magnetic disturbances add additional hazards. A freighter carrying radar will be able to

Canada Has No Jeeps for Civilians

Plagued by tens of thousands of requests, War Assets Corporation came out with these salient facts in relation to itself and the jeep: We have no jeeps for disposal. We have never had any. We don't expect to have any for a long time if ever.

By telephone, letter and the spoken word, the tens of thousands have been harrasing the corporation with requests for jeeps to be put into civilian uses.

Uranium Deposits

The importance of uranium ore and its role in atomic bombs and atomic power have focused the eyes of the world on the mining belts of northern Canada, particularly on the Great Bear Lake area of the North West Territories.

The action of the Dominion Government in taking over all rights in radioactive ores, such as

Uranium Deposits

uranium in the North West Territories and the Yukon, by instrument of order-in-council of September, 1935, has lessened the interest of the average prospector in the area. It has, however, quickened the interest of the government-employed geologist and engineer to the extent that the Hon. C. D. Howe, Minister of Munitions and Supply, has announced the use of 20 government prospecting parties in exploring the area in the general vicinity of Great Bear Lake.

WHAT SCIENCE IS DOING

Pilot's Night Light

We were the first country to cease extensively in night-flying, writes the London correspondent of the Ottawa Journal. Its problems have been studied scientifically by the R.A.F. and big improvements devised. Above all things a night pilot needs to see objects outside the aircraft, but he is handicapped and dazzled by the lighting needed for the controls in the cockpit and by reflection from the wind and side-stream.

It has been, therefore, in a worse case than anyone trying to see out of a lighted room at night. A new method of dual system lighting has now been devised which provides fluorescent lighting for the instrument panel and red lighting to illuminate the cockpit. By these means, reflections are eliminated and the cockpit lighting interferes only to a negligible degree with vision of outside objects.

Eyestrain and general fatigue are reduced to the minimum. The fluorescent lighting is obtained by painting the instruments, much as the hands of a watch are made luminous. The interior red light has the advantage that objects show up brightly when directly observed but fade out when the observer looks away from them. Moreover, the pilot can regulate the strength of the lighting according to requirements.

20 Crews Seek Uranium Deposits

The importance of uranium ore and its role in atomic bombs and atomic power have focused the eyes of the world on the mining belts of northern Canada, particularly on the Great Bear Lake area of the North West Territories.

The action of the Dominion Government in taking over all rights in radioactive ores, such as

Howe, Minister of Munitions and Supply, has announced the use of 20 government prospecting parties in exploring the area in the general vicinity of Great Bear Lake.

Uranium Flown Out Of Australia

Winston Churchill early last year asked Australia for all the uranium it could produce for atomic bombs, and operations began promptly at the Commonwealth's only source of supply of the product at Mount Isa, 400 miles north of Adelaide, it was disclosed.

Within six weeks, machinery had been installed and roads and an airport built to fly the element out of the country.

Exact use of the uranium remained a secret, of course.

Churchill Cheered By London Crowd

Winston Churchill was cheered wildly outside Buckingham Palace by a jubilant V-J-Day crowd that practically ignored Prime Minister Clement Attlee and his new Labor Cabinet.

But why can you count on Churchill? Churchill's official party drove unrecognized past the crowd, which had been waiting for hours to greet them. A few minutes later Churchill's car drove up from the opposite direction and the cheering mob broke through police lines to reach him.

Churchill beamed happily and waved.

Swift Ease for Miserable BACKACHE

Don't trifle with that backache, because backache, along with leg cramps, restless nights, and frequent urination, are sure signs that your kidneys are getting clogged with GOLD MEDAL capsules. Get relief quickly with GOLD MEDAL capsules. They will give you swift relief because they help your kidneys get back on the job, filtering your blood, and removing the trouble-causing wastes.

GOLD MEDAL capsules contain a unique and original Dutch Gout, known the world over for their swift effectiveness. That's why you can count on GOLD MEDAL capsules for relief. Be sure you get the genuine GOLD MEDAL capsules. OIL CAPSULES. Get the 40c box from your druggist.
