SYNOPSIS

CHAPTER IV: A tail beautiful blonde woman appears. She is Mrs. Karen Bigelow. Other members of the family arrive. McCale meets Mrs. Sybil Bigelow, the bride's mother. She is a heavy woman, richly dressed. With her are her children, Victoria, dark and attractive. Stephen, slender and nervous, and Veronica, the bride-to-be, a pretty red-haired girl

CHAPTER V. Christotoher Storm was tall and lean and athletic. is face missed being handsome by way of a rather square jaw aand a generous mouth His grip and voice were pure steel offered McCale a cigarette They liked each other at once. I was as easy and unassuming

Christopher manaeuvred McCale toward the bottled liquids, mixed them both a drink. He motioned to a seat beside himself, saying without preliminary, "Heard about you in that dyehouse racket. Pretty keen deduction. What brings you

"Wedding presents." "Not really? Didn't know you went in for small stuff." "I have to make a living. Cases like the dychouse murders are few and far between."

"Well, it just didn't seem to me that the array of bric-a-brac down-McCale didn't answer. "Too true

Storm's blue eves narrowed

my bright young fellow," he thought, "but if I told you that all day I've been coddling a tingle that now and then raises the hair on my "Who called you in?" "Family." To himself he contin-

Curt. Curt seemed to square off to her. He shook his head as if he ued, "Darn. This fellow is too inwere saying, "No." quisitive." Suddenly McCale caugh Everyone was concentrating upa glimpse of something—something ugly behind that hail-fellow atti on Storm and Veronica at that motude, that mantel of jauntiness-something he did not like. else saw that exchange of glances etween those other two. Afterward he was to wonder. Vallaincourt went over to his fu-

"Not Sybil?" Christopher prodded. "Not darling Sybil, surely." McCale was saved from making a reply by a peal of light laughter outside the room. A door bange omewhere. There was another ripple of merriment mingled with deeper one, running feet on the stairs, and Veronica ran into the room, followed by a man.

They might have been precede by a fanfare of trumpets. Everyone topped talking; everyone turned toward the door as to a stage. It was as if a spotlight had been turned on, startling the audience to quickening anticipation of the star's plete Even McCale was checked in

Something electric came into the room with Curt Vallaincourt. Even if there had not been the little piping ecstatic thrill of Sybil's "Curt, dear"; the quick fire that lighted Victoria's glistening eyes; the husky overtones of Karen say-ing "Behold the bridegroom cometh." McCale would have known the identity of this physical rhap-

Here was a consciously beautiful young man in a great big way: tall and wide, dark and strong. He was a dynamic person—the kind to whom things were bound to hap-

pen.

He acknowledged the introduction to the detective in a deep strong voice, with a handshake that made McCale almost buckle at the It was three or four minutes be-

fore the blitzkrieg of his arrival settled into a steady, slow apprecia-Afterward McCale was to come

back to that short scene many times, trying to put together the pieces of the riddle as they presented themselves in the next few moments. It was all there, had he known it the wheels within wheels, the red thread of danger, the shadow of death. Each intimate gesture, the shading of a phrase, Protestants in U.S. Plan New Churches

Protestant churches in the Unit ed States are planning new build-ings costing \$650,000,000 as soon as materials are available. At a meeting of the North American Con-ference on Church Architecture in New York recently, reports News-week, 150 architects and church men discussed new trends in Pro-testant church building and what was good or bad about them.

The most specific trend is toward a "sanctuary" with altar and chancel (choir divided in facing sections) rather than an auditor the congregation. Church plans call for recreational halls, bowling alleys, kitchens and parlors with cheerful fireplaces. Of 100 plans for new churches displayed, less than six were of modernistic design. Clergymen want their churches to look like churches, and ioined architects in decrying style which they termed "Cherokee Gothic" and "Classical Portland

FEEDS THE KITTY

It was when Curt said, in that compelling voice of his, "Very magnanimous of you, Chris, to give us The Nest," that a warning signal Despite the name "Lilly Belle," he's a big tomcat now and maybe mified to wear a dress and flashed in McCale's brain. It was t's undignified to wear a utess and take his milk from a doll's nursing bottle, but that's the way he prefers it now, so his 4 year-old spoken with such charming naivete, as if, thought McCale, the one thing e really lacked was manners. He histress, Dorothy Penney, hawnee, Okla, humors the was making a studied conscious ef fort. Storm only smiled, steadily, He

How Can I? By Anne Ashley How can I mix a good steel

and nickel polish? A. By mixing 1 tablespoonful o oil, and enough emery powder to with a soft rag, and then wipe of and polish with a dry flannel cloth.

Q. How can I test table linen? A. Secure a sample and dip it in any kind of oil. The linen threads will become almost trans-parent, enabling one to see very readily how many cotton threads it

Q. How can I remove red wine stains from linen? A. By dipping the stained por-tion into boiling milk. Keep the

milk boiling until the stains dis-Q. How can I make use of the juice in which asparagus has been

A. A good soup can be made from this juice. Use a few of the leftover stalks, thicken, and add cream, butter, and seasoning. Serve with hot, round crackers. Q. What is a good method for making buttonholes?

A. Baste a strip of cloth on the underside of the hem. Then cut and work the buttonhole through both strip and hem. Cut away the surplus strip.

Q. How can I prevent an oily skin? A. Wash daily with hot castile soap suds. Rinse in hot, then cold water. Do not eat fats. Drink plenty of water.

LOOK-NO HANDS'

Mamma seems properly astounded at her child's precocity and Junior appears smugly self satisfied, with, perhaps, just a little touch of ham. Young "strong man" is six-month-old Andrew Hanik, Jr., of Chicago.

## Sunday School Lesson

The Good Shepherd John 10: 7-18 Golden Text-"I am the good

shepherd: the good shepherd giveth his life for the sheep."—John 10:11. The Sheepfold The sheepfold pictures the salvation, safety and sustenance of the sheep. The parable is radiant with

The sheep represent God's people; the sheepfold, God's kingdom; the door, the entrance into the kingdom; the porter, the Father, or as some think, the Holy Spirit: the hief and robber, the enemies of the flock; the stranger, the false rligious teacher: the shepherd, chiefly

the human shepherd under divine The Shepherd's Work The shepherd's work in the present is the protection and progress of his flock. Contrast with him the hireling who may be in mercenary charge of the flock. He is not a shepherd in any sense of the term.

he Divine Shepherd, but secondly

"Love-Lure" Traps Catch Mosquitoes

He is not the owner of one single

One of the most extraordinary war-time inventions is credited to n American scientist, who an "Love Lure" trap of dealing with this pest, and put such things a nosquito netting and sprays out

The "Love Lure" consists of records of the female mosquito's love call to her mate. These are played inside a trap. Hearing the call, the male mosquito immediately head for it-and never emerges alive. Dr Kahn the inventor hopes

that traps will soon be available for use all over the Pacific, with a consequent reduction in the numbers of malaria, vellow fever and elephantiasis-carrying mosquitoes The sounds made by the record inaudible to the human car, for the mosquito is a quiet creature. In fact, so far as the malarial type is concerned, it is seldom pos-sible to hear the "ping" common-ly associated with the Hight of

Coast-to-Coast

this disease-carrying insect.

Plans to establish the first coastto-coast railway system in the United States are now being discussed there. Canada has three continental railway lines, two of which are operated by the Canadian National Railways.

1. No; the correct form for narried woman is "Mrs. James Brown." 2. Yes, it is the courteous thing to do, especially if it is a small, informal dance. 3. Black is the only color in which a card should be engraved. 4. Yes; he also rises when she returns and holds her chair for her, if she happens to be seated near him. 5. Yes, though it is not so popular as formerly. 6. Show the same cordiality to both men; be tactful.

Chemical Treatment Fireproofs Fabrics

Fewer little girls may burn to death by having their fluffy dresses catch fire from candles, opea heaters or carelessly handled matches if the United States congress passes a bill for the chemical treatment of wearing apparel and other fabrics to make them less flammable. California already has such a law, applying only to wearing apparel, and other states are considering similar measures. The textiles and dry goods industries are handled by national legislation rather than to allow a chaotic situation to arise from

divergent state laws.

Already available are two processes for treating cloth to make it flame-resistant and another is promised in a few months from charring and to keep from flaming and burning. The proposed federal measure would provide a yard stick for testing fabrics and prob-ably would apply to all fabrics, since the danger from burning cur-tains is almost as great as that from ignited clothing. Though not intended as a substitute for personal caution, the general treat might prevent many mishaps from having fatal consequences.

Dark Egg Yolks

Feeding experiments with Barred Rock Pullets at the Dominion Experimental Station, Harrow, Ont., have shown that due to the nature of the diet, quantities of succulent green feed, such as cut and steeped alfalia hay, have a tendency to intensify the colour of egg yolks. Eggs with rich coloured yolks are now favoured in the overseas mar-ket because a darker yolk is generally accepted as an indication of a satisfactory diet and the presence of valuable food factors, notably Vitamin A.

NEW FASTER ACTING ROYAL DRY YEAST

on the Car

**New Granule Form Saves Time!** 

Saves Work! Scores New Baking Success!

No fussing with "setting bread" the night before when you're tired and "not up to it." No risk of overnight baking failure because of temperature changes. New Fast Rising Royal lets you do your whole baking in a few hours in the daytime when you can watch the dough. New Fast Rising Royal stays full-strength, ready for use on your pantry shelf for weeks. Try New Royal Fast Rising Dry Yeast today. At your grocer's.

## CHRONICLES OF GINGER FARM

and country folk alike in England, Europe and the North American continent all have in common these days and that is the weather. We read about it, think about it, talk about it. And do we worry about it! But of course, how much we worry depends upon the extent to which it affects us. When you have friends over in the Old Coun try and you know that cold stormy weather coupled with a drastic reduction in the supply of coal gas, and electric power, is bound to create a very serious hardship then how can anyone help but be anxious. As if the peo-ple in the British Isles hadn't had enough to put up with during the In Ontario, and right on the

farms, the greatest worry is na-turally blocked lanes and sideroads. A long lane in summer is an advantage; it keeps the house comparatively free of road dust. but in winter . . . it keeps us free of the baker, the grocery boy, the milk truck, visitors and even peddlers. Bob was determined he was going to keep our lane open during the stormy weather and, by fint of repeated shovellings, he managed pretty well for a few days although the best he could days, although the best he could do was drive in as far as the house and then back all the way out again each time he wanted to go to town. Getting the milk cans and town. Getting the milk cans and the egg crates to the road is quite in job. First the men tried pushing them down the lane on an improvised sleigh—just a wider platform rigged up on a child's hand sleigh. But the snow got too deep for it to be of much use. Then we thought a telegrap would be thought a toboggan would be a good idea but of course there wasn't one in town. However, in a few days the harware store had come come in, so we got one and found it exactly does the trick. Of course the car is now left at the road gate and as long as the high-way is kept open Bob can get back and forth to town, and in that way keep us supplied with the necessities of life.

I shall be glad when it will be possible to lay in supplies in larger quantities like we used to. It is a good thing, in the country, to stock up for the winter. Just think how nice it will be to buy sugar by the 100-pound bag again! R. Print - Feb. 11 - Warmington lowever, there are some advantages to buying in small quantities. alised that the other day when I opened a half-pound packet of ea for which I had paid 45 cents. I was sure glad we hadn't got ten-pounds of that stuff. Really the taste and smell of that tea was -top of the water that looked like dust. I tried making a second lot and the result was just the same. We simply couldn't drink it—and it was the first time we have ever id that happen.

There didn't seem much sense in taking it back to the store how could they know what the tea was like? So I looked up the sent the tea back to them. The accomplaint, but of inquiry. For one reason I felt sure there had been a slip-up somewhere and that the company would prefer to know about it. After all it was their re-

There is one thing that town | putation at stake-all we stood t lose was half a pound of tea.

I wish it were possible, and as easy, to send back the coal we bought lest fall! To call it coal is stretching the point. Black chunks of brick and stone would be nearer the mark. About 50 per cent comes out of the ashpan as solid as when it went into the firebox. That is when it shakes down - and tha is our main worry. Very often it doesn't, and the fire has to be let out in order to pry loose the chunks of stoney coal that have wedged themselves between the grates. By the time a person has done a few acrobatic stunts by climbing haliway into the furnace and getting absolutely blackened in the process - tempers are clined to be a little short and pa tience at the zero mark. It will be a great day when the

tradespeople and manufacturers are back on a competitive basis. Well, Bob is back to dinner again so I suppose we shall hear the overhaul job to his truck down him, except at meal-time, when I

As far as we are concerned the pictures of late have a very disa-greeable odour to them. The last five shows I've seen have been morbid, unpleasant things running along with a thread of a story to them. Who cares a hoot about jealous husbands, fickle babes and characters who are a little heavy on one side of the bean? Where are the Minivers, the Hardy family. Tugboat Annie and the rest of the characters we used to go and see for a laugh and a sigh? While on the subject of film there is one that is currently reviewed as the best picture that will be out this year. It is Samuel Goldwyn's, "The Best Years of Our Lives" and deals with a family re-adjusting itself after the war. The picture carries a distinguished cast and we'll review it as soon as

possible. It should hit Canada soon. Today's column should have a heading on it titled "Beef Day", because that is about all we've done
