Garden Notes By GORDON L SMITH

Water Well And They Will Live The secret of success in trans-planting lies in keeping roots moist and so far as possible ex-cluded from the air. No matter if the being transplanted is a ting seedling or a ten foot ornamenta tree that same rule applies. It is not the shock of moving so muc a' the roots drying out that kills. To prevent this, nurseryment pack all roots carefully usually in damp moss, and then to make doubly sure they wrap tightly in burlap or oiled paper. When this nursery stock is bought it should be kept in a cool, moist place until planted and, if possible in the case of big stuff like hrubbery and trees sprinkle some water over the packed roots to keep them moist. In moving plants from one location to another in the garden it is advisable to dig carefully, keeping as much soil attached to the root as possible, planting quickly in the permanent position, firming new soil tightly about the roots, and

Right now we are anxiously awaiting the results of the Milk

concerned about the subsidy but we are curious to see what will

happen if the government doesn't come across. We can't imagine how a milk shippers' strike would

be organized to be really effective.

CHRONICLES of GINGER FARM

A fire still feels quite comfortable these days even though it is the middle of May. There is still very little growth in the gardens and fields although we did have quite a nice rain. But that rain needed to be followed by warm, sunny days-and it wasn'.-I won-der why somsone doesn't tell the weatherman about it.

We have had a busy time at Ginger Farm just lately—quilting for the clothing drive on June 17 you havn't forgotten about it, have you? Our regular Institute meeting was last week and we thought t might be a good idea to have it take the form of a quilting. Not only do we get a lot of good work done that way but the women get a better chance to visit. A.d how, says you! Well, I must admit we says you: Well, I must admit we do a little gossiping but it was all good-natured as far as I know. So, believe it or not, I don't think anyone's reputation suffered as a result of our quilting. But I am equally sure that some people, somewhere, are going to be much warmer and comfortable with our good quilts to cover them. They were really lovely quilts, beautiful-ly pieced, well marked and well quilted. We don't cater to the idea that "anything will do for oveseas". Most of our members like to feel that the covers we make not only give warmth but bring a little bit of cheer into omes that the war has stripped of

gaiety and charm. Saturday I took time off to attend an auction sale. I stood around and froze all afternoon and then came away without buying a thing. But that wasn't my fault— somebody always raised my bid— and there wasn't anything I want-ed badly enough to make me keep on bidding again and again. I am not Scotch but we do live in a Scotch settlement so it may be that I have absorbed some good old Scottish thrift through the years. It may be that that makes Whether I buy or not I still like an auction sale. I like to watch the sort of n.oo spirit that gets hold

bidding that so often takes place. Upon arriving home that day what a surprise I got! Waiting on the table for me were six bea iful carnations. They were so per-fect it didn't seem possible they was Daughter, who brought them. Flowers and Daughter, both on hand for Mother's Day.
