Notice to Bond Buyers—If you would have the matter of buying bonds considered and your mind made up as to what you can buy before the salesman calls, it would make matters easier for all concerned. Welcomed Home

Another Markdale soldier to arrive home on board the liner Queen Elizabeth was Cfn. D. J. Torrie who was greeted by his "folks" last Sunday in Toronto.

D. J. is the youngest son of Mr. and Mrs. Duncan Torrie of Markdale. He enlisted in June '42, and after being posted to the Ordnance Corps at Kingston, went overseas in March '43. Three months after they landed in England, they were sent as a reinforcement unit to the 1st Division in Africa where he spent four months at Phillipville on the north coast. From there they moved across to Italy where D. J. was attached to the Workshop, located some 7 or 8 miles back from the front line. In their 16 months in Italy, D. J. got around to see the main cities, including Rome, Naples and the ruins of Pompeii. One of the sights he recalls is St. Peter's Cathedral at Rome and being with a group addressed by the Pope. From Leghorn in Italy they sailed to Marseilles, and drove their trucks through France and into Holland where they were stationed till V-E day.

THE 9th VICTORY LOAN

Canada has completed the first week in the 9th Victory Loan and is one-third "over the top", a better position at the end of the first week than in any other loan. Now, understanding that the war is over, so far as the actual fighting is concerned, that is a good sign. It has demonstrated to the National Finance Committee at Ottawa that the people of Canada are still at war, this time with the determination to win the peace as well as the actual fighting on the fields of battle.

Canadians by their actions in purchasing 9th Victory loan bonds are approaching their obligations like the sensible persons they are. There has been no "patriotic" appeal; just the common-sense argument as to why we should continue to stand behind those who fought for us, to bring them home, to care for those who have been incapacitated, and to rehabilitate others who are returning to civil life after six years of the heaviest and most bloody fighting the world has ever known.

The purchase of 9th Victory Loan Bonds is not patriotism. It is plain common-sense. It is an investment of surplus funds in a gilt-edged security that will bring its benefits in the years to come, when the easy money of war is replaced by the less glamorous and hard-earned incomes of peace. It is a case of investing savings, and potential savings at good interest to serve as a nest-egg at a time when jobs are less plentiful. Victory Bonds will stand between the people and want in the less-glamorous days to come. Investment in these bonds will also inculcate in all of us the desire to save and to build up a surplus of funds for that rainy day when our earning power declines; when our advancing years preclude a continuance at the labour in which we have engaged in our younger and more productive years.

This is Canada's last Victory Loan. It is the last time we shall be called upon to invest in war bonds. This is also the first time since the war began that we have been assured there will be no further government loans for at least a twelve-month period. It is really two loans in one, and there is a full year's time in which to pay. This in itself should be incentive to buy Victory Bonds and then—buy more!

The purchase of Victory Bonds is an investment in every meaning of the word. This investment will return more interest than any other fully-guaranteed loan in which you can invest. These bonds are as good as the Dominion of Canada.

There are a thousand reasons why you should purchase Victory Loan Bonds at this time. There is not one reason why you should not.

Turning to Grey County, we find that at the close of business on Friday only 18.9 per cent. of our objective of \$5,200,000 has been purchased. The town of Thornbury leads with 55.1 per cent., and the Township of Glenelg is last with 4.7 per cent. Second on the list is Arden with 28.6 per cent. It will be seen from this that the excellent showing of Thornbury has a lot to do with the raising of the County percentage. These standings are pointed out to show that there are many municipalities that will have to do a lot of stellar work before the campaign closes. On Friday's showing Grey County is close to last, if not last, of the 62 districts in Ontario. Last Loan Grey stood fifth for Ontario, and may pull up before the end of the campaign but only by hard work. As the county has gone over the top in all previous loans, it is hoped it will repeat in the present one, although the outlook after the first five days shows there is a lot of hard work ahead.

Canada's purchase of Loan during first week, 33.28 per cent. Grey County's purchase, 18.9 per cent. It doesn't look too good. You can form your own conclusion.
