A mould of the penicillin family has been put to work to make a Canadian blue cheese with a distinctive flavor of its own which is said to rival any of its foreign-made predecessors.

An ordinary loaf of white bread is the seed bed for developing the taste-making mould. When the plant has grown, it and the bread are ground into a fine powder, which is sprinkled into the cheese curd.

As well as providing connoisseurs with a superior product, this new use for surplus milk will put many thousands of dollars into the hands of farmers.

Ninth And Biggest Victory Loan Drive

And one of the ways of making a better world will be to invest in Victory Bonds. That's another wartime feature that is still with us. We're supported previous loans with a will, and we're asked to put our shoulders to the wheel again.

Our ninth, and biggest, Victory Loan Drive... to be launched Oct. 22... is for \$1,500,000,000.

Mr. H. C. H. Minister of Finance, notes that previous loans have allowed to cover the financial needs for only six months, but because victory has brought a reduction in Canada's war costs, the ninth loan will meet borrowings for a 12-month period.

We've loaned to bring peace, and now let's loan to make that peace effective.
