NOTICE TO CAR OWNERS

COUNTY OF GREY

Thoughtless parking of cars on the travelled portion of County Roads during the winter season has greatly hindered snow ploughing operations in the past and notice is hereby given that the County will not be responsible for damage to cars so parked during the present season and that action may be taken against owners of such cars under the provisions of Section 40, Subsection 5, of the Ontario Highway Traffic Act, 1946.

J. H. BEATTY,
County Road Superintendent.

Dated at Owen Sound January 31, 1947.

Butter Production Versus Butter Importation

In order to avoid a further cut in the rationing of butter the Government is importing around 11,000,000 pounds of butter from New Zealand. Since New Zealand can produce butter much cheaper than the producer in Canada it appears to us that the producer would be well advised to step up production to a greater extent in order that importation of butter would be unnecessary as this is liable to distort our price structure.

Eggs

In order to get the top grade for your eggs keep nests clean and market eggs regularly.

CREAMERY CLOSED SATURDAY NIGHTS 'TIL FURTHER NOTICE

OLD HORSES WANTED

Suitable for Mink Feed
W. W. GRAHAM
Phone 156 Markdale

The Government says "buy Jan. Feb. March chicks." To meet overseas demands, especially, but remember home markets must be supplied too. Every egg that can be produced is needed. Bray Hatchery has started cockerels, immediate delivery, and odd quantities day-old chicks. March-April chicks should be ordered now too. Save time, contact agent MacDonald Hardware, Chatsworth.

SUNOCO DYNAFUEL NEWS
If you are ABSOLUTELY CONVINCED that your car is starting as quickly and performing as smoothly as it is capable of doing in this weather, here is a suggestion. Try DYNAFUEL. Sunoco Dynafuel is the wonder-fuel that was a 12 to 1 favourite with automobile dealers in 93 communities during a recent survey. The men who REALLY know cars say that it gives better performance than any other gasoline they have ever used. So switch to sure starts. Switch to sure super-power. Switch to super-smoothness. Switch to DYNAFUEL. Sunoco Dynafuel. Sold only by A. O. Gillespie.

- Flesherton - Kenneth G. Betts, Reeve.
- Markdale - Milson A. Henry, Reeve.
- Neustadt - John E. Meyer, Reeve.
- Shallow Lake - Cochrane C. Noble, Reeve.

SAFETY FIRST

Very few drivers seem to know what to do when a car starts skidding on ice, snow or wet pavement. The Ontario Highways Department wants to remind you of what every experienced driver does instinctively, in such situations. When your car skids do as follows: First, turn the front wheels in the direction in which the rear end is slipping; second, take your foot off the accelerator but leave the clutch engaged; third, pump the brake pedal down and up gently. Above all, don't lose your head and jam on the brakes.

Creep Feeding Spring Litters of Hogs

Creep feeding of pigs while on the sow is a definite help in producing heavy, thrifty pigs at weaning. With a large litter, and in rearing early litters which do not have the benefit of sunshine or out-door conditions, the use of a creep is particularly important. Usually, all normal-sized litters will benefit from creep feeding and so it is good business to make it a regular routine in hog raising, says E. B. Fraser, Division of Animal Husbandry, Central Experimental Farm, Ottawa.

Creep feeding is merely arranging a supply of feed for the little pigs separate from the sow. Separate feeding can generally be done by boarding off one corner of the pen, allowing the pigs in the alleyway, or giving them an adjoining pen in which to feed.

At two to three weeks of age, the young pigs will start to nibble at feed from sow's trough. Then creep feeding should be started, and should be continued until weaning at six to eight weeks of age. The pigs can even be continued on the same feed for a time after weaning.

The feed mixture for creep feeding can be made up at home, or a commercial pig starter may be used. In home mixing, it is important that the feed be palatable and low in fibre. Equal parts of sifted oat chop and middlings or cracked wheat makes a good mixture for the young pigs. To this should be added some high protein feed. Fish meal, tankage, or a protein-mineral supplement can be added to the feed mixture at the rate of 10 to 15 per cent. Minerals are desirable except where a protein-mineral supplement is used, and two to three per cent. of a simple mineral mixture should be added to the grain. The dry feed mixture should be fed sparingly but often, and fresh water kept always available in a separate trough.

Where sweet skim-milk is available it will supply the high protein feed to supplement the grain. The skim-milk should be fed in a separate trough in the creep. In feeding skim-milk care must be taken to clean the milk trough thoroughly every day.

OUTSTANDING RETURNS TO POLICYHOLDERS

This is the egg

Yes sir, if you get only one egg more per day than you are now getting from 100 hens - that one egg will pay any difference, if there is any, in price of

Blatchford's
FILL-THE-BASKET
EGG MASH

And you cannot buy a better feed - but you get many more extra eggs when you feed Blatchford's Fill-the-basket Egg Mash - and they are all extra profit.

So - why not start now to feed
