CUSTOMERS' Suggestions CORNER

For Rural Telephone Service

ONE CUSTOMER WRITES:

"I want some system that will prevent our neighbours discussing of great length their troubles with chocolate pie fillings, burned cabbage, etc."

We're afraid there is no "system" that will keep people from following the age-old custom of chatting with their neighbours. But we all know how crowded rural lines are right now and we urge you to keep those friendly telephone "visits" down to a minimum. It will help to improve telephone service all-round.

THE PROVINCE OF PROMISE . . .

ONTARIO, in a geographical sense only, may be said to be sharply divided . . . a natural division into north country and south country that emphasises the province's variety of climate - of industry - of character. Northward, Ontario extends to the semi-arctic region of Hudson Bay . . . Southward, to the semi-tropic fruit belt of the Niagara Peninsula . . . "The Garden of Canada" . . . a blossom land overflowing with nature's gifts, where peaches, plums, pears, grapes and cherries come richly in their seasons. Fruit farming is but one of the untold opportunities offered by the four hundred thousand square miles, and more, that are Ontario . . . a veritable empire of resources.

90% of the acreage devoted to the cultivation of

PLUMS and CHERRIES
in the Province of Ontario centres in the rich Niagara district which produces 91% of the province's total yield.

When the Ontario fruit belt's two million peach trees, seven million grape vines and hundreds of thousands of other fruit trees bear their abundance, armies of workers are on hand to gather it.

An Assured Egg Market for the Lifetime of your 1946 Chicks!

CONFIDENCE IN THE MARKET

RIGHT now you can look ahead and see a profitable, and assured, market for eggs for at least a year and a half - the normal lifetime of your 1946 chicks. The "gamble" has been taken right out of poultry.

There is no reason to suppose Canadians will seriously cut down on their egg consumption - which is high. Then, too, the British egg contracts have been settled not only for 1946, but for 1947, providing a basic floor price for all the surplus eggs we are likely to produce. The British requirements for 1948 will be announced before the end of 1947. The demand for poultry meats - both domestic and foreign - is equally strong.

CONFIDENCE IN BRAY CHICKS

Bray chicks are bred to be vigorous, thrifty, fast growing and quick developing - the very qualities you must have in May chicks to have them mature and laying for the profitable fall and winter season. . . . If you have been holding off ordering your Bray Chicks for 1946 - or if you need additional chicks to take care of summer losses and fall culling - place your order now. You can have confidence in the market. You can have confidence in Bray Chicks.
