Highlights of the News

Steel Workers Strike A strike was called last week by Canadian steel workers despite the action of the Canadian Governmen in appointing a Government con-troller for the three basic steel

plants in Canada. The clanging mills were silenced in at least two of the nation's three basic steel plants, but in the third the situation was confused. Production came to a halt at the Algoma Steel Corporation plant at Sault Ste. Marie, Ont., and the Dominion Steel and Coal Corporation plant at Sydney, N.S.

However, at the Steel Company of Canada plant at Hamilton largest of the three—some 2,000 of the 4,500 men remained in the plant and company officials said production will be continued.

Espionage at Ottawa Russia had "several parallel un

dercover systems operating in Canada at one time, and they may still be at work, a Royal Commission reported to the Commons. The spies, it was said, obtained top ecret political information affecting United States and Britain as well as Canada.

According to The United Press, a Russian military attache in Ottawa had obtained a sample of uranium 235, the essence of the atomic tomb, and rushed it to Moscow by plane. creases and improved working con-

German Agents Foil Allied Spies

One of War's Secret Service Disasters Revealed

German secret agents who tool part in one of the greatest decep-tions of the war and caused the deaths of many British and Dutch spies sent from Britain, are awaiting trial at The Hague. They part ly wrecked the Netherlands underground resistance movement.

The tragic story begins in the autumn of 1941. Agents, with a radio operator were dropped by the Royal Air Fore in Holland. Weekly they radioed messages t

London. They in turn received in-Dutch Government transmitter Spies Break Down

All went well until the spring of 1942, when two men were arrested by the Germans. Under threats and Gestapo cruelties they broke lown and told the Germans how other Dutch agents were sent across the North Sea to Holland. The German Intelligence, using the code and the names of the two men, got in touch with London. All through the rest of 1942 they 10,000 English cigarettes, some chocolate and another radio," was

explosives and the arms carried by Allied spies, demolition experts and saboteurs. They made many requests for more and more people to be dropped into Holland.

Thanks for Everything In all 40 Netherlanders who were sent from England fell into German hands. Some refused to talk, others took the little rubber-coated lethal pills, which brought death within a few seconds. A few, under torture by the Gestapo

talked about things happening England. At last one of the agents, dropped into Holland, escaped. He got back to Britain and told the full

Fly Imported From B. C. To Battle Budworm

The Agriculture Department announced it is intensifying its annu-al attack on the spruce budworm, which infests an estimated 260,000 square miles of Canadian forest

square miles of Canadian forest and destroys 10,000,000 cords of timber each year.

The weapon used against the budworm is a fly known scientific-ally as phytodietus fumiferance, which destroyed the budworm lar-va, and now is being distributed by the tens of thousands from the department's parasite laboratory at Belleville, Ont.

Officials said the budworm is threatening valuable white spruce in an arc running from eastern Manitoba to northwestern New Brunswick and slicing into New

York and Vermont, and already has destroyed all the balsam and 50 to 60 per cent of the white spruce in an area of 25,000 square miles.
The budworm defoliates the trees by consuming spruce needles, thus limiting their growth and killing them by successive annual attacks.

In whole areas, rich stands of tim-ber have been reduced to bare poles of rotting cood.

The fly used against the worm has been imported from British Columbia, where it has kept the worm under control, and propagatd in the Belleville laboratories

The Bookshelf.

Success On the Small Farm By Haydn S. Pearson The farmer of today is as eager

to provide his family with the ne-cessities, the comforts and the minor luxuries of life as the city dweller. Mr. Pearson is convinced that he should and can earn suffitinat he should and an earn suffi-cient income to do this. Accord-ingly, he offers in this book a spe-cific, practical program for mak-ing a cash profit of \$3,000 a year

twelve acres. Haydn S. Pearson has dealt with the problems of farm life at first hand for twenty years. He is firmly convinced that the opportunity to make a good living on a ten addressed primarily to the begin-ner who has limited capital and must, therefore, make the safest and most efficient start. Established farmers, however, will discover in it much valuable information and sound advice. Success On the Small Farm . . .

Book Company, Ltd. . . . Price \$3.00. Grateful Ethiopia

By Haydn S. Pearson . . . Embassy

Ethiopia, put back in a going condition by the Allies, is repaying that effort. The little African nation, so sadly mistreated by Italy under direction of Mussolini, is providing 100,000 tons of wheat, 10,000 tons of coffee for the relief the ground. Then they move on in

MACDONALD'S

Canada's Standard Smoke

first thing every one of them want-ed to know was how soon I extickets before discarding them are not looked upon with favor by the pected to pay them the money back. I call that a heck of a way to fraternity of stoopers. Too much trouble piecing and pasting them Horse-racing undoubtedly at-tracts—and more or less supports —more queer characters than any are blessed with the virtue of patience—and have all the time there is—so they frequently suc-ceed, and cash on what might be other sport; and not the least interesting of these are the ones known as "stoopers." Visit any race-track and you are apt to see called "rebuilt" tickets.

been ahead of them.

them even. A little later, when they

discover that—by reason of a dis-qualification—their horse has been

Occasionally they run into a real occasionally they run into a real bonanza. One stooper told us a tale of such a happening—the tale of a lady racing ran whose memory he still fondly cherished. "She was a big fat dame who looked like she had plenty of dough," he said; and every day, in every race, she would buy herself one of those six-dollar combination tickets on the favorite.
Then, if the favorite finished anywhere else but in front, she would toss this ticket away—and I would

be right there ready to pick it up. Here the stooper paused and mused for a moment. "I guess I'd be wealthy now," he witsfully added, "if some dirty jerk hadn't gone and wised this dame up that you can collect place and show money on a combination ticket, if your horse runs second or third.

louse things up for us hard-work ing, legitimate guys." Which is about all for now regarding stoopers — and quite

nough, too, says you!

But some crook's always trying to

Farmers Allowed Fairer Income Tax

Mr. Ilsley's proposal to allow farmers and fishermen to average returns over three years for income tax purposes should meet approval, says the Financial Post. It is in line with suggestions made by farmer organizations and with

almost any other industries in that it is impossible in most operations sands, as an article of value. In no time at all it is in his pocket; and to estimate in advance total producbefore very long he will be at the tion or income. In years of good payoff window, cashing in on his surperior knowledge. harvests or big catches production may be two to ten times that of a lean season and much of the extra returns in the former are needed to right after a disqualification has taken place. As you probably know, permit continuing operations when nature refuses to co-operate. There is little man can do to produce commercial crops or big hauls of fish unless weather is favorable. their feelings, when they see the steed they backed to win finish Again, there are certain farm operations like livestock raising which do not fit into a yearly cycle. Crops are grown this Summer to be narketed in the form of livestock next year or later. It may take sevsral years to build up a pure-bred

The Cattalo: New **Breed of Cattle**

Distinctive Breed of Beef Cattle Withstands Rigors of Canadian Winters

Canadian cattlemen wanted new breed of cattle. They wante a breed that could withstand the a storm cattle huddled with their hindquarters facing the wind, and often smothered in the thick snow. When recumbent cows and steers tried to get up, they instinctively tried to raise their hindquarters first. Often weakened by storms and scanty winter feeding, they

death, says Time.

Cattlemen observed the habits of the buffalo. It faced the storm; it got up head first. Why not cross-The Dominion Experimental Farm at Wainwright, Alta., tried it,
Crossed With Buffalo
First they bred a buffalo bull

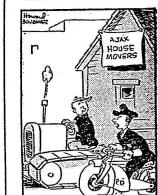

with a domestic cow found that

the calf's disproportionately big head and shoulders killed three out of four cows at birth. Then they crossed domestic bul - with buffale cows, and normal births ensued But there was one drawback; the first hybrids were sterile. Nevertheless the breeders persisted. They crossed Aberdeen Angus, Shorthorn and Hereford stock with buffalo. The offsprings were called cattalo. First generation cattalos looked like king-sized cattle the third generation the bump had been bred out, reproduction bred in. So crossbreeding was dropped

placed first, they dash madly back Success at Last By last week, after 25 years of to the spot they had quitted and make a frenzied search for those now valuable pasteboards. But they seldom succeed in finding themestablishing the fact that Canadian some quick-thinking stooper has cattle could be successfully buffaloed. Browsing in a special en closure in the Wainwright Buffalo Park were 75 precious, sturdy Those hotheads who tear up calves born this spring. They were true cattalo, not hybrids but a distinctive breed. The experts were finally sure that they had taken the cattalo out of the mule's biological dead end.
Today's cattalo looks more like

a bull than a buffalo, but it has in herited the buffalo's robust qualities. It is bigger than a domestic bull, can stand cold much better. In weather which would freeze cat-Bred trictly for beef, not milk, the average steer. Last year cat kets and nobody knew the differ-ence. Last week A. S. McLellan, Government animal husbandry ex-pert who has been mating cattalo for 14 years, said happily: "We've got what we were after."
