## Safeguarding telephone wires for trouble-free Service

THE WORK of burying telephone wires or placing them in overhead cable continues year after year. Today, over 4 million miles of telephone wires, 95% of our total, are in cable, safer from storms. Service interruptions caused by weather are fewer, and still our constant aim is to provide even better service.

Not only is our service becoming more dependable, but it's growing, too. We are filling orders for telephones just as fast as new equipment is available. More telephones plus more dependable service — and always at the lowest possible cost — mean greater telephone value for every user.

## CREAM

We stressed, in our previous ads, the extra care which should be given milch cows during the cold autumn nights. Due to the efforts on the part of the cream producers the production has kept up exceptionally well. Keep up the good work.

### — POULTRY —

We are continually striving to secure best possible markets for poultry so that we, in turn, can pay the producer the highest possible prices. If your poultry is ready for market, deliver them to the creamery or have our truck pick them up.

### — FURS —

We are buyers of raw furs and are paying particularly good prices for wild mink. Get in touch with us.
